BECOME A LEADER IN OUT-OF-HOSPITAL CARE

Are you looking to take your paramedic career to the next level? At Monash, we have a proud history of educating Australia’s most specialised paramedics, who provide the highest levels of emergency and out-of-hospital care.

The Master of Specialist Paramedic Practice expands your knowledge, skills and clinical decision-making, preparing you for specialist paramedic roles. With a choice of intensive care, community care, or aeromedical retrieval specialisations, you’ll learn advanced pathophysiology of complex diseases and injuries and contemporary evidence-based treatment pathways. This ensures you are ready to deliver patient-focused care in challenging physical environments.

Our course is taught by some of the most experienced clinicians and active researchers so your learning is continually informed by the latest research.

In the Master of Specialist Paramedic Practice you will:
- develop autonomous clinical reasoning and decision-making abilities
- learn advanced techniques to provide the highest level of out-of-hospital care
- enhance your professional capabilities in leadership, team work and communication
- build research skills, apply research to practice and complete your own research project.

Intakes
First semester: February

Durations
Part time: 3 years

"The teaching associates, lecturers and coordinators are amongst the best of their kind in the world. There isn’t a single lecture I’ve watched that hasn’t changed my practice as a paramedic for the better."

Ryan Parry
Paramedic Educator and Master of Specialist Paramedic Practice Graduate
SPECIALISATIONS

AEROMEDICAL RETRIEVAL
Gain the skills and knowledge required to complete an aeromedical retrieval internship program or work as part of an aeromedical retrieval system. In this specialisation, you’ll learn how to provide specialist paramedic care with aeromedical, retrieval, rescue and coordination services.

INTENSIVE CARE
Develop the skills and knowledge required to complete an intensive care internship or improve your clinical practice. In this specialisation, you’ll learn how to provide the highest level of care for cardiac, respiratory, medical, trauma, paediatric and obstetric patients.

COMMUNITY CARE
Acquire the skills and knowledge required to develop your clinical practice in the delivery of community paramedic care. Learn advanced assessment, treatment and referral skills required for a community paramedic role.

RESEARCH
Monash is recognised globally for research excellence. As part of the Master of Specialist Paramedic Practice, you have the opportunity to work on a research project with one of our expert supervisors. Completing this research project can be used as a pathway to a graduate research degree, such as Doctor of Philosophy.

CAREER OPPORTUNITIES
Completing the Master of Specialist Paramedic Practice prepares graduates for an internship or employment in roles such as a:
- Community Paramedic
- Flight Paramedic
- Intensive or Critical Care Paramedic

Our course also provides you with transferrable, professional skills that can be used in a range of rewarding roles in areas like:
- Education and training
- Leadership and management
- Research
