# MASTER OF OCCUPATIONAL & ENVIRONMENTAL HEALTH

## TAKE YOUR CAREER IN BOLD NEW DIRECTIONS

Our flexible course puts you in the driving seat so you can control how and what you learn. Course content follows professional competencies, helping graduates enhance their career or explore new paths.

The Monash Centre for Occupational and Environmental Health (MonCOEH) is a world-leader in workplace health and safety research and practice. Our course provides you with:

- Flexible study including distance learning for busy professionals;
- A comprehensive, varied program compiled by one of Australia's leading environmental health academic groups;
- On-site teaching days at The Alfred Hospital including worksite visits, case studies and group sessions.

### In the Master of Occupational and Environmental Health you will:

Gain skills to:

- Prevent ill-health related to hazards and exposures in workplaces and communities;
- Provide occupational health services;
- Assess workplace and environmental health risks and apply risk management approaches;
- Communicate health risks to exposed people and the public.

## YOUR TICKET TO A VARIED AND REWARDING CAREER

Our post-graduate courses lead to a wide range of careers in workplace health and safety planning and management, ergonomics, employee health management, healthy workplace design and research.

The course is designed for students from a wide range of health and science backgrounds including clinicians, nurses, allied health professionals, scientists and occupational health and safety managers.

### Course code

M6026

### Study mode

On-campus (Alfred Hospital)

Off-campus (Alfred Hospital)

Note: Off-campus is not available to international students

### Intakes

February/March AND July/August

### Durations

**Full time:** 1.5 years

**Part time:** 3 years

*"This course enabled my accreditation as an Occupational Physician registrar. The core units enhanced my approach to identifying, quantifying and managing occupational hazards. I now advise corporations on occupational health matters, employee medical checks, injury management and health surveillance."*

**Dr Chris Pang**

Occupational Physician Registrar

## COURSE UNITS

- Introduction to Occupational Health & Safety
- Chemical and Biological Hazards
- Psychosocial Work Environment
- Assessment and Control of Workplace Hazards
- Environmental Influences on Health
- Ergonomic and Physical Hazards
- Safety Management Systems

## PROFESSIONAL RECOGNITION

This course is accredited by the Australian OHS Education Accreditation Board. Graduates meet the requirements for certification as GradOHSPProf.

## STUDY OPTIONS

Plan a course of study that suits your life:

- Graduate Diploma (2 years part-time or 1 year full-time)
- Master (3 years part-time or 1.5 years full-time)

The courses articulate with each other and can lead into a Master of Public Health or PhD study.

## ABOUT MONCOEH

Our centre has been actively involved with research, education and advisory activities within occupational and environmental health for over ten years.

We are the largest centre of our kind in Australia. Our interests span industry, veteran and military health, occupational disease surveillance, exposure assessment and hazard and risk assessment.

For more information about MonCOEH visit [monash.edu/medicine/sphpm/coeh](http://monash.edu/medicine/sphpm/coeh)

*"I wanted to formalise my on-the-job experience in workplace health and safety with study. This course complemented my existing skills perfectly. Online learning helped me juggle study with life commitments whilst the on-site days let me learn from the experience of my peers. I've now got more confidence in my analytical skills."*

**Eleanor Weber**  
Grad Dip graduate
