

Partnering in research

The Library is your partner at every stage of the research cycle. We contribute a range of advice, resources and activities to enable discovery, use and management of information.

Partnering in education

The Library is your partner and collaborator. We contribute a range of resources, programs and activities to enhance teaching and facilitate student learning and employability skills development.

SKILLS DEVELOPMENT

Library staff work with academic staff to develop research and learning skills resources, activities and curricula, using the **Research Skill Development (RSD) framework** (Willison and O'Regan, 2006, 2013).

An employability skills focus is enabled through our additional use of the related **Work Skills Development Framework** (Bandaranaike and Willison, 2009, 2014) for the incorporation of employment skills within curricula.
