MASTER OF ADVANCED MEDICAL IMAGING PRACTICE

Deepen your specialist medical imaging knowledge, advance to a leadership position or embark on a research project with the Master of Advanced Medical Imaging Practice, one of six specialisations within the Master of Advanced Health Care Practice.

With a contemporary and evidence-based curriculum, written by multidisciplinary experts and practitioners with real-world experience, our innovative course will keep you up-to-date with advanced technologies and help you build translational skills in image analysis and processing, cardiac CT, MSK and neuroimaging, data management, health informatics and research. It provides the tools to shape your future practice and develop new career pathways within your workplace.

Delivered fully online, the Master of Advanced Medical Imaging Practice offers the quality and recognition of a Monash postgraduate degree with the flexibility required by working professionals. This program also offers a research stream which can be used as a pathway to a PhD.

In the Master of Advanced Medical Imaging Practice you will:
- Advance your modality based clinical judgement and decision-making skills.
- Learn how to provide evidence-based comments on emergency radiographic and CT images.
- Explore health problems observed in practice using a case-based approach, and determine the appropriateness of medical imaging modalities to aid diagnosis and treatment.

Delivery mode: Online
Intakes: First Semester – February
Second Semester – July
Fees: Refer to monash.edu/study
Duration: 1 – 1.5 years (full-time) or 2 – 3 years (part-time) depending on prior qualifications

“...This Masters program, is a great addition to your CV and shows your interest and commitment to the profession. It helps to build up your management skills and knowledge of upcoming technologies in the field.”

Kathleen
Radiographer
Box Hill Hospital
Master of Advanced Medical Imaging Practice

COURSE STRUCTURE

<table>
<thead>
<tr>
<th>PART A</th>
<th>PART B</th>
</tr>
</thead>
<tbody>
<tr>
<td>Part A focuses on expanding core discipline skills (24 points)</td>
<td>Part B provides the opportunity to pursue advanced specialist study through either coursework or a research focus (48 points)</td>
</tr>
</tbody>
</table>

All students complete Part B. Depending on your qualifications and experience, you may be eligible to apply for credit of up to 24 credit points towards part or all of Part A. Even if you are eligible for credit, you can elect to do the longer form of the course.

It is anticipated that most radiographers will commence this course at Part B. Visit monash.edu/study to learn more about what you’ll learn within the medical imaging specialisation.
RESEARCH STREAM PROJECTS

Monash is recognised globally for its research excellence. You can choose to undertake a research project or minor thesis in medical imaging, where you’ll be matched to a supervisor who is an expert in their field. Supported research areas include:

- Radiation safety, patient experience, inter-professional practice
- Hybrid imaging
- MR and CT practice
- Medical imaging education

Research works best if it arises from a specific practice based challenge. Discuss your proposed research project with the course coordinator and we will endeavour to support your project.

LEARN MORE

For further information about the Master of Advanced Medical Imaging Practice, including entry requirements, fees and scholarships, visit monash.edu/study

International students are eligible to study in their home country and must satisfy our minimum English language requirements.

WHY CHOOSE MONASH?

- Ranked #46 in the world for Clinical, Preclinical and Health Sciences (Times Higher Education 2018).
- The Faculty takes a bench to bedside approach; our clinical research is focused on directly improving outcomes for patients.
- We participate in Monash Partners Academic Health Science Centre, one of only four advanced research and translational centres in Australia.
