If you’re thinking about a PhD or gaining some research skills and looking for an accelerated program to help you - then this is the course for you. With Commonwealth Supported Places available, there’s never been a better a better time to further your nursing research career.

Gain the critical-thinking and decision-making skills to influence clinical practice and help you meet the needs of individual patients and the wider community.

You’ll learn different research methodology techniques and apply them to an independent research project in your specialist field. Your expert supervisors will work with you to provide individual guidance and academic counselling.

This course will provide you with a greater understanding of evidence-based practice, better developed research and academic writing skills, and enhanced career prospects.

In the Bachelor of Nursing (Honours) you will:
- Explore different research methodology techniques.
- Develop critical-thinking and decision-making skills.
- Gain a greater understanding of evidence-based practice.
- Develop research and academic writing skills.
- Benefit from enhanced career prospects.
