The Faculty of IT invites you to their business breakfast. You will have the opportunity to interact with leading researchers as they discuss the challenges of information overload in the next decade and hear about how their research is looking at ways to handle the continuing growth of information from the web, images, pervasive computers, sensors, mobiles and other sources.

The session will include overviews on research that finds ways to process, store, filter, retrieve, and represent all that information in ways that help people do things with it rather than be overloaded by it.

Speakers include: Dr. Wojtek James Goscinski (PhD BDesArch BComp, Monash University), Dr. Mark Carmen (Information Technology, Monash University) and Professor Geoff Webb (Centre for Research and Intelligence Systems, Monash University).

Date: Thursday 9 June 2011
Time: Start: 7.15am for a 7.30am start
Finish: 9.00am
Venue: Cuba Boardroom, (Downstairs through Radii Restaurant)
Park Hyatt
1 Parliament Square, East Melbourne
(map attached)
