

ENHANCE YOUR SKILLS AS FUTURE CLINICIANS WITH OUR MED5101 SCHOLARLY INTENSIVE PLACEMENTS (SIP)

At School of Clinical Sciences at Monash Health (SCS), a range of exciting research, educational and professional placement options are on offer.

Our projects will include:

- Paediatric ED, with a range of potential projects, such as clinical care audits, clinical research and patient surveys (social determinants of health, fever management etc)
- Clinical trials in osteoporosis and MSS health with a highly experienced research team
- ID and immunisation projects
- Systematic review projects contributing to larger research projects, in exciting areas as neurodevelopmental disorders
- A number of potential paediatric population projects
- Sexual health research
- Numerous exciting opportunities with the EMR team, exploring data extraction and analysis, which may significantly alter management and outcomes for patients at Monash Health
- Educational research opportunities, with involvement in the Undergraduate Medical Education program, helping address areas of need to improve medical student teaching and learning.
- Highly specialised professional practice placements, where you will have both clinical exposure to areas of interest, as well as the opportunity to formulate a research question to address an area of need in the field.

Students placed at SCS will be able to view possible project topics or professional practice placements available at all times through our “live” SIP website. Preferences will open between 2-6 weeks prior to the start of the rotation, depending on the rotation.
