Monash University Library
Annual Report
2008
Mission
Monash University Library advances scholarship by enabling the effective discovery and use of information for education and research.

Special Thanks
Monash University Library wishes to thank all those people who have supported the Library in 2008 through gifts and donations. Staff and students at Monash University are fortunate to have the generosity of donors in helping to provide outstanding collections and facilities.

2008 in review

2008 was a year of significant completions, commencements and consolidation. Monash University Library now combines traditional, highly valued roles with roles that extend its contribution to the University. The new roles include learning skills, institutional repository management, publishing and research data management coordination and support. Traditional roles have in many cases been transformed in response to technological, pedagogical and research changes and opportunities, so that collections are as likely to be licensed as acquired and learning spaces bear little resemblance to the original inflexible facilities.

Upgrading the Library’s physical facilities remains one of our highest priorities. A major refurbishment of the CL Butchers Pharmacy Library at the Faculty of Pharmacy and Pharmaceutical Sciences campus in Parkville was completed as part of the ongoing strategy to improve the Library’s physical facilities and learning spaces. Works to upgrade staff and learning spaces were undertaken at several other sites, and in some cases this included installation of new technologies to support videoconferencing between campuses for staff communication and student learning activities. Some of these works also contributed to the consolidation of the very successful establishment of the Learning Skills Unit in the Library in 2007. Planning for several other major building projects is continuing.

For the last five years the Library has led the national ARROW (Australian Research Repositories Online to the World) project, which concluded at the end of 2008. The project’s primary objective was to build a new repository management solution for Australian universities, and to make the research material stored in those repositories discoverable both nationally and internationally. The project oversaw the development of a software platform, tools, knowledge and advice on all aspects of managing digital research outputs. Counted among the successes of the project were the establishment of an active repository community and the development by the National Library of Australia of a national discovery service. ARROW has given way to the Australian National Data Service (ANDS), which is a major new, federally funded project whose goal is to deliver greater access to Australia’s research data assets in forms that support easier and more effective data use and reuse. During 2008 Monash University led the ANDS Establishment Project, in collaboration with the Australian National University (ANU) and CSIRO, and is continuing its lead role as ANDS commences its activities.

The Monash University ePress was founded in 2003 as an initiative that would lead the way in using innovative information technology to publish scholarly material. A developmental review of the ePress was undertaken in 2008 and strategies to implement the recommendations will be developed in 2009 to ensure that the ePress continues to build its role in the University as a platform for scholarly communication.

Growth and development of the Library’s collections was reflected by expenditure of over $16 million on resources, 56% of which was used in the acquisition of electronic resources. Use of physical and virtual resources increased following initiatives to extend systems, services and training provided by the Library as part of its Resource Discovery Framework strategy. This year over 3.6 million visits were made to the Library’s branches and over 7 million transactions were logged on electronic resources.

The Library is playing an increasing role supporting the management of research data and the new Research Data Management Coordinator position in the Library, thought to be the first such appointment in an Australian library, is a key strategy in this area. Supporting this role a new project was launched in which contact librarians and other specialist library staff are working with faculty and research teams to extend outreach associated with research data management, the ePress and the ARROW Repository.
Senior appointments in learning skills, information literacy, document delivery and branch management have contributed to continuing development and change in all Library areas. Workshops in values and behaviours, the establishment of a mentoring scheme and evolution of a professional development framework have been features of staff development during the year. Visits made by staff to and from the campuses in South Africa and Malaysia continued the support and development of staff and facilities at these important, remote campuses in their formative years.

In presenting this report to Academic Board I would like to thank the University for its ongoing support of the Library, particularly its sustained commitment to the development of a strong collection, and Library staff for being consummate professionals and a joy to work with.

Cathrine Harboe-Ree
University Librarian
2008 priorities

The Library Strategic Plan for 2008 defined ten priorities. Significant progress was made in fulfilling these during the year.

1 To contribute to the University’s education and research performance by implementing the Library’s Research and Education Support Plans.

Implementation of the Education and Research Support Plans continued during 2008. The Plans will be reviewed in 2009 within the context of the Library’s overall planning framework.

2 To improve the user experience by upgrading facilities in accordance with the Facilities Master Plan.

The refurbished CL Butchers Pharmacy Library in the Manning Building at the Parkville campus became operational in August and was formally opened in December. Planning for a new Law Library commenced as part of the anticipated move of the Law Faculty to a new building on the Caulfield campus in 2012.

The Facilities Master Plan was reviewed and an audit against the Plan was made at each branch. Improvements were made to signage, furniture and entrances as part of the audit.

3 To contribute to improved student performance through information literacy and learning skills programs.

The Learning Skills Unit operated for its first full year as a Library service. A range of successful programs, many including both information literacy and learning skills, were developed and implemented in partnership with all faculties. Notable amongst these were the Bachelor of Business Foundation Year in the Faculty of Business and Economics, the Biological Science unit in the Faculty of Science and the Research and Writing first year unit in the Faculty of Law. As planned, a review of learning skills commenced towards the end of 2008.

4 To improve access to a broader range of information resources through the implementation of the resource discovery framework.

Work continued throughout the year to improve the presentation of the catalogue and increase the ease with which users gain access to information resources. Improvements included implementation of a spell check facility for searching and inclusion of thumbnail images of items. Federated search and link resolution services continued to be investigated and consideration was given to acquiring an overarching resource discovery layer application, with a decision to be made in 2009.

Library resources are now being loaded into Google Scholar to provide users with an alternative search mechanism.

5 To contribute to the success of the Malaysia and South Africa campuses by supporting the development of their library services.

A number of activities contributed to the growth and development of library services on the Sunway Campus in Malaysia and the South African campus during 2008. Visits between Australia, Malaysia and South Africa were made by staff. A review of learning services at Sunway was undertaken, and a report and recommendations made to the Education Committee at Sunway. Regular teleconferences between the campuses and participation in General Library Committee meetings have strengthened collaboration and interaction.
6 To help to develop national and university information management capability through the ARROW project and digital data management strategic initiatives.

The national ARROW project, led by Monash University Library, concluded in December 2008. ARROW was established in 2003 to develop, test and install software that would enable Australian universities to establish integrated institutional repositories. Sixteen universities have adopted the platform for their repositories. ARROW and the related DART and ARCHER projects, also led by Monash University, informed Government thinking regarding the Research Quality Framework.

During the year a Data Management Coordinator was appointed. The Library's DARE project commenced and aims to extend the role of contact librarians to include research data management advice for researchers.

7 To review the Monash University ePress to ensure that it best meets the needs of the University.

A review of the ePress was undertaken in 2008 and strategies to implement the recommendations will be developed and applied as appropriate in 2009 to ensure that the role of the press in the University continues to evolve.

8 To review and resolve ongoing collection management and storage needs.

A long term storage strategy has been completed and endorsed by the University. Participation in the development of CAVAL’s new CARM storage facility was approved and final negotiations with partners are proceeding towards completion of the new facility in 2010.

9 To ensure that the Library’s service offer is effectively communicated.

Communication strategies and mechanisms were reviewed and a new communication framework was developed and implemented. A post-implementation review of the electronic notice boards found a positive response to this mode of communication. All Library publications were reviewed and a communication matrix completed.

10 To develop the ability of staff to continue to provide outstanding services in a rapidly changing environment.

Values and behaviours workshops for all Library staff, and the establishment of a mentoring program, were key initiatives in staff development. New senior managers participated in a leadership and development program and the Library implemented a new model for conference attendance for all staff.
Goal 1: Information Resources

To ensure that the selection, acquisition, creation, cataloguing, storage and preservation of scholarly information are in line with the needs and requirements of the University community. Provide prompt, seamless, reliable and easy-to-use access to high quality scholarly information, regardless of the location of the information or the user.

Evaluate, select, acquire and license new materials (both print and electronic)

Acquiring and processing new materials

The 2008 collection budget of $16,550,365 was a 7.16% increase from the 2007 budget expenditure of $15,444,755. The sudden decrease in the value of the Australian dollar towards the end of 2008 is expected to have an impact on the acquisition budget in 2009/2010. In 2008 the expenditure on electronic resources was again greater than the amount spent on printed resources, comprising 57.5% of the budget.

Important collection development projects continued, with support extended for the graduate Bachelor of Medicine, Bachelor of Surgery (MBBS) course in Gippsland, and acquisition of materials to support the new Bachelor of Architectural Design at the Caulfield campus.

Donations

The Library continues to benefit from the generosity of many donors. Items of note received in 2008 from personal and institutional donors included:
- A set of the current handbooks and other publications issued by the Chartered Institution of Building Services Engineers (CIBSE).
- Institutional donations of Korean studies books, serials and multimedia materials.
- Personal donations relating to the Asialink Arts Program, the Australian Asian Association, Australian children's books and general fiction, and a copy of the “Memoirs” of Sir John Monash's grandfather, Bar Loebel Monasch, a publisher in Krotoschin in Poland. The “Memoirs” have been edited, with an English translation, and published in Poland in 2004.

Provide access to and information about resources through the catalogue and web pages

In addition to the 54,144 bibliographic records created for new items, significant progress was made in addressing the backlog of uncatalogued material, including material from the Victorian Department of Infrastructure focused primarily on water resources in Gippsland, a collection of art catalogues donated by the Department of Art and Design and an Italian language collection donated by the Italian Consulate.

The Library undertook a project using Library of Congress authorities to improve the standard of Monash catalogue records.

Provide resource discovery tools to enable access to electronic resources including e-journals, e-books, databases, web sites and repositories

Resource discovery

Monash Library users can now search Google Scholar to access the Library’s electronic resources, which appear in the search results with a link to check for full text. This initiative was developed as one strategy within the Library’s broader Resource Discovery Framework, which aims to provide a seamless and comprehensive approach to resource discovery through a range of discovery aids and systems rather than the traditional focus on the Library catalogue as the only means to access information.
e-books

In 2008 54,529 e-books were added to the collection, which now has 318,432 e-books. A user-driven process for the selection of electronic books was trialled from October 2007 until April 2008. This was very successful and the Library is continuing this model, within budgetary limits.

Lectures Online system upgraded

In collaboration with the Faculties of Law, Art and Design, and Medicine, Nursing and Health Sciences the Library led a trial of Echo360 (Lectopia) software to capture both audio recordings and the visual presentation component of lectures. As a result of the trial the University endorsed the Lectopia software as the best solution available to replace the existing Lectures Online software. Progressive implementation of Lectopia will start in 2009.

SMS service expanded

A review of the SMS notification service was completed in 2007 and a trial to extend SMS notifications to the class booking system was put in place for 2009. The booking system will be reviewed in 2009.

Provide physical access to print collections held in branch libraries

Long term storage strategy

As a long term storage strategy the University approved Monash’s participation in CAVAL’s offsite store (CARM) development. This is a collaborative project with the University of Melbourne and RMIT University.

Offsite storage

109,000 volumes have been transferred to the CAVAL Store since March 2006. Monash Library users can request items by putting a hold on them as they would if the items were at any other branch. Items can also be brought back into branches if course or research requirements change. Most of the transfers to the CARM Store have been from the Matheson Library, largely due to the collection management project being undertaken in anticipation of refurbishment of this branch.

The goal of achieving seamless access to materials in offsite storage has been extended by allowing alumni and CAVAL borrowers to place requests for these materials.

Promote and preserve the university’s intellectual output

ARROW

For five years Monash University led the federally funded ARROW project (Australian Research Repositories Online to the World), which was funded by the Australian Commonwealth Department of Education, Science and Training (DEST) under the banner of the Systemic Infrastructure Initiative (SII), a part of Backing Australia’s Ability – An Innovation Action Plan for the Future.
ARROW’s goal was to build a new repository management solution for Australian higher education, and to make the research material stored in those repositories discoverable both nationally and internationally. The original consortium comprised Monash University (lead institution), the National Library of Australia, the University of New South Wales, and Swinburne University of Technology.

An innovative aspect of the project was to combine an open source platform with a commercial search and management layer. ARROW worked with Fedora and VTLS Inc. to design and develop the VITAL software and to provide Open Source software for Fedora users.

ARROW funded a number of mini-projects which resulted in the development of tools to help researchers manage their data. ARROW also hosted the PILIN project and its work on infrastructure for persistent identifiers.

In mid-2008 ARROW negotiated an arrangement with the Council of Australian University Librarians (CAUL) to fund the establishment of the new CAUL Australian Institutional Repository Support Service (CAIRSS). CAIRSS will provide support to all Australian university repositories, regardless of the software being used.

**Monash ARROW Repository**

The development and management of the Monash ARROW Repository is now the responsibility of the Library’s Information Resources Division. Federal Government funds were used to support the key goals of stabilising the software, building tools and adding content. By the end of 2008 the ARROW Repository contained over 3,000 items, including musicological research, Faculty of Business and Economics Working papers and Monash University theses from 2000 onwards. The University has mandated the electronic submission of future doctoral theses.

Monash University has become an active member of the Australian Digital Theses (ADT) Service and joins 40 other member universities in Australia and New Zealand. Monash is using its ARROW Repository to store theses and supply metadata records to the central ADT service.

Monash University was the first non-European and is the only Australian member of the Nereus Consortium of European economics research libraries. Currently 976 articles have been harvested in the Economists Online Portal from the ARROW Repository and these are available on open access to facilitate research in economics.

Following the discontinuation of the planned Research Quality Framework (RQF), the dedicated server was decommissioned and the data stored. Repository staff are now involved in preparations for capture of Higher Education Research (HERDC) publications and Excellence in Research for Australia (ERA) evidence.

**Monash University ePress**

A major review of the ePress was conducted during the year, with final reporting to take place in early 2009. The review, which involved extensive consultation with key stakeholders, delivered a range of recommendations including a proposed new business model. Implementation strategies will be developed in 2009.

* Australians in Italy was published by the Monash University ePress in 2008*
New ePress monographs published in 2008

- *Australians in Italy: Contemporary Lives and Impressions*, edited by Bill Kent, Cynthia Troup and Ros Pesman
- *Seize the Day: Australia, Exhibitions and the World*, edited by Richard Gillespie, Kate Darian-Smith, Caroline Jordan and Elizabeth Willis
- *From Ferranti to Faculty: Information Technology at Monash University, 1960 to 1990*, Sarah Rood

Journals published by the ePress in 2008

- *History Australia*
- *The Bible and Critical Theory*
- *Australian Review of Applied Linguistics*
- *The Telecommunications Journal of Australia*
- *Monash Business Review*. This journal is now discontinued.

Australian National Data Service (ANDS)

The Library, together with the Monash e-Research Centre and Information Technology Services, provided input into the establishment of ANDS. ANDS, which is funded as part of the NCRIS Platforms for Collaboration initiative, is led by Monash University in collaboration with the Australian National University and CSIRO. Through four programs – Frameworks, Utilities, Seeding the Commons and Building Capability – ANDS is intended to support Australia’s ability to undertake e-Research in a global, collaborative context. ANDS was initially funded through to 2011 with a budget of $21M.

Promote and preserve the University’s collections

Rare Books exhibitions

Fifty books from fifty years: celebrating a half century of collecting

To celebrate the 50th anniversary of the founding of Monash University the Library organised an exhibition of fifty books chosen by Monash academics and researchers.

The exhibition demonstrated the importance of the Monash University Library Rare Books. Professor Clive Probyn chose a pamphlet from 1733 that was written in response to one by Jonathan Swift and that Swift was reading in order to write his rebuttal. The pamphlet is Swift’s own copy, with annotations in his hand. The Dean of Arts, Professor Rae Frances, chose a group of late nineteenth-early twentieth century books on the problem of white slavery and narratives of sexual enslavement that she used in her latest book, *Selling sex: a hidden history of prostitution*.

At the opening of the Fifty books from fifty years exhibition: Deputy Vice-Chancellor (Education) Professor Adam Shoemaker (left) with University Librarian Cathrine Harboe-Ree and Richard Overell, Rare Books Librarian
The illustration used for the exhibition poster was taken from the title page of the artist Oskar Kokoschka's *Die träumenden knaben* (The Dreaming Boys) published in a limited edition in Vienna in 1908. This is an extremely rare and beautiful book and appears to be the only copy in Australia. Dr. John Gregory chose this item. Dr. Janine Burke, who is researching a book on Yoko Ono, chose some of Ono's early exhibition catalogues. These are now quite rare and valuable, and are not widely held in Australia.

**Southerly Busters: an exhibition of Australian Literature**

This exhibition celebrated the completion and publication of the fourth and final volume of the *Bibliography of Australian Literature*. The exhibition provided an overview of Australian literature in all its genres and featured items from the Rare Books Collection including well known classic works and many that are now forgotten.

**Early Monash display at Matheson Library**

As a further part of the University’s 50th Anniversary celebrations, material relating to the early years of Monash University was displayed in the Matheson Library. As well as photographs and programs from the opening of the University in 1961, the display included a mug made by Audrey Matheson, the wife of the first Vice-Chancellor Sir Louis Matheson, from the clay dug up when building began at Clayton, and the French champagne bottle used at the opening ceremony and signed by the official party.

**Contribute to the University’s information management strategy**

Significant progress was made towards positioning the University to manage its research data more effectively. A Data Management Coordinator position was created and filled. The DARE project has been established to enable a team of librarians to perform a range of outreach tasks to help researchers improve data management.

In November the Library hosted a seminar at which speakers from the Library, the Monash e-Research Centre and other areas of the University outlined policy developments, and the tools and services that are available to help researchers manage their data more effectively. Presentations also covered the Library’s increasing efforts to provide advice and information to researchers at the planning stage of their projects.

As part of the succession planning associated with the completion of the ARROW, ARCHER and DART projects, a number of tools and ongoing strategies were transferred to other service units across the University and the ANDS project, where they will be deployed, maintained or developed as required.
Goal 2: Information Services

To enable the Monash community to discover and use resources for learning, teaching and research, and to support staff and students’ development of skills for independent and lifelong learning through mediated, timely and flexible information services.

Provide coordinated, proactive services under the ‘one library’ banner while still meeting individual campus and faculty needs

The one library theme is pervasive across the Library’s planning and operation.

A review commenced to identify and implement a user-centred physical and virtual service points model. The project seeks to establish management and service principles, and to create a student centred approach to service delivery regardless of location. The project will continue in 2009.

A review of Client Services committees was established to facilitate Library wide communication and management of changing service requirements. Recommendations will be made in 2009.

ask.monash continues to develop, with the addition of learning skills, to the service. The recommendations from the 2007 review of ask.monash are being addressed.

Engage and liaise with faculty members and students about the development and use of services and collections

Following a series of issue-related meetings between the Library and Monash Research Graduate School, a formal meeting schedule has been established to commence in 2009. Topics discussed in 2008 included data management, electronic thesis submission (e-thesis) implementation and Library access for Higher Degree by Research students.

A student forum including the Library, Information Technology Services and student representatives was established to improve communication and awareness of services. This group is to meet twice a year.

The user-driven process for the selection of electronic books triggered the purchase of more than 4000 titles in 2008. This demonstrated a high level of user engagement and demand for electronic books, even where these were also available in print.

In partnership with the Faculty of Education, the Library established a Teaching Materials Collection at the Matheson Library, comprising resources relocated from the Faculty at Clayton. These resources support the professional placement and lesson planning needs of students, and will be further developed in conjunction with similar collections at the Gippsland and Peninsula libraries.

In collaboration with academics from Aerospace Engineering, the Library purchased access to the journals and conference papers of the American Institute of Aeronautics and Astronautics (AIAA). Demand for these resources had been increasing as a result of growth in Aerospace Engineering.

The Victorian Department of Infrastructure donated 270 items relating to Gippsland to the Library. Many of these are no longer available and will greatly enhance the Gippsland-specific resources held by the Library and the Centre for Gippsland Studies.

The LibGuides project was initiated to increase the accessibility of Library resources. During 2008, Library staff worked in partnership with academic staff to convert and revise web site subject page information on Film and Television, Occupational Therapy and Architecture into the more contemporary format. Work on this project is continuing.

The Arts Faculty Team presented at the weekly Geography and Environmental Science Research Seminar series for academic staff and research students and made regular contributions to the School of Music’s fortnightly newsletter Dually Noted.
The Art and Design Faculty Team presented to three Faculty departments on Library resources and services, resulting in increased collaborative development of the collection and engagement in its use by academic staff. A member of the Faculty of Art and Design also provided valuable input to Faculty Team meetings during the year.

The Gippsland Library established the ‘Conversations with the academics’ series of informal meetings to engage with academics on particular services and resources.

A librarian and a learning skills adviser participated in the Faculty of Medicine, Nursing and Health Sciences planning retreat. This resulted in the Library contributing to the review of the Theme II Bachelor of Medicine and Bachelor of Surgery and presenting on electronic resources to the Faculty’s Curriculum Committee.

**Develop academic staff and students’ information literacy**

An Information Literacy Librarian was appointed, providing much needed leadership following an extended vacancy. This position works closely with the Learning Skills Manager to consolidate and integrate information literacy and learning skills into curricula. Two information days provided forums for librarians and learning skills advisers to share skills, knowledge and experiences.

At the recommendation of librarians, user focus groups were held and other stakeholders consulted to develop a preferred name for external communication regarding information literacy. The new name ‘Information Research Skills’ was launched mid year.

An Information Research Skills web page was developed, complementing the Learning Skills web page.

Interim modifications to the Library’s information literacy and learning skills evaluation processes were made, in anticipation of further work in this area with the appointment of the Information Literacy Librarian and Learning Skills Manager.

Increasingly, information research skills programs are being developed and implemented jointly with learning skills programs and embedded into curricula at both undergraduate and postgraduate levels. The revised first year Bachelor of Business curriculum was implemented at Caulfield campus, in which information research and learning skills are embedded. The Matheson Business and Economics librarian and learning skills adviser taught information research and learning skills in the first year marketing program at Clayton. The Faculty of Law Research and Writing Unit was finalised and implemented in semester two, with librarians and learning skills advisers teaching into the unit. A program for honours students in the Faculty of Art and Design was developed and implemented by a librarian and learning skills adviser at the Caulfield Library. Information research skills were embedded in the Archaeology course at Clayton and Caulfield and learning skills into the first year Biological Sciences unit at Clayton.

**Improve help services**

The project to review service points commenced late in 2008 with the appointment of a project manager and project team representing all areas of client services. Following an extensive literature review and data gathering, principles were established and working groups identified. Enabling technologies are being examined and the functional relationships between service points will be mapped by these working groups. Recommendations and an implementation plan will be developed in 2009.
Outcomes of the 2006 Review of Library Self-Help Publications included a review of database quick start guides, which resulted in a web gallery of updated and simplified guides for users. This and the accompanying printed guides will be evaluated in first semester 2009. Several recommendations were identified for further action through the Resource Discovery Project. Online chat and telephone help were operationalised and the hours of both services were extended as a result. The future development of these services will be addressed as part of the service points review.

A post implementation review of ask.monash was completed in late 2007. In response to the review targeted and improved frequently asked questions (FAQ) were developed, reducing the number of queries submitted and improving the number of FAQs viewed. Roles and responsibilities were clarified and all library generic email addresses were reviewed resulting in a number of generic email addresses being removed.

**Promote the research strengths of the collection**

Primary University-wide communication tools include Library News on the website and the General Library Committee. The Library’s Faculty Teams work in collaboration with faculties to build and promote research collections. Faculty Team Leaders are members of Faculty Boards and regularly present on topics of interest, including research collection developments. Contact librarians are also members of a range of other faculty committees, and contribute acquisitions content to Faculty newsletters.

**Work with faculties to provide support for teaching and research activities**

The Education and Research Support Plans provided a framework and focus for the Library’s initiatives in these areas at a greater level of detail than the Strategic Plan. The Plans have been implemented across the Library and their role will be reviewed in 2009.
Goal 3: Learning Skills

To develop students’ core academic skills for independent and lifelong learning through a coordinated range of high quality, timely, responsive and cost-effective learning support services.

Position learning skills services within the Library’s organisational and budgetary structures

Learning skills advisers are located in all branches and are co-located with librarians in Faculty Teams. During 2008 a Learning Skills Manager was appointed and the team grew to comprise 20 advisers by the end of 2008. Consolidation of the learning skills budgetary structure took place in line with the Library’s overall budgetary framework.

Develop, implement, evaluate and review learning skills programs

A broad range of embedded, integrated and stand-alone programs were developed and implemented, as reported in Goal 2 above. The 2008 Key Performance Indicators report for learning skills details programs in 16 units and several faculties. A number of programs were developed in partnership with the Monash Postgraduate Association and Monash Research Graduate School, the latter as part of the exPERT seminars. Work commenced to embed and integrate skills development into the revised Pharmacy undergraduate curriculum from 2009.

The scheduled review of learning skills commenced in December 2008. The review aims to determine whether faculty and student needs are being met and provides an opportunity for stakeholder input into future directions.

An investigation of electronic (primarily software) resources to support learning skills and language development commenced, and recommendations for purchase in 2009 will be made.

Advance a service model that is aligned with and builds upon the concept of the learning commons and the Library’s information literacy programs, to deliver high quality, coordinated services

Following the success of co-location of learning skills advisers and librarians in branches, planning for further integration into Faculty Team groups was undertaken. Terms of reference were developed for Faculty Teams to facilitate the integration and collaboration of learning skills and librarians.

Develop a distributed staffing structure that facilitates the operation of an efficient, cost effective and responsive learning skills service

Recruitment of 20 learning skills staff in all branches and in all faculty teams has been a major milestone in the establishment of the Learning Skills Unit. Following the development of terms of reference, Learning Skills staff participated in Faculty Team meetings.

Manage faculty expectations and provide a well communicated service offer

A revised suite of publications incorporating learning skills was produced for 2008. A group of learning skills advisers worked with the Library’s web team to revise the learning skills web page. Library News items and web page features on learning skills were also developed and run throughout the year.
Goal 4: Lending Services

To support teaching, learning and research by making course-related and research collections readily available for undergraduate and postgraduate students and staff.

Provide loans services from any branch of Monash University Library

Lending Services continued to provide materials as detailed in Appendix 1. The following initiatives commenced in 2008:

- In response to the new Monash Passport, loan privileges for honours and postgraduate coursework students were increased to align with those for higher degree research students and staff.
- A trial return system at the City Law Chambers was implemented in collaboration with the Faculty. The system was later approved as an ongoing service.
- The shelf life for holds was extended to seven days, leading to more items being collected by users. The practice of collecting holds from users’ home libraries was discontinued in order to reduce staff workload and to increase open access shelf life.
- The Pharmacy Library trialled open access holds, allowing students to collect items they have requested from other branches from an open area of the Library. The implementation of open or browsable holds arrangements is being considered at other branches.
- Loan access to off site storage material was extended to include alumni and CAVAL borrowers.
- DVD security tagging was implemented in all branches. This system allows DVDs to be stored securely on open shelves and provides consistency in storage and retrieval across branches.
- Changes in housing and access for materials on hold and reserves, for example, achieves important benefits of enabling users to browse the materials at the same time as reducing manual handling tasks for Library attendants.

Open reserve systems were successfully implemented in the Pharmacy Library and trialled at the Gippsland Library. This initiative will be extended to other branches.

Readings and Reserve Services Review

The Readings and Reserve Service is heavily used by academics and students. The service was developed over a number of years and had become very resource intensive and complex, involving a variety of software, systems and processes. An extensive review resulted in more uniform and streamlined processes and the recommendation to acquire a new platform for improved electronic reading list management. The new software was approved for implementation in 2009.

Facilitate access to other libraries’ collections

Through the CAVAL Reciprocal Borrowing Program staff and students from Monash University borrowed 21,593 items from 28 other Victorian academic libraries, a decrease of 14% against the 2007 data. Introduction of a fee to help recover costs of loans for staff and students using the University Libraries Australia (ULA) national borrowing scheme resulted in a reduction in the use of this service in 2008.
Obtain materials from other libraries for postgraduate students and staff

Providing rapid delivery of material from other libraries and commercial suppliers remains an integral part of research support to Monash staff and postgraduate students.

During the year 23,130 document delivery requests were received from Monash staff and students, of which 12,669 were processed. An additional 8,116 items were supplied to other libraries. This continues an ongoing trend of a gradual decline in requests (5-8%), partially due to increasing availability of digital book and journal collections. The fill rate of 90% is the same as 2007 and turnaround times for books (6.9 days) and copies (3.69 days) compare favourably to 2007.

Following the decision to replace the CLIO Inter-Library Loan Management system, Relais was selected as a cost effective system that is being increasingly adopted by university and government organisations within Australia. It will be implemented in 2009.
Goal 5: Physical Environment

To enrich the total study and campus experience through provision of innovative and welcoming facilities that both stimulate learning and respond to study and research needs

Five of the Library’s ten branches are new or have now been refurbished, including the refurbished CL Butchers Pharmacy Library, which was opened on 1 December 2008. The two largest branches, Matheson and Caulfield, have not yet been refurbished. Planning has commenced to consider the costs and implications of expanding the Caulfield Library. A bid to expand the Matheson Library and develop its role has been made to the Commonwealth Government’s Education Investment Fund.

Planning for a new Law Library at the Caulfield campus commenced, as it is envisaged that the Law Faculty will move to the Caulfield campus in 2012.

Provide study spaces which meet the differing needs of users for group and individual study

Following a review of the Facilities Master Plan (FMP), an audit of all branch libraries was undertaken. Wherever possible the recommendations of the review have been implemented, including revamping library entrances to achieve consistency and adopting elements of learning commons in each branch.

Provide reliable high quality physical libraries, technology and workstations

Following a review of all training and meeting rooms, facilities were upgraded to include new data projectors and smart boards. Flexible furniture was also installed to extend the functionality of the rooms. Videoconference facilities have been installed for staff at the Matheson and Caulfield Libraries and a portable unit is being used by staff in Gippsland until new facilities can be installed as part of the learning space developments at that branch. Web cam facilities and interactive communication software are being included as part of the upgrade of staff computers, as appropriate.

A number of software applications were installed, including Second Life, on all student-use computers in response to a request from the Faculty of Pharmacy and Pharmaceutical Sciences to use Second Life for teaching purposes. The rollout of Lotus Notes to all staff computers in the Library was completed over several months.

Over 67 power points were installed on new work stations at the Caulfield Library and further power points were installed at other branch libraries in response to the increased usage of laptops.

In conjunction with learning skills establishment in the Library, staff accommodation has been reviewed in all branches. Work has been undertaken to reconfigure this accommodation at several branches. Work at other branches will be undertaken during 2009.

Signage was reviewed at all branch libraries and changes were identified and made.

Pharmacy Library reopens

The CL Butchers Pharmacy Library moved back to its permanent home in the Manning Building on the Parkville campus and the temporary site at 407 Royal Parade was closed. The refurbished library provides a better, more convenient facility for users and is almost double the size it was formerly; it now occupies the majority of the ground floor of the Manning Building. The library has been designed to be technologically enabled, more
adaptable to changing study styles, easier to navigate and modern in appearance and function. Staff from the Monash University Museum of Art created a display at the entrance using pharmacy artifacts made available by Pharmaceutical Defence Limited. The Museum also provided and installed artworks from the University collection in the Library to enhance the cultural experience of library users.

Journals that were held off-site during the refurbishment have been returned to the library. A group study area has been equipped with a smart board and serves as a flexible learning space. A training room is available for students’ use when it is not being used for classes or workshops.

Innovative learning space development

The Library received more than $300,000 from the Learning Spaces Taskforce to develop open and group-based collaboration spaces in the Gippsland Library. This will enable learning and information research skills to be taught in an innovative and technologically enriched environment, as well as providing an area for students to undertake collaborative learning. Together with comprehensive wireless connectivity being rolled out at Gippsland, this will significantly improve on-campus learning and collaboration facilities for students. Library staff prepared for the renovations by relocating serials and reviewing holdings. The design of the new learning space was endorsed in late 2008 and will be completed in 2009. This initiative is an example of the growing collaboration between the Library and the e-Education Centre.

Provide a secure and safe environment

Security

The Library’s security and sound systems were reviewed. As a result, a professionally developed and consistent sound recording for the closing message was created for all of the branch libraries.

Safety

The Library met all of the occupational health and safety criteria in 2008 and according to reports received from the University’s Occupational Health and Safety Unit, has made considerable improvements since 2005 in reducing injuries and compensation claims and increasing the rate of hazard reporting. The number of incidents has decreased from 28 in 2005 to 16 in 2008 and hazards reported has increased from four in 2005 to 31 in 2008. The increase in hazard reporting enables action before an injury or an incident results. As a result of Library OHS initiatives, Workcover claims have decreased from six in 2006 to zero in 2008.

Provide facilities for people with special needs

Services provided by the Library for patrons with disabilities include retrieval of items from the collections, arranging inter-campus and inter-library loans, and providing personal assistance with the use of assistive technologies available at seven of the eight branch libraries. A resting room service is provided in the Sir Louis Matheson Library. The use and appropriateness of these facilities are monitored by each branch’s Disability Contact Officer.

Provide responsive hours of opening

Extended evening hours were trialled at the Peninsula Library, opening until 9 pm on Monday to Thursday for the two weeks immediately before the exams.

The Library continues to receive requests for longer opening hours at all campuses and will again review opening hours in 2009.

House the collection to standards that ensure preservation of resources for long-term research value

Sir Louis Matheson Collection Refurbishment Project

The focus of this project in 2008 has been the main and reference collections, Matheson Store and Music and Multimedia kits. Books and Elsevier and Springer serial abstracts and bibliographies have been sent to the offsite store, criteria have been developed for relocation of kit materials and weeding and relocation of the reference collection is proceeding ahead of weeding in selected Dewey ranges of the main collection.
Goal 6: Quality Management

To ensure that the Library meets or exceeds the requirements and standards of best practice in the Australian university sector.

Provide a planning and continuing improvement framework for activities and services

The Library actively contributes data to a range of University, national and international surveys. The Monash University experience surveys and the Council of Australian University Librarians user surveys provide valuable, objective measures of Library users’ perception of the facilities and services offered.

The Library’s risk and compliance register is updated and completed quarterly.

Current Service Level Agreements and Key Performance Indicators are in place. These are reported regularly to the General Library Committee and made available on the public Library website. Learning services was included in the Library’s service level reports for the first time in 2008.

Monash Experience Questionnaire

The Monash Experience Questionnaire, the University’s major survey, asks students about all academic aspects of University life. Students are asked to rate several items that relate to the Library in a section headed Student support/resources. Students reported positively on all items in this section and 70.8% were satisfied with student support/resources in general. As can be seen from the graph, the Library’s results are very positive and have been gradually improving since 2003.

Provide an energised, innovative work environment

Values and behaviours

As part of a staff development initiative, all Monash University Library staff participated in the development of values and behaviours statements to improve the work environment. Four core values were identified: Service, Excellence, Cooperation and Integrity. Under each of the values a number of elaborating behaviours were identified.

Continue to improve Library marketing and communications programs

Communications Framework development

A communications framework for the Library was endorsed to provide guidance to staff regarding methods of communication and effective communication channels within the University.

The use of electronic noticeboards in each branch was reviewed and the images improved to ensure that accessible, consistent information is communicated to users. A survey revealed a high level of acceptance of the range and content of the slides.
The suite of publications, in particular the library user’s guide (z card) and toolkit provided to users, was reviewed. This revealed that users preferred more targeted content and distribution rather than one publication that covered all aspects of the Library’s services. As a result the format and content of a number of the publications has been updated.

Effective staff performance and development program

In addition to the two major initiatives described below, a range of developments took place in 2008:

- Performance planning training was offered to supervisors.
- A number of team building workshops were organised.
- Participation was sought in working groups developing learning spaces.
- The Library’s Staff Development funding model was reviewed and funds were distributed according to the new model.

Conference attendance

To ensure fair and equitable access to work-related conferences, new guidelines were developed to clarify the requirements and selection process for staff to attend. Within this framework, a conference attendance selection committee was formed and all applications for conference attendance are now evaluated by the committee.

Management Skills Development

A management and leadership program was implemented, with two staff participating in 2008. The program consists of several streams: formal management skills training, participation in recruitment and selection activities, exposure to human resource issues, Library project activities and shadowing of HEW 7/8/9 coordinators and managers.

Lead and support the creative management of the university’s scholarly information

e-theses

The University’s requirement for theses to be submitted electronically was formalised in 2008 for implementation from 2009. Electronic publication of theses will allow the University to make its research output more widely available. Communication of the new requirement to staff and students was identified as a priority and to this end, the Library worked with the Monash Research Graduate School to develop information for the web site and training materials. New procedures and workflows for e-thesis submission were also developed.

Copyright

The University Copyright Officer is based in the Library and performs advisory, consultative and educational roles on Library projects and across the University. The copyright risk profile has been reviewed and updated, with key actions concentrating on communication and training. The Library induction program for new staff has been reviewed and now includes a component on copyright. The Copyright Advisory Group (CoAG) developed the Copyright Compliance Policy, which was endorsed by the University’s Strategy and Resources Committee. Targeted training for sessional staff and higher degree students and their supervisors was introduced. The Copyright website was updated to include information for new postgraduate students completing their PhD submissions and new FAQ’s were developed for readings and reserve staff. The Library Electronic Resources Misuse policy and procedures were tabled and endorsed by CoAG. The Library’s Terms and conditions of use page, relating to the use of Information Technology resources, was reviewed at CoAG and recommended changes were made to the website.
Goal 7: Partnerships

To align with the University’s defining themes of innovation, engagement, internationalisation and global development to support the wider Monash community. Improve services through co-operative arrangements with CAUL, CAVAL, ARLAC, AARLIN and the University of Melbourne/Monash protocol and build on these relationships for the benefit of all Australian libraries, including achieving greater buying power.

Support international campuses and partnerships

A review of monograph supply for Monash Sunway and Monash South Africa was conducted and the findings have been communicated to these libraries. Advice was provided on collection development and planning for future space requirements. Lending services policies were reviewed and both Sunway and South Africa supported the Monash Passport by improving loans to higher degree by research students.

Monash South Africa

Cathrine Harboe-Ree and Janette Burke visited the Monash South Africa campus in May. The main purpose of the visit was to meet the new Campus Librarian and to assess the effectiveness and operation of the newly established Library and Learning Commons, particularly from the point of view of the implementation of the Monash University Library Facilities Master Plan. This visit also provided an opportunity to meet new library staff. Cathrine presented a paper at a data management conference in Pretoria and both Cathrine and Janette visited a number of universities in Cape Town to strengthen links with Monash South Africa.

In late November the Campus Librarian and newly appointed Learning Skills Adviser from South Africa visited Australia.

Monash Sunway

A Service Level Agreement has been drafted between the Sunway and Australian libraries. Input and advice was provided in the development of the Service Level Agreement between the Library and faculties at the Sunway campus.

Lisa Smith and Leanne McCann undertook a Learning Skills Review visit to Malaysia in May 2008. The final report was presented to the Sunway campus Education Committee for consideration. Siaw-Wan Chong, the AARLIN Officer from the Information Resources Division, visited Sunway Library and Learning Commons in June 2008. As requested she provided training on introduction to reference services with emphasis on off-desk reference services, Monash electronic resources and databases, and hands-on use of MultiSearch and SFX.

Hong Bernard, Contact Librarian from the CL Butchers Pharmacy Library, visited Sunway Library and Learning Commons in late 2008 to provide training on the use of electronic alerts and dissemination of new titles.
Staff from the Information Services and Information Resources Divisions contributed to the development of a training program in reference and acquisitions for the Sunway Library and Learning Commons staff. Staff mobility requests were submitted for visits to and from the two overseas campuses in 2009.

**Provide services as appropriate to Monash partner organisations and commercial operations on campus**

**External Client Services**

The External Client Services Unit (ECS) provides a service to members of the public who do not qualify as the Library's primary clientele, that is, Monash enrolled students and staff on the Monash payroll. Since its inception ECS has provided a centralised, coordinated and standardised delivery of service to external clients. ECS processed 528 memberships in 2008, with 492 of those being alumni memberships. The demand for ECS in the business world is decreasing, particularly for document delivery and in-depth research. A marketing campaign will be undertaken in early 2009 to determine whether there are any business opportunities remaining. The provision of virtual library services to hospitals and health institutions is a possible area of growth and will be further investigated, while existing arrangements with Bethlehem Hospital and the Cancer Council will continue to be monitored.

**Monash College**

In 2007 a service level agreement was drawn up between the Library and Monash College outlining a range of services to be provided. This included borrowing privileges (in line with Monash University undergraduates), the provision of reading lists and library classes covering how to use the catalogue, website and databases. Late in 2007 Monash College wanted the library programs to be more embedded into the curricula, like those on offer to undergraduates. In 2008 an increased number of subject classes including psychology, nursing, business and economics, were offered across all campuses. The External Client Services Unit enlisted the help of contact librarians at Peninsula, Caulfield and Hargrave-Andrew to be able to meet the demand from Monash College.

**Hospitals**

Provision of library services for staff and students of the Faculty of Medicine, Nursing and Health Sciences continues to be one of the more complicated challenges for the Library as the numbers of students and clinical placement locations continue to increase.

The Library selects and promotes electronic resources including e-books when available. All electronic information purchased by the Library is available to staff and students at all locations, including overseas campuses and clinical schools. This is particularly important in supporting the increasing demands of students on placement while financial support for hospital libraries from the Commonwealth Teaching Hospitals Grant continues to decline.

In 2008 the Library acquired 1,208 items and some print journals to support Monash students at teaching hospitals and spent more than $260,000 on material for hospital libraries. The Hargrave Andrew Library processed 1,198 items previously purchased for hospital libraries that were no longer required. From these, 42 items were sent to the Gippsland collection and 343 items were donated through the Southern Health Library for libraries in developing countries.

2008 was the first year of the graduate entry Bachelor of Medicine, Bachelor of Surgery degree at Gippsland, with students regularly attending placement locations during the year. The Faculty contact librarian at the Peninsula Library participated in the Frankston Hospital welcome for Gippsland Medical School students who will commence there in 2009.
To facilitate the coordination of library services provided by the hospital libraries, the Director Client Services, Science Health and Engineering convenes the Hospital Librarians Committee, which meets three times per year. At one meeting, the Associate Dean (Teaching Hospitals) Faculty of Medicine, Nursing and Health Sciences discussed the strategic development of the faculty and hospital relationship. The Monash University Library's role in research data management was also presented at one of the meetings. Monash University Library librarians represent the University on hospital library committees such as:

- The Southern Health library Network Committee
- The Ian Potter Advisory Committee
- The Ian Potter Management Committee.

Support alumni access to Monash resources

The alumni membership structure was reviewed in late 2007 and as a result Alumni memberships were broken down into a number of categories; access to print resources, access to electronic resources, or a combination of both. The range of resources available for alumni was expanded to include ScienceDirect and Scopus. Alumni memberships with access to print resources became available at Sunway and South Africa.

Students at the new Monash South Africa Library and Learning Commons

Appendix 4: Selected Publications, Presentations and Memberships

Publications

Presentations:

Suzanne Clarke

Cathrine Harboe-Ree
- Data management and the curation continuum.’ VALA Conference, Melbourne, February 2008.

Simon Huggard
- ‘Link Checking outside of Voyager’ - presentation at ANZREG meeting, RMIT, 8 February 2008.
- ‘IGeLU User group update’ - presentation at ANZREG meeting, RMIT, 8 February 2008.
- ‘Collaborative testing experiences (with Voyager)’ - presentation at IGeLU conference, Madrid, Spain, 10 Sept 2008.
Aline Scott-Maxwell
- ‘From San Remo to the Antipodes: Singing, Song-writing and the Italian Song Festival tradition in Australia’, International Association for the Study of Popular Music, Australia-New Zealand Branch Conference, Griffith University, Brisbane, Nov. 2008.

Richard Overell
- 4th Australian and New Zealand Rare Book Summer School, February 2008.

Memberships:

Janette Burke
- CAVAL Board.
- CAVAL Products and Services SubCommittee.

Sian Wan Chong
- Member, AARLIN Review Group.

Suzanne Clarke
- Member, G07 Last Copy Working Party.
- Convenor, ARLAC (Academic and Research Libraries Acquisition Consortium).
- Member, AARLIN (Australian Academic Research Libraries Information Network) Management Committee.
- Member, ALIM (Asian Research Libraries in Melbourne) Management Committee.
- Member, Nereus Steering Committee.

Cathrine Harboe-Ree
- Member, Australian Academic and Research Libraries Editorial Board.
- Member, Australian eResearch Infrastructure Council (AeRIc).
- Member, Australian National Data Service (ANDS) Steering Committee.
- Chair, Australian Research Repositories Online to the World (ARROW) Management Committee.
- Faculty member, CAUDIT/Educause Institute.
- Deputy President, Council of Australian University Librarians (CAUL) – retired September 2008.
- Member, Program Committee, Global Research Library 2020.
- Member, Victorian University Librarians’ Group.

Andrew Harrison
- Chair, ARROW Managers Repositories Group (until mid 2008).

Simon Huggard
- Deputy Chair, ANZREG (Australia & New Zealand Regional Enduser Group, part of the International Group of Ex Libris Users).

Caroline Knaggs
- Member, ALIA Pathways (Information Literacy) Committee.

Donna Runner
- Member, CAVAL Digital Interest Group.

Robert Stafford
- CARM Advisory Committee.
Kay Tucker
- Editorial Board - *Australian Law Librarian*.

Jenny Warren
- Member, Libraries Australia Victorian User Group.
- Member, Libraries Australia Cataloguing Interest Group Subcommittee.
Appendix 5: Library committees

General Library Committee

General Library Committee met four times in 2008. The committee provides a forum for advice and guidance to the University Librarian on the strategic operation and direction of the Library and acts as an advisory committee to the Academic Board.

Presentations featured in the year’s meetings included the Library’s leadership role in data management at Monash, continuing progress in the development of the Learning Skills initiative and linking to Library resources from Google Scholar. The Committee also endorsed the Library’s 2007 annual report and the strategic plan for 2009-2011. A new initiative arising out of General Library Committee’s discussions was a Student Forum hosted jointly by the Library and Information Technology Services.

General Library Committee membership 2008

Professor John Sheridan – Chair appointed by Academic Board
Professor Adam Shoemaker – Vice-Chancellor’s nominee
Mr George Ou – Vice-President (Finance) nominee
Professor Sid Nair – Academic Board
Professor Rae Frances – Strategy and Resources Committee
Professor Max King – Office of the Deputy Vice-Chancellor (Research) – coopted
Ms Margo Hellyer – Information Technology Services – coopted
Ms Lorraine Bennett – Centre for the Advancement of Learning and Teaching – coopted
Dr Luke Morgan – Faculty of Art and Design
Professor Barbara Caine – Faculty of Arts
Professor Julian Teicher – Faculty of Business and Economics
Dr Graham Parr – Faculty of Education
Professor Wayne Cook – Faculty of Engineering
Dr Larry Stillman – Faculty of Information Technology
Ms Susan Barkehall-Thomas – Faculty of Law
Associate Professor Julia Choate – Faculty of Medicine (A/Professor Ramesh Rajan deputised for meetings 1/08, 2/08 and 3/08)
Associate Professor Louis Roller – Faculty of Pharmacy and Pharmaceutical Science
Dr Dennis O’Dowd – Faculty of Science
Mr Matthew Ericson – Monash Postgraduate Association
Ms Alexandra Phelan – Monash Student Association
Ms Dash Jayasuriya – Monash Student Association
Mr Joe Choy – Monash University Student Union (MONSU) Caulfield
Ms Cathrine Harboe-Ree – University Librarian – ex officio
Ms Janette Burke – Director, Central Services – ex officio
Ms Sue Clarke – Director, Information Resources – ex officio
Ms Wilna Macmillan – Director, Client Services, Science, Health and Engineering – ex officio
Ms Lisa Smith – Director, Client Services, Humanities and Social Sciences – ex officio
