

BACHELOR OF ARCHITECTURAL STUDIES

The world is urbanising at a rapid pace and there is an increasing industry demand for architectural experts who can bring a multidimensional approach to a project. By combining the **Bachelor of Architectural Studies** with one of our unique **double degree combinations**, you will gain the skills to think in future-oriented ways and the confidence to engage with and respond to the challenges of our time, such as climate change and equitable access to housing.

ARCHITECTURAL STUDIES DOUBLE DEGREES

+ BACHELOR OF FINE ART

Whether you want to deepen your material knowledge as an architect or want to understand the place and structures of art within the built environment, a double with a **Bachelor of Fine Art** will help you develop a unique skill set and creative outlook to approach architecture through an artistic lens or vice versa.

+ BACHELOR OF DESIGN

COMMUNICATION OR INDUSTRIAL SPECIALISATIONS

Become an expert in systems for building prefabrication, co-design for creating places and people, or work in systems and service design. No matter your career aspirations, combining architectural studies with a **Bachelor of Design** will amplify and extend your design approaches and skills to set you apart from competition.

+ BACHELOR OF BUSINESS

Whether you plan to run your own practice, lead large-scale projects, drive property development, or bring an architectural perspective to the corporate world, pairing your architectural studies with a **Bachelor of Business** gives you the skills and commercial acumen to navigate the business of architecture.

+ BACHELOR OF GLOBAL STUDIES

Coupling your architectural studies with a **Bachelor of Global Studies** equips you to engage with the cultural and geopolitical forces shaping the built environment. Whether you work across international markets or address the global challenges of urbanisation and sustainability, this combination provides the perspective to design and lead with a global outlook.

+ BACHELOR OF INFORMATION TECHNOLOGY

Put yourself ahead of the competition by advancing your understanding and aptitude in this exciting area of architectural studies and a **Bachelor of Information Technology**. Whether your interest lies in developing apps, worlds for games design, using big data for urban modelling or building information management (BIM), this double degree will set you up for career success.

+ BACHELOR OF LAWS (HONOURS)

Pair your architectural studies with a **Bachelor of Laws (Honours)** and develop the expertise to operate at the intersection of both. You will build the knowledge to specialise in construction law, negotiate complex contracts, and advocate on planning and development disputes, putting you in a powerful position wherever design and the law meet.

CRICOS code: 117721F

COMPLETE YOUR PATHWAY WITH:

MASTER OF ARCHITECTURE

or

MASTER OF URBAN PLANNING AND DESIGN

BECOME AN ARCHITECT

On successful completion of the **Bachelor of Architectural Studies double degree** program, you can continue on your journey with us to becoming a registered architect with a **guaranteed place** in our two year **Master of Architecture**, which is accredited with the Architects Accreditation Council of Australia (AACA), as well as the Commonwealth Association of Architects (CAA), and recognised by the Board of Architects Malaysia (Lembaga Arkitek Malaysia - LAM).

STUDIO-BASED LEARNING

More than half of your architecture studies will be spent in the studio guided by industry experts and academics. You will work on **real projects in a small-class environment** to develop responses to a wide range of social and spatial issues. It will give you **hands-on, practical learning** in an environment that replicates the way many architectural and design practices operate, preparing you for your career after you graduate.

“

MARCELLA PALMA

HEAD OF OPERATIONS, GOODBYE GAS

“Most architects starting in the profession don’t have experience in business and have to learn as they go. My architecture skills helped me design the delivery model for Goodbye Gas, but knowing the fundamentals of how a business operates would have been invaluable, especially early on. If I could go back and study Architecture with Business, I would.”
