

PROUD OPERATOR OF

# Shaping the Future of Railway

Rob Robson - Executive Director, Technical Delivery

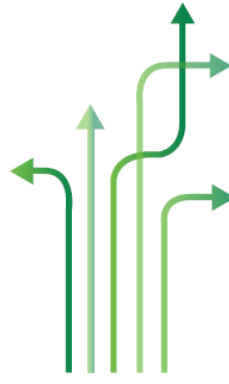

# Yarra Trams' network is the largest in the world

The world's largest operational tram network, with **250km** of double track

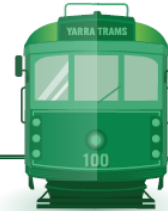

**200+**  
**million trips**  
completed annually

**5000**  
services per day

Operating for over **100 years**

**75%**  
of the network  
is shared

**24 hour**  
operation

**475+**  
trams

**2000+**  
employees

**1,750**  
stops

**9** depots

It is irreplaceable

**It would cost \$20 billion today to  
rebuild Melbourne's tram network**

# Our city is growing

Melbourne's population is expected to increase from 4.4 million to 7.7 million by 2051

By 2036 the over 65s will represent **21.6%** of Victoria's population compared with 13.3% in 2006

**7 million** extra road, public transport, cycling and pedestrian trips per day on Melbourne's public transport by 2040

It is estimated that new people moving to Melbourne add around **2,000** cars to the city's roads each week

**1.7 million** additional jobs in Melbourne by 2031

**1.5 million** extra homes in Melbourne by 2051

# Key projects delivered or currently underway

- **Roll out of modern E-Class trams**
- **Power supply upgrade program**
- **New Preston Depot and workshops**
- **Installation of level-access stops at key locations**
- **Operational integration on Routes 96, 11, and 86**

# And there's more to come

- **Design and delivery of F-Class trams**
- **Increasing stabling**
- **Modernisation of depot facilities**
- **Installation of level-access stops across the network**
- **Melbourne Metro Rail Project tram works**

# Thank you
