NEW MASTER OF PUBLIC HEALTH (M6024)

YOUR TOP CHOICE FOR EXCELLENCE IN PUBLIC HEALTH EDUCATION

The Monash Master of Public Health is an internationally recognised passport for careers in government, industry, aid organisations and throughout the health sector. Highly regarded in industry and academia, our course develops outstanding graduates who contribute to improving public health on a national and global scale.

You’ll be taught by Victoria’s leading public health professionals including hospital clinicians and global health experts from the Burnet Institute. With strong links to the Alfred Hospital, part of your learning will take place in the Alfred Medical Research and Education Precinct (AMREP) in the heart of Melbourne.

Delivered through a combination of online and block mode teaching, our Master of Public Health provides the quality and recognition of a Monash postgraduate degree, with the flexibility required by working professionals.

This program offers a wide choice of electives in key areas of expertise, so you can customise your studies around your career interests to maximise professional development. Completing the research project or required research enabling units may provide a pathway to a PhD.

In the Master of Public Health you will

• Learn how to analyse and interpret health-related data.
• Integrate knowledge and skills to public health issues and challenges; at local, national and global levels.
• Gain leadership and management skills required for success in the health sector locally and globally.

Our key areas of expertise include

• Epidemiology and biostatistics
• Clinical research methods
• Health economics
• Disease/injury prevention and control and health promotion
• Health policy, planning and management
• Global health and human rights
• Occupational and environmental health

PART A
Part A focuses on expanding public health knowledge (24 points)

PART B
Part B consists of four core units covering foundations of public health studies (24 points)

PART C
Part C provides the opportunity to pursue advanced specialist study through either coursework or research pathways (48 points)

All students must complete Parts B and C. Depending on your prior qualifications and experience, you may be eligible for entry level credit which reduces the duration. Learn more about our new entry levels overleaf.

Course code: M6024
Delivery mode: Multi-modal (domestic)
On-campus (international)
Intakes: February and July
Fees: Refer to study.monash
Duration: 1–2 years (full-time) or 2–4 years (part-time) depending on prior qualifications and experience

“I got to hear first-hand from industry experts and had the opportunity to network with them. The subject choice also offered huge variety. It gave me the skills and confidence to think laterally, and to gain up-to-date knowledge of the pressures on health systems in an array of contexts, and from a number of perspectives”

Frances Ng
Head of Health Service Planning, Total Alliance Health Partners
International and Master of Public Health graduate
CAREER OUTCOMES

Our Master of Public Health graduates have a wealth of career options including:

- Senior roles in public health and the health system.
- Public sector management in government and non-government organisations.
- Management positions in health care facilities.
- Clinical researchers, project officers and policy makers.
- International public health roles with aid agencies.
- Expansion into the public health sphere for clinicians and scientists, as well as biomedical and allied health professionals.

The Master of Public Health (M6024) also fulfills the core discipline requirements of a Master of Public Health for the Australasian Faculty of Public Health Medicine, Royal Australasian College of Physicians.

ENTRY LEVELS

We offer three levels of entry into our Master of Public Health and you may be eligible to receive credit for prior qualifications and experience. You will also have the option to exit early with a Graduate Certificate or Graduate Diploma in Public Health, provided you have met the qualification requirements.

“My lecturers and tutors at the time are now some of the luminaries in their fields. Their enthusiasm for, and their command of their subjects, was impressive and infectious. The course is very valuable for clinicians, equipping students with the skills to undertake clinical practice audits, participating in research studies led by colleagues or industry, and in critically appraising scientific studies that inform practice.”

Professor Allen Cheng
Infectious Diseases Physician and Director, Infection Prevention and Healthcare Epidemiology Unit, Alfred Health and Master of Public Health graduate

“The research skills and data management experience I gained during my Masters enabled me to gain significant roles, and taught me how to be adaptable with my skills. I’ve since worked for the Federal Government in both the National Health and Medical Research Council (NHMRC) and the Australian Research Council (ARC) in senior roles managing data and analytics teams”.

Marcus Nicol
Director of Research Analysis, Australian Research Council and Master of Public Health graduate
