

BACHELOR OF ARCHITECTURAL STUDIES

The world is urbanising at a rapid pace and there is an increasing industry demand for architectural experts who can bring a multidimensional approach to a project. By combining the Bachelor of Architectural Studies in one of our unique double degree combinations, you'll gain the skills to think in future-oriented ways and the confidence to engage with and respond to the challenges of our time, such as climate change and equitable access to housing.

ARCHITECTURAL STUDIES DOUBLE DEGREES

+ BACHELOR OF BUSINESS

ALL SPECIALISATIONS

Whether you aim to run your own architectural firm, manage building projects within other organisations, or develop projects yourself, this degree combination will give you the tools and expertise to understand the complexity of business within an architectural context.

+ BACHELOR OF DESIGN

COMMUNICATION, COLLABORATIVE OR INDUSTRIAL SPECIALISATIONS

Become an expert in systems for building prefabrication, co-design for creating places and people, or work in systems and service design. Whatever your career aspirations, combining these two degrees will amplify and extend your design approaches and skills to set you apart from the competition.

+ BACHELOR OF FINE ART

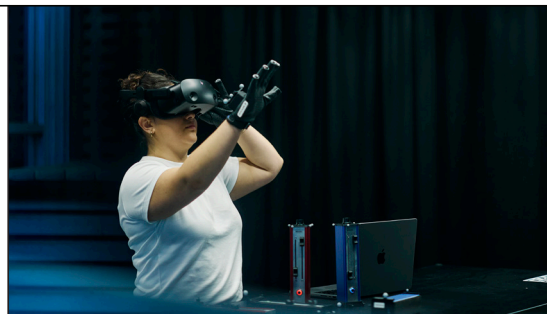

Whether you want to deepen your material knowledge as an architect or want to understand the place and structures of art within the built environment, this program will help you develop a unique skill set and creative outlook to approach architecture through an artistic lens or vice versa.

+ BACHELOR OF INFORMATION TECHNOLOGY

ALL SPECIALISATIONS

Put yourself ahead of the competition by advancing your understanding and aptitude in this exciting area of architecture. Whether your interest lies in developing apps, worlds for games design, using big data for urban modelling or building information management (BIM), this double degree will set you up for career success.

BECOME AN ARCHITECT

On successful completion of the **Bachelor of Architectural Studies double degree** program, you're guaranteed a spot in our accredited **Master of Architecture**; meaning you'll be able to continue your studies with the ongoing support of your peers and the creative community at Monash.

Our Master of Architecture is accredited by the Architects Accreditation Council of Australia (AACA) and the Commonwealth Association of Architects (CAA), which sets you up to meet the academic requirements to become a registered architect.

STUDIO-BASED LEARNING

More than half of your architecture studies will be spent in the studio guided by industry experts and academics. You'll work on **real projects in a small-class environment** to develop responses to a wide range of social and spatial issues. You will get **hands-on, practical learning** in an environment that replicates the way many architectural and design practices operate, preparing you for your career after you graduate.

“ MARCELLA PALMA

HEAD OF OPERATIONS, GOODBYE GAS

“Most architects starting in the profession don't have experience in business and have to learn as they go. My architecture skills helped me design the delivery model for Goodbye Gas, but knowing the fundamentals of how a business operates would have been invaluable, especially early on. If I could go back and study Architecture with Business, I would.”
