BUSINESS, WITH A GLOBAL PERSPECTIVE

Monash Business School graduates stand out in the workplace because they approach business issues with a broader perspective.

Here, you won’t just learn the latest theories and trends shaping business. You’ll be encouraged to broaden your awareness, test ideas and try new methods. Disruption has become the norm, so you’ll need a solid knowledge base that allows you to stay agile in a changing landscape. It’s an approach that sets the world’s most influential business leaders apart, and one that’ll prepare you for a thriving business career of your own.

TOP REASONS TO CHOOSE MONASH BUSINESS SCHOOL

TRULY GLOBAL
Monash offers a truly global education, with many ways to combine overseas travel with study. Our network of over 100 partner universities worldwide offers opportunities for semester exchange and summer/winter programs. The Berkeley Haas Global Access Program offers the opportunity to study at the University of California in the innovation hub of Silicon Valley. Study tours to Europe, Asia, South America and the US are also available to see international business in action. If you have an appetite for adventure and new challenges, you could apply for an internship overseas to deepen your understanding of global workplace cultures — and boost your CV.

MORE FLEXIBILITY
More than any other university in Australia, Monash allows you to shape your course to fit your future. You’ll benefit from a wider range of single and double degrees, greater choice in majors and electives, the opportunity to do a second major from another faculty, and a broader perspective on your studies. With a double degree you can combine business or commerce with law, engineering, arts, education, IT, science and more.

WORLD-RENOUNED
Monash Business School is regarded among the world’s leading business schools. We’re placed in the top 1 per cent of business schools with the coveted triple accreditation globally. It’s why studying at Monash Business School gives status to your CV.

WORK-READY
Employers prefer Monash graduates for a reason — our degrees get you out of the classroom and into the workplace, giving you the practical skills sought by employers. Corporate projects and industry placements (internships) with leading companies mean you’ll graduate better prepared and suitably skilled.

Monash Business School offers the opportunity to participate in cutting-edge learning programs such as the unit in entrepreneurship delivered by Strategic Design Innovators from Isobar. Monash collaborates with this award-winning global digital design agency to offer a series of workshops and boot camps that will challenge you to step into the exciting world of start-ups.

BETTER CONNECTED
Relationships are the bread and butter of business. It’s why we give our students the opportunity to meet influential employers and work on industry projects from year one. Plus, by joining the Monash Business School alumni community you’ll become part of a huge network of ambitious, high-achieving professionals to stay connected with throughout your career.

Our specialist graduate development programs, as well as our clubs and societies, offer opportunities to meet graduate recruiters and industry leaders.

INNOVATIVE LEARNING
At Monash you won’t spend all your time sitting in lectures. In our flipped classrooms, you’ll find a range of resources to help build your understanding of a topic before class. That way, your time in the classroom can be spent applying what you’ve learnt to real business problems — with teachers on hand to offer practical guidance. And in your final-year capstone unit, you’ll get real workplace experience that counts towards your degree.

1 Monash Business School is accredited with AACSB International (Association to Advance Collegiate Schools of Business — the most recognised global accrediting body for business schools of this kind), EQUIS (European Quality Improvement System) and AMBA (Association of MBAs).
2 QS World University Rankings 2018.
3 QS World University Rankings by Subject 2018.
We are rated five stars (well above world standard) for:

- Accounting, Auditing and Accountability
- Econometrics
- Law
- Marketing
- Statistics

We are rated four stars (above world standard) for:

- Applied Economics
- Banking and Finance
- Business and Management
- Commerce
- Economics

QS WORLD UNIVERSITY RANKINGS

Monash University

- No.59 in the world in the latest QS World University Rankings
- No.59 in the world for graduate employability³

By subject³

- No.23 in the world for Accounting and Finance
- No.29 in the world for Business and Management
- No.45 in the world for Economics and Econometrics
- No.26 in the world for Law

EXCELLENCE IN RESEARCH FOR AUSTRALIA (ERA)⁴

I was lucky enough to be part of the ‘Game Changers’ program at EY (Ernst & Young) in my first year, where I got to network with other students and connect with people from industry. It also gave me a real insight into my future career!

CATHERINE KOPEC
Bachelor of Business
WHERE DO I START?

Studying business at Monash gives you more choice and more flexibility, so finding what’s right for you takes some planning. Here are a few pointers to help narrow down your options.

**Are you a people or a numbers person?**
This is a good way to start thinking about whether to take a commerce or business path. Business offers practical learning, as you’ll develop a deep insight into how organisations work across all business functions. As a general rule, business also has a stronger focus on people-based topics such as marketing, management, business law and HR.

Commerce is more analytical and conceptual, with a bigger emphasis on quantitative and mathematical topics such as business analytics, econometrics, marketing science and actuarial science. Once you’ve built this specialised knowledge, you’ll be able to use data to solve problems and find solutions in commercial contexts.

**How much maths have you done?**
The level of maths you’ve completed (or will complete) in Year 12 will determine some of the options available to you. The table on the right breaks it down in detail.

**Do you want a comprehensive or specialist degree?**
Do you know exactly what area of business you want to study? Or do you want to taste-test a few different areas first? With us, you can either do a comprehensive or a specialist degree.

A comprehensive degree allows you to select from a wide range of subjects within business, business administration or commerce, and then you can customise your course to make it uniquely yours. With a specialist course, you’ll begin in your area of interest from day one, which is perfect if you have a specific goal or field of study firmly in your sights. Our specialist courses are also designed to ensure that you meet any accreditation requirements and that you have the right combination of skills needed for your future professional field.

**Study options**
There are a number of ways to explore the same study area, depending on the emphasis you choose. If, for example, you’re really interested in economics, you could choose to do a Bachelor of Economics. Or you could do a major in economics and business strategy in a Bachelor of Business, or a major in finance and economics in a Bachelor of Business Administration, or even major in economics in a Bachelor of Commerce. The same goes for accounting. You could choose to do a Bachelor of Accounting, which gives you the opportunity to undertake study that counts towards professional accounting accreditation. Or you can major in accounting in a Bachelor of Commerce, Business or Business Administration. You can also do accounting units in the Bachelor of International Business. The table on the right explains the options for each study area.

**Pathway programs**
If you’re eager to study at Monash, there are a number of ways to start your journey. The Monash Access Program is a part-time option that makes undergraduate study more achievable for students who are 21 years or over.

And if you don’t quite achieve the ATAR you need to get into your course directly, our Diploma of Tertiary Studies offers an alternate route. There’s also a range of other pathways – including those for Indigenous students and TAFE or VET students – that make studying at Monash possible.

BUILD YOUR FUTURE, TAILOR YOUR DEGREE

We can prepare you for a career in business, however you imagine it. With a huge range of courses, real-world learning and study abroad opportunities, you can tailor a degree to your interests and goals.
Comprehensive courses
You don’t have to know exactly where you want to be in three years to kick off your studies now. With a comprehensive course, you can cast your net wide to discover what areas of business interest you most before choosing your major.

Our comprehensive courses are made up of core units, a major and a number of elective units. The great thing about elective units is that you can use them to study abroad, go on a study tour, complete an industry placement project, or even take up a second major from within the Business School or from another faculty.

Our comprehensive courses:
• Bachelor of Business
• Bachelor of Business Administration
• Bachelor of Commerce

Specialist courses
Have a pretty good idea of where you’re headed? With a specialist course, you’ll take 11 or 12 units in your specialist area which means you can spend more of your studies in one area to start building a specific skill set from your first day.

The great thing about a specialist degree is that they’re specifically designed to ensure that you meet any accreditation requirements, while giving you flexibility to do other things within your degree. With a specialist degree you can still study abroad or even complete an industry placement.

Our specialist courses:
• Bachelor of Accounting
• Bachelor of Actuarial Science
• Bachelor of Banking and Finance
• Bachelor of Economics
• Bachelor of Finance
• Bachelor of International Business
• Bachelor of Marketing

Majors and minors
When you enrol in a comprehensive course, your options are wide open – but eventually you’ll start to focus on more specific areas of study.

Your major is the main area of study for your degree. It’s made up of 48 points (eight units) from a single discipline, studied over the three years of your course. A minor is the second focus area – it’s made up of 24 points (four units) from a single discipline.

Double degrees
This is a great option if you have more than one passion and want to expand your career options. Employers also value interdisciplinary skills and a double degree is a great way to combine your interests and gain an added advantage in the job market. It allows you to focus on two different areas at the same time, using the electives from one degree to make up the required units from the other. By doing it this way, you’ll graduate at least two years sooner than if you studied the courses separately.

Beyond the classroom
In each of our comprehensive, specialist or double degrees, we’ll encourage you to start thinking early on about what and how you want to learn.

First year is the perfect time to start mapping out your degree and explore ways to gain industry experience. During your degree, you’ll also complete a capstone unit, which can be a corporate or community project, a research project or an internship. You can even do an internship overseas, which means you’ll get work experience and an adventure rolled into one!

As the largest business school in Australia, we’ll also support you to study overseas and explore international businesses up close. We offer global summer and winter programs with universities across Europe and in the USA, and study tours in Asia, USA and Europe. You’ll also have the chance to hear from international industry leaders at networking events.

At Monash Business School, you’ll gain the practical skills that employers value and the broad range of perspectives that the world of business needs.

Want to see our comprehensive, specialist and double degree courses in action? Go to page 38 to see some course map examples.
DOUBLE DEGREES

University is a time to expand your knowledge in the areas that interest you. It’s why at Monash we offer one of the largest double degree programs in the country – giving you the freedom to combine your Monash Business School degree with other areas of study, including law, engineering, arts, education and IT.

So if you’re feeling the pull to explore more than one discipline, a double degree could be the right move. It’s a great way to get the most out of the time you spend studying, enhance your main degree with a complementary skill set, and expand your employability in the workforce.

Double degrees through Monash Business School

If you’re set on a career in business, you may wish to consider taking two degrees within the Business School. You can study a double degree in Business or Commerce, giving you the opportunity to expand your business skills.

Business double degrees

Combine a Bachelor of Business with a major* in:
- Accounting
- Banking and finance
- Business statistics
- Business law
- Business management

With any of these degrees:
- Economics and business strategy
- Human resource management
- International business
- Marketing
- Taxation

With any of these degrees:
- Bachelor of Accounting
- Bachelor of Banking and Finance
- Bachelor of Marketing
- Bachelor of International Business

* Conditions apply with the choice of majors in the Bachelor of Business and Bachelor of Commerce.

For more information about double degrees, visit monash.edu/study

Commerce double degrees

Combine a Bachelor of Commerce with a major* in:
- Accounting
- Actuarial studies
- Behavioural commerce
- Business analytics
- Econometrics
- Economics
- Finance
- Management studies
- Marketing science
- Sustainability

With any of these degrees:
- Bachelor of Actuarial Science
- Bachelor of Economics
- Bachelor of Finance

* Conditions apply with the choice of majors in the Bachelor of Commerce and Bachelor of Business.

For more information about double degrees, visit monash.edu/study

Double degrees with other faculties

Keen to cast your net a little wider? You can combine your Business, Business Administration, Commerce, International Business or Marketing degree with a course from another faculty. This breadth of knowledge can open exciting career opportunities – for example, a Business/Arts double degree could lead to a career managing an arts organisation, and an Engineering/Commerce degree would make you the perfect candidate for a business development or management role in an engineering firm.

You’ll need to meet the prerequisites of both degrees, so be sure to check with the faculty of the second course to make sure you comply.

For more information about double degrees, visit monash.edu/study
What does the Business School Scholars Program include?

- $8000 each year of your degree*
- $2000 one-off travel grant, which can go towards an overseas study experience at one of our international campuses, or through a partner university
- access to special on-campus study facilities
- support from academic mentors throughout your course
- career/study advice and mentorship from a working Monash alumnus/alumna
- the opportunity to develop your leadership skills through our Professional Development Series
- an invitation to participate in our award-winning Transforming the Future – Leaders Program, where you’ll learn how to implement sustainable change in any organisation.

Eligibility

If you’re a domestic student with an ATAR of 98 or above, you may be eligible for this competitive scholarship. You also need to be enrolling in a comprehensive or specialist degree through Monash Business School, or one of these double degrees:

- Bachelor of Commerce and Bachelor of Actuarial Studies
- Bachelor of Commerce and Bachelor of Economics
- Bachelor of Commerce and Bachelor of Finance
- Bachelor of Business and Bachelor of Accounting
- Bachelor of Business and Bachelor of Banking and Finance
- Bachelor of Business and Bachelor of Marketing.
- Bachelor of Business and Bachelor of International Business.

Whichever course you choose, it needs to be among your top preferences on your VTAC application form.

* $8000 paid per year (48 credit points of study), until the minimum points for your degree are completed, or to a maximum of four years.
BACHELOR OF BUSINESS

How are brands built? What causes stock markets to soar (and slide)? Why do some businesses boom and others fail?

If you’re intrigued by what makes markets, brands and organisations function effectively, a business degree could be a perfect fit.

A quick overview
This is a wide-ranging degree, designed to give you the broad range of skills and experiences you’ll need for a career in business. You’ll also be prepared for roles with start-ups, not-for-profits and NGOs.

How does it work?
You’ll start by studying the core units of accounting, marketing, business law, management, economics, business statistics and finance. Then, once you have a taste for each area, you’ll choose to major in one or two areas to develop deeper skills. In fact, your second major can be from within the Business School or a different faculty.

To find out how this degree is structured, go to page 38 to see it in action in a course map.

This degree could be for you if …
You’re looking for a course with a practical focus and want choice and flexibility. It’s a comprehensive degree that gives you plenty of options – with 10 majors and 10 double degree alternatives. If you’re looking for broad-based skills or you haven’t yet decided how you want to specialise, a Bachelor of Business could be right for you.

Where it could lead
There are a huge number of career options. Our graduates go on to work in management, consulting, accounting, economics, marketing, taxation, entrepreneurial activities and international business. Plus, with a degree from an internationally-recognised business school, you’ll have opportunities for employment across the globe.

Beyond the classroom
As part of the degree you’ll have the opportunity to take part in:
• industry placements and projects with leading brands
• international exchange programs with one of our 100-plus partner universities around the world
• leadership, professional development and volunteering programs
• student professional societies
• networking opportunities.

Prerequisites

¹ The scores provided are to be used as a guide only, and are either the lowest selection rank to which an offer was made in 2019 or an estimate (E). RC – Range of criteria. For double-degree courses, you must meet the prerequisites for both courses. CRICOS codes for double-degree courses are available at monash.edu/study
² Completion of a double degree in the three-year timeframe depends on choice of major.
I’ve had a number of partners and directors at different firms tell me that they look really favourably on Monash graduates. It’s been a really big positive and made my life easier applying for graduate positions.”

BRENT PATTERSON
Bachelor of Business
Today, organisations have access to more customer and competitor data than ever before – from population census and opinion polls, to sales and demand data. But it doesn’t mean much without someone who can interpret it. Understanding business statistics gives you the key to unlock meaning in a world full of information. As part of this major, you’ll work with the latest computer-based statistical models, learn to apply statistical modelling and forecasting techniques in a business context, and explore how to get the most out of different types of data.
Uber. Boost. Deliveroo. If these companies have taught us anything, it’s that entrepreneurial flair mixed with practical skill can turn a great idea into a booming business.

From bringing ideas to life to examining the balance sheet, here’s your chance to get a real-world understanding of the many factors that come together to make a business work.

**A quick overview**

Hands-on and commercially focused, this comprehensive degree will teach you the ins and outs of business – from management to marketing and everything in between.

**How does it work?**

As you develop a strong foundational knowledge in business, you’ll start to focus on a specific area, choosing to major in accountancy, finance and economics, management practice, or marketing and communications. Alternatively, you can choose to major in business administration to gain a broad overview of business operations.

To find out how this degree is structured, go to page 38 to see it in action in a course map.

**This degree could be for you if ...**

You’re interested in how businesses operate on different levels and want to do it in a hands-on setting. This course covers the foundational skills required to make any organisation run smoothly. It’s also great if you’re wanting a broad understanding of business fundamentals while also focusing on a specific area of study. You can do this by double-majoring in business administration (which will give you a broad overview of business) and in another area of study such as accountancy or management practice, or combine it with one of the dynamic double degrees on offer.

**Where it could lead**

You’ll graduate with the practical skills to jump into a career with an established organisation or even start your own business. Depending on your major, you might find yourself working in accounting, financial or business management, economics or marketing. And with an internationally-recognised degree, like all degrees at Monash Business School, your prospects may extend well beyond Australia.

**Beyond the classroom**

As part of the degree you’ll have the opportunity to:

- go on an international exchange program with one of our 100-plus partner universities around the world
- hear from industry leaders
- work on real community cases and industry projects
- take part in industry placements.

**Prerequisites**

**VCE**

- **English:** Units 3 and 4: a study score of at least 30 in English (EAL) or 25 in English other than EAL.
- **Maths:** Units 1 and 2: a satisfactory completion in two units (any study combination) of General Mathematics or Mathematical Methods or Specialist Mathematics; or Units 3 and 4: any mathematics.

**IB**

- **English:** Level 1.
- **Maths:** Level 1.

For prerequisite subject requirements, please refer to page 41.

The course develops your practical skills and there are many areas to major in. I’m double majoring in marketing communications and management, which are both very people-focused. I love relationship building and helping people. In management, I’m interested in retail, people and event management; and in marketing, designing campaigns that appeal to consumers. Some of my peers have started their own businesses while they’ve been studying. Maybe one day I’ll join them."

JENNY HOANG
Bachelor of Business Administration
MAJORS

Accountancy
Also available as a minor
Gain the strong technical skills you’ll need to work in accounting across public and private sectors. In this major, you’ll build a skill set that includes financial accounting, management accounting, corporate finance, taxation, auditing and financial analysis. Depending on your electives, this degree could also prepare you to meet the accounting accreditation requirements of:
- CPA Australia
- Chartered Accountants Australia and New Zealand
- The Institute of Public Accountants
- The Chartered Institute of Management Accountants
- The Association of Chartered Certified Accountants.

Business administration studies
Learn to deal with the unique challenges facing organisations today, and develop innovative ways of approaching business – all while growing your leadership and management skills. This area of study offers a unique opportunity to choose units from other majors to craft a degree that’s tailored. If you’re looking to run your own business one day, this major could be perfect for you.

Finance and economics
Learn how money, banking, credit and investments work – and build the skill set you need to manage them successfully. You’ll learn how to develop financial policies and products, and gain knowledge that will enable you to solve complex financial problems using mathematical models and techniques. The units in this major will teach you to develop financial policies and products, solve complex financial problems, manage risk, conduct forecasts and set up budgets.

Marketing and communications
Also available as a minor
With more ways than ever to connect with consumers, understanding the complexities behind effective marketing is essential for any business. This major will give you the know-how to create and implement successful marketing strategies in any context.

Management practice
Also available as a minor
Learn to look at an organisation from the outside, and critically evaluate where better management could make a big difference. You’ll learn the finer details of management theory – including business communication, project management and professional development – and how to put theory into practice.

MINORS

Economics and business decisions
The relationship between business and economics is an important aspect of today’s business world. You’ll be introduced to macroeconomic and microeconomic frameworks, and learn how to apply these concepts in a business setting. You’ll also learn about the effects of economics on policy, as well as the connection between economics, international trade, money, banking and finance.
BACHELOR OF COMMERCE

Commerce is an integral part of our society. The desire to trade what we have for what we want has shaped how people and nations have interacted for millennia.

Today, commerce impacts decision-making, leadership, innovation and policy development on a global scale.

Join the brilliant minds of the commercial world – the people taking an analytical approach to problem-solving, and influencing change in commercial settings. If you’re a clever thinker who likes to unpack problems and consider ideas from a fresh perspective, commerce presents a world of exciting career prospects.

A quick overview
This is a comprehensive degree with an analytical focus. You’ll learn to think conceptually, solve problems analytically and use data to make informed decisions. It’s the perfect foundation for a career in business.

How does it work?
You’ll start by studying a range of core units to get a sense of where your interests lie. Then you’ll begin to build specialist skills, majoring in accounting, actuarial studies, behavioural commerce, business analytics, econometrics, economics, finance, management studies, marketing science or sustainability. You can also choose to do a second major from within the Business School or from another faculty.

To find out how this degree is structured, go to page 38 to see it in action in a course map.

This degree could be for you if …
You have strong mathematical skills and enjoy analysing problems to find the best solutions.

With 12 double degree options and 10 majors, our Bachelor of Commerce offers a huge amount of flexibility. It means you can get started without necessarily knowing where you’ll end up.

Where it could lead
You’ll develop the professional skills to manage an organisation, and the analytical abilities to transform businesses from the inside out. A degree in commerce will give you a strong foundation that could take you in many different directions – from actuarial positions and data analytics, to consulting, finance and economics.

Beyond the classroom
As part of the degree you’ll have the opportunity to take part in:
• industry placements with leading companies
• an international exchange
• international and domestic study tours
• industry projects
• a range of leadership, professional development and volunteering programs
• networking events.

Prerequisites
VCE
English: Units 3 and 4: a study score of at least 30 in English (EAL) or 25 in English other than EAL.
Maths: Units 3 and 4: a study score of at least 25 in Mathematical Methods (any) or Specialist Mathematics.

IB
English: Level 1.
Maths: Level 3.

For prerequisite subject requirements, please refer to page 41.

1 The scores provided are to be used as a guide only, and are either the lowest selection rank to which an offer was made in 2019 or an estimate (E). RC – Range of criteria. For double-degree courses, you must meet the prerequisites for both courses. CRICOS codes for double-degree courses are available at monash.edu/study
2 Not available with all specialisations.
3 This guarantee doesn’t apply to the Laws pathway, which requires an ATAR of 90+. 
At Monash, I’ve been involved in mentoring year 11 and 12 students from underprivileged backgrounds to help them understand and break down the barriers to tertiary education. I’ve always had a passion for consulting and I’ve been offered a graduate role at Ernst & Young next year.”

SHAMRON SINGH
Bachelor of Commerce and Bachelor of Business Information Systems
MAJORS

Accounting
Also available as a minor
Understand the crucial role accounting plays in every business, no matter its size. Through financial statements, accounting allows a company to communicate its operations, financial position and cashflows to key stakeholders. In this major, you'll learn the ins and outs of recording, reporting and analysing financial transactions – and how to use this information strategically in a commercial context. Depending on your electives, you may meet the accounting accreditation requirements of:
- CPA Australia
- Chartered Accountants Australia and New Zealand
- The Institute of Public Accountants
- The Chartered Institute of Management Accountants
- The Association of Chartered Certified Accountants.

Economics
Also available as a minor
Economics explores how people and societies use their resources – this major will teach you how to use that information for better commercial success. You'll learn how individuals, households, companies and governments interact, and discover how different systems (including labour, healthcare, financial investment and tax) work as part of society as a whole. This major will teach you to apply economic tools and analysis in a business environment – and on a grander scale – to assess and implement policy change in areas as wide-ranging as tax, government spending, poverty and the environment.

Finance
Also available as a minor
Our society is built around the exchange of money, and a major in finance will give you the skills you need to manage and invest money well on behalf of organisations. You'll learn how the banking system works, what makes a good investment, and the best approach to solving complex financial problems using mathematical models and techniques. Your skill set will cover asset and risk management, capital markets, stock portfolios, international finance, forecasting and budgeting. In a broader sense, you'll also learn how the financial policies and products we use are developed.

Management studies
Also available as a minor
How an organisation manages its resources has a huge impact on its overall success. With a management studies major, you'll build the skills you need to analyse and resolve complex issues in a variety of industry sectors, both government and professional. Your studies will include the latest management theories, organisational behaviour and strategic management.

MINORS

Business law
Also available as a minor
Almost every decision a business makes will have a legal implication – whether it's hiring an employee, launching a marketing campaign or developing a service for customers. Taking a business law minor is a great way to complement the rest of your degree. It'll give you a foundational understanding of how the legal system impacts business, the skills to apply relevant legal principles and the ability to conceptualise the legal implications of business decisions.

Econometrics
Also available as a minor
Today, businesses are dealing with an unprecedented volume of data – but to use it effectively, they need to process it quickly and efficiently. In econometrics, you'll learn to use mathematics and statistics to interpret data, analyse information, develop economic and business forecasts, and construct econometric models. You'll be able to use maths to solve complex economic issues, and your findings will help organisations make sound economic decisions.

Behavioural commerce
Also available as a minor
Understanding how and why people behave the way they do is an important part of any successful business. In this major, you'll use psychology to explain human behaviour in a commercial context – then use this information to understand how business decisions affect the economy, corporations and the public sector.

Actuarial studies
Also available as a minor
Actuarial studies will teach you to use mathematical, econometric and financial models to identify, analyse and quantify risk within a business. You'll develop the technical skills to forecast commercial scenarios, and make recommendations based on your findings – for example, the likelihood of economic or property loss, and the impact this would have on insurance premiums, superannuation and other types of financial investments. Depending on your electives, this major could prepare you for accreditation with the Actuaries Institute.

Sustainability
Also available as a minor
As consumers become increasingly aware of the impact their commercial decisions have on global systems, organisations of every kind are starting to move towards more sustainable and ethical practices. In this major, you'll learn strategies to deal with the complex economic, social, environmental and sustainability issues facing businesses in every sector. You'll learn the strategies behind successful sustainable businesses, and the best ways to implement these strategies in any organisation.

Marketing science
Also available as a minor
Build a solid understanding of the theories behind successful commercial marketing, and use it to help businesses overcome challenges within their organisation. This major will give you the confidence to develop effective marketing strategies that help organisations to track and reach their goals.
Accounting is the language of business and the foundation of a wide range of careers. It’s an integral part of any business, and spreads across different organisational functions – from finance and HR to senior management and marketing.

Studying a Bachelor of Accounting, you’ll discover what makes accounting so vital to business success, and why it’s more than just a numbers game.

A quick overview
This degree will give you a solid technical skill set across key areas such as information systems, corporate finance, auditing and assurance, financial reporting and data analysis. You’ll learn to interpret data and develop insights that will help organisations effectively allocate resources and make better business decisions.

How does it work?
Your course will be structured around giving you exactly what you need to excel in this area – from problem-solving and complex analysis, to communication and professional judgement. The course also comes with electives to prepare you to meet the requirements of the major professional accounting bodies.

This degree could be for you if …
You’re set on a career in accounting, or you’re looking to complement another skill set with accounting expertise, as you can use your elective units to choose another major or minor. You’ll delve deep into the complexities of this one area to build a stronger knowledge base.

Where it could lead
With an accounting degree from an internationally-recognised business school, you’ll have a range of options open to you – in Australia and around the world. Your studies will prepare you for work in areas such as tax, auditing, budgeting, forensics, liquidation and management.

An accounting qualification will also give you a solid base to potentially move into senior management positions down the track. Depending on your electives, this degree could prepare you to meet the accounting accreditation requirements of:

- CPA Australia
- Chartered Accountants Australia and New Zealand
- The Institute of Public Accountants
- The Chartered Institute of Management Accountants
- The Association of Chartered Certified Accountants.

Beyond the classroom
As part of this degree you’ll have the opportunity to take part in:

- a three-week study program across Europe
- an international exchange program with one of our 100-plus partner universities around the world
- the Chartered Institute of Management Accountants (CIMA) Global Business Challenge
- leadership programs
- a range of professional development activities.

Prerequisites
VCE
English: Units 3 and 4: a study score of at least 30 in English (EAL) or 25 in English other than EAL.
Maths: Units 3 and 4: a study score of at least 22 in one of Mathematical Methods (any) or Specialist Mathematics or 25 in Further Mathematics.

IB
English: Level 1.
Maths: Level 2.

For prerequisite subject requirements, please refer to page 41.
With Monash and Beta Alpha Psi, a worldwide honours society, I’ve travelled to Wellington, Los Angeles and Washington. On the committee, we get to give back to members and organise events that help people prepare for the workplace and secure career opportunities. I’ve been offered a full-time placement at Grant Thornton, so I’ve got a job ready for when I graduate. There are so many opportunities beyond technical skills and studying, you just have to grasp all of them.”

ELLIOTT BATISTE
Bachelor of Accounting
My advice to future students is to treat every day as a learning experience and give yourself plenty of ‘me time’. Continue to push yourself and go for the big opportunities out there. You’ll be surprised by how much you can accomplish if you put that bit more effort in.

JESSICA TRAN
Bachelor of Actuarial Science
If you’re big on numbers and the role they play in our day-to-day lives, actuarial science can help you turn your curiosity into a promising commercial career.

Learn to evaluate risk and opportunity in a business setting, and use your findings to influence some of society’s most important economic structures. Actuaries play major roles in a range of organisations, and are often considered the backbone of financial security.

**A quick overview**

In this degree you’ll learn to apply mathematical concepts to real-life scenarios, and use your analytical skills to help companies plan for the future. As you further develop your maths and analytical skills, you’ll start to use a range of concepts and data findings to solve real commercial problems.

**How does it work?**

Your degree will be tailored to building your skills in actuarial science. This degree is accredited by the Actuaries Institute, and may allow you to achieve Part I of the Actuaries Institute professional qualification.

**This degree could be for you if ...**

You’re looking for a way to turn a love of maths into an exciting career. You’ll learn to identify, analyse and assess risk in a range of business areas — including insurance, superannuation, business and financial services, scientific and social research, and engineering.

**Where it could lead**

Actuaries are typically found in insurance and consulting actuarial firms. But they’re also in demand in other industries, such as mining and telecommunications as well as in government and academia.

They often provide advice, too — for asset managers, stockbrokers, bankers and companies working in risk management. The types of projects you might find yourself working on range from the mathematics of customer loyalty schemes to carbon footprint modelling.

Actuaries play particularly important roles in industries that forecast real-life scenarios, using mathematical and econometric models to make predictions. For example, the impact of potential economic or property loss on insurance premiums, superannuation and other types of financial investments.

**Beyond the classroom**

As part of the degree you’ll have the opportunity to take part in:
- industry placements with leading companies
- an international exchange
- international and domestic study tours
- a range of leadership, professional development and volunteering programs
- networking events.

**Prerequisites**

**VCE**

- English: Units 3 and 4: a study score of at least 30 in English (EAL) or 25 in English other than EAL.
- Maths: Units 3 and 4: a study score of at least 25 in Mathematical Methods (any) or Specialist Mathematics.

**IB**

- English: Level 1.
- Maths: Level 3.

For prerequisite subject requirements, please refer to page 41.
BACHELOR OF BANKING AND FINANCE

Your first job. Your first home. The very first four-digit PIN you ever choose. Banks play a huge role in the way we live our lives. But there’s a lot more to banking than cards, accounts and loans.

As a society, we rely heavily on our banks remaining stable. From capital markets to financial forecasting – futures, derivatives, bonds, stocks and more – you’ll explore what makes banking and finance such a central part of the world today, and learn the skills required to build a successful career.

A quick overview
In this degree you’ll focus on the key theories, practices and concepts that underpin the banking and finance sector, and the skills required for managing money in an institutional setting.

How does it work?
Your entire course will be structured around building your knowledge and skills in this area – with a focus on corporate finance, commercial banking, equity markets, financial planning and investment banking.

This degree could be for you if …
You can see yourself working in a bank or financial institution down the track. It’s also a great knowledge base to have if you’re interested in trading stocks or investing. When it comes to money, the more you know, the better.

Where it could lead
As a banking and finance graduate you’ll find plenty of roles that you’re suited to – in banking, insurance, broking, funds management, superannuation, accounting and consulting. You’ll have a universal skill set that can take you around the world.

Beyond the classroom
As part of this degree you’ll have the opportunity to take part in:
• a three-week study program across Europe
• the Chartered Institute of Management Accountants (CIMA) Global Business Challenge
• the UBS Investment Banking Challenge
• internships with major banks, including Macquarie
• an international exchange
• a range of leadership, professional development and volunteering programs
• networking events.

By studying this course, you could also gain access to the professional development and mentorship opportunities that come with a Financial Services Institute of Australasia (FINSIA) membership.

Prerequisites
VCE
English: Units 3 and 4: a study score of at least 30 in English (EAL) or 25 in English other than EAL.
Maths: Units 3 and 4: a study score of at least 22 in one of Mathematical Methods (any) or Specialist Mathematics or 25 in Further Mathematics.

IB
English: Level 1.
Maths: Level 2.

For prerequisite subject requirements, please refer to page 41.

I like how dynamic banking and finance is, and the fast-paced nature really appealed to me. I enjoy the flipped classroom experiences; they enhance the interaction you have with other students and teachers. I have an internship lined up with Perpetual in their accounting division, so I’m really looking forward to applying the concepts I’ve learnt at university and expanding my horizons.”

CHRISTIAN MORINA
Bachelor of Banking and Finance and Bachelor of Business
Finance and economics are what makes business go round and understanding economic growth is pivotal, no matter where you go in business. As part of my degree, I’ve been exposed to a whole bunch of extra-curricular opportunities, as well as things like mentoring. I did a placement with Shine Wing Australia and I learned so much from it in six weeks. Economics and accounting helped me during that placement because I was able to gain an understanding of what drives a business to make the decisions they do and see the impact it has on clients.”

MANGALA PRASETIA
Bachelor of Economics and Bachelor of Commerce
BACHELOR OF ECONOMICS

How do we use resources most efficiently? How does an airline set the price of a ticket? And what’s the best way to measure sustainable business practices?

Economics is the science of decision-making. You’ll explore the principles our economy is built on, and learn how they impact the way we spend, save, work and live. This degree will teach you to think analytically, solve problems logically, and make informed decisions in a commercial context.

A quick overview
In this degree, you’ll learn how to use data to make better business decisions, study the impact of individual economic choices, and build an in-depth understanding of the way local, national and global economies function.

How does it work?
In this course, you’ll further focus your studies by following one of these streams:

- Economics and economic policy
  Understand the bigger economic picture – from how goods and services are consumed, to changes in employment rates. You’ll learn to apply economic theories and analytical tools to the economy, and identify the effects of domestic and international policies.

- Mathematical economics and econometrics
  If you’re more interested in the numbers behind the economic theories, this stream could be the one for you. You’ll learn how to analyse and interpret econometric and mathematical data, and apply your findings in a range of contexts, including financial investment, production, taxes, and government expenditure and policies.

This degree could be for you if …
You’re a logical thinker who likes putting academic theory into action. You’ll study a broad range of areas – such as human behaviour, development, policy and business – and learn to bring this information together to form valuable insights.

With a strong understanding of how decisions affect individuals, organisations and governments, you’ll be in a better position to influence change at all levels of society. The latest economic theories and analytical tools will also allow you to identify and communicate the impact of government policies, both domestically and on a global scale.

Where it could lead
A degree in economics can take you in different directions – from sustainability and health, to transport, aviation and finance. Many graduates also find work in government departments, such as the Reserve Bank of Australia, the Australian Bureau of Statistics and the Australian Treasury. With a degree from an internationally-recognised business school, you’ll have worldwide career prospects.

Beyond the classroom
As part of the degree you’ll have the opportunity to take part in:

- industry placements with leading companies
- an international exchange
- international and domestic study tours
- a range of leadership, professional development and volunteering programs
- networking events.

Prerequisites

VCE
English: Units 3 and 4: a study score of at least 30 in English (EAL) or 25 in English other than EAL.
Maths: Units 3 and 4: a study score of at least 25 in Mathematical Methods (any) or Specialist Mathematics.

IB
English: Level 1.
Maths: Level 3.

BACHELOR OF FINANCE

Few things impact our society more than the exchange of money. The way we earn, spend, save, borrow and invest it – both as individuals and as a collective – is reflected in everything from interest rates to property prices.

Build a strong understanding of how our financial system works, and develop the skills you need to manage money well – for big corporations, small businesses and governments.

A quick overview
In this degree, you’ll learn how to manage and invest money in the form of assets, equity and liability. Your studies will also cover the financial policies and products that allow money to flow efficiently between individuals, businesses, government and other organisations.

How does it work?
For the next three years, your studies will focus on giving you a comprehensive understanding of the way financial systems operate.

This degree could be for you if …
You want to be part of maintaining a robust and efficient economy. In this course you’ll explore corporate finance, equities and investments, debt markets and fixed income securities, financial modelling and international finance.

Where it could lead
With a finance degree from a world-renowned business school, you’ll be prepared for a career in just about any industry, anywhere in the world. A role in finance could see you making cashflow decisions, managing assets and risk, working with capital markets and stock portfolios, or producing forecasts and budgets for financial institutions.

You could find work as a group finance director, treasurer, securities dealer, financial trader, investment banker, stockbroker, chief financial officer, mergers and acquisitions specialist, risk manager or consultant. Our graduates have gone on to take exciting roles in major banks, regulatory bodies such as ASIC and the Reserve Bank, as well as in the corporate sector.

Beyond the classroom
As part of your degree you’ll have an opportunity to take part in:
* a three-week study program across Europe
* the Chartered Institute of Management Accountants (CIMA) Global Business Challenge
* the UBS Investment Banking Challenge
* industry placements with major banks and financial institutions – including Macquarie, KPMG and Deloitte
* an international exchange
* a range of leadership, professional development and volunteering programs
* networking events.

As part of my degree, I joined the Global Consulting Group and did some pro-bono consulting for a not-for-profit client. It gave me good experience in the field and was really interesting. Finance has a big impact on people in society, so it’s important for finance students to have integrity and be grounded in their values.”

YISHAN NEO
Bachelor of Finance and Bachelor of Commerce
As part of my degree, I’ll get to go to China for three months and study at Peking University, then do an internship and work placement in China. I’ll get to see how a business is run in China in comparison to Australia, so that’s exciting.

ANDRE COTEN
Bachelor of International Business
and Bachelor of Business
What would happen if China stopped producing cotton? Or Google suddenly crashed?

International business is a fundamental part of what keeps societies around the world running smoothly, in ways that we often take for granted. Today, businesses are facing a new generation of opportunities as a result of rapid globalisation. Learn the intricacies of doing business in different countries and environments – and the foundations you need for a global career.

A quick overview
A little different from our other course options, the Bachelor of International Business is delivered at the Monash city location, located in the heart of Melbourne CBD, and units are offered all year round to allow accelerated progression.

How does it work?
Your degree will be tailored to building the skills you need to understand the issues affecting international firms – from their strategy to the way they operate. With three trimesters a year, you’ll cover everything in a three-year bachelor’s degree in just two years.

This degree could be for you if …
You’re interested in working with and managing people from different countries and cultures. Whether you’re based in Australia or somewhere else in the world, you’ll be in a position to support businesses operate in an international economy. Depending on your electives, you may also gain an accounting accreditation.

Where it could lead
Businesses of all sizes need people with global knowledge, so your options may be far-reaching. You could find yourself anywhere, from a small company that uses overseas suppliers to a big brand that operates worldwide. You might be helping Australian companies set up operations internationally, or working with international companies to establish roots in Australia.

Beyond the classroom
As part of the degree you’ll have the opportunity to:
• frequently hear from industry guest speakers
• study abroad for 12 weeks in China, South Korea, Japan or Malaysia and Italy
• take part in an 11-week industry placement.

Prerequisites
VCE
English: Units 3 and 4: a study score of at least 30 in English (EAL) or 25 in English other than EAL.
Maths: Units 3 and 4: a study score of at least 22 in one of Mathematical Methods (any) or Specialist Mathematics or 25 in Further Mathematics.

IB
English: Level 1.
Maths: Level 2.

A quick overview
This degree will give you a combination of technical, practical and analytical skills, from understanding buying behaviour to building social media campaigns – everything you need to think and act as a professional marketer.

How does it work?
Your degree will be tailored to building your skills in this area. You’ll have the opportunity to explore different areas of marketing – including social media, advertising, consumer and buyer behaviour, campaign planning, market research, strategy, data analysis, branding and digital marketing.

This degree could be for you if …
You’re interested in the process of helping an organisation understand, create, communicate and deliver value to customers and stakeholders.

Where it could lead
Every organisation needs people who can make great marketing moves. Marketing graduates find work in a range of industries, including healthcare, banking and finance, retail, sports, market research, law, tourism, education and not-for-profits.

Beyond the classroom
As part of the degree you’ll have the opportunity to take part in:
- global study tours in China or Europe
- marketing industry placements with lending firms and agencies
- networking events with prospective employers
- leadership, professional development and volunteering programs.

¹ The scores provided are to be used as a guide only, and are either the lowest selection rank to which an offer was made in 2019 or an estimate (E). For double-degree courses, you must meet the prerequisites for both courses. CRICOS codes for double-degree courses are available at monash.edu/study.
I chose Monash because of the diversity in the Business School’s offerings. I could start broad and then specialise in marketing without sacrificing any other area of business that I wanted to learn. I’ve been working in a marketing agency while studying and with the concepts that I’m learning at uni, I’ve been able to adapt more easily. The academics who teach at Monash are some of the most incredible and wonderful people that you’ll meet, and go above and beyond to help you feel certain in what you’re doing.”

JORJA WATTS
Bachelor of Marketing
HOW ARE THE DEGREES STRUCTURED?

Any degree you choose will have some level of flexibility, so you can tailor it to your interests. We’ve put together a few examples of single and double degrees to give you a general idea of how they’re structured.

**Comprehensive degree**
Our Bachelor of Business, Bachelor of Business Administration and Bachelor of Commerce degrees are each made up of core units, a major of your choice and a number of elective units. You can use your elective units to study abroad, complete an industry placement or even take up a second major from within Monash Business School or from another faculty.

**Specialist degree**
A specialist degree is made up of core units, a specialisation and a number of elective units. You can use your elective units to undertake a second major from within Monash Business School to expand your studies in Business or Commerce, or to pick up units from other faculties. You can even use your electives to study abroad or complete an industry placement.

Note: The above course maps are a guide only and may be subject to change. Some double degrees may vary in length depending on their structure and requirements.

For more information on degree course maps, visit monash.edu/study

* A capstone unit can be a corporate or community project, a research project or an internship.
Double degree
If you’re interested in completing a double degree, there are a huge number of combinations available to you.

Like the other degrees, you’ll have a number of core units to complete, as well as a major. What sets a double degree apart is what you do with your electives — you’ll use them to study units and earn credits towards a second degree. To demonstrate exactly how this structure works in action, we’ve put together an example structure of what your course may look like if you do a double degree through Monash Business School or with another faculty.

YEAR 1
| Semester 1 | Business / Commerce core unit | Business / Commerce core unit | Second degree unit | Second degree unit |
| Semester 2 | Business / Commerce core unit | Business / Commerce core unit | Second degree unit | Second degree unit |

YEAR 2
| Semester 1 | Business / Commerce core unit | Business / Commerce core unit | Second degree unit | Second degree unit |
| Semester 2 | Business / Commerce core unit | Business / Commerce core unit | Second degree unit | Second degree unit |

YEAR 3
| Semester 1 | Business / Commerce major | Business / Commerce major | Second degree unit | Second degree unit |
| Semester 2 | Business / Commerce major | Business / Commerce major | Second degree unit | Second degree unit |

YEAR 4
| Semester 1 | Business / Commerce major | Elective or major unit | Second degree unit | Second degree unit |
| Semester 2 | Business / Commerce major | Business / Commerce capstone unit* | Second degree unit | Second degree unit |

Bachelor of International Business (BIB) and Bachelor of Business double degree
For this degree, you’d need to choose an eligible Bachelor of Business major. You’ll spend your first two years at our teaching centre in the city to complete your Bachelor of International Business, then complete your final two semesters at the Caulfield campus.

YEAR 1
| Trimester A | Business core unit | Business core unit | Business core unit | Business core unit |
| Trimester B | Business core unit | Business core unit | Business core unit | BIB core unit |
| Trimester C | BIB core unit | BIB elective | BIB elective | BIB elective |

YEAR 2
| Trimester A / Semester 1** | BIB core unit | BIB elective | BIB elective | BIB elective |
| Trimester A, B or C / Semester 2 | Study abroad or investigative project in business or industry-based project |
| Trimester C | BIB core unit | Business capstone unit* | BIB elective | BIB elective |

YEAR 3
| Semester 1 | Business major | Business major | Business major | Business major |
| Semester 2 | Business major | Business major | Business major | Business major |

** Depending on the major being completed in the Bachelor of Business degree, you may be required to undertake some Bachelor of Business units in these periods to meet course progression requirements. Some travel between the city location and Caulfield campus will be required.

Bachelor of International Business (BIB) and Bachelor of Arts double degree
For this combination, you’d take your Bachelor of International Business units at our teaching centre in the city, then complete your double degree with Arts units at either the Clayton or Caulfield campuses.

YEAR 1
| Semester 1 / Trimester A** | Arts major | Arts major | Arts minor | BIB core unit |
| Semester 2 / Trimester B** | Arts major | Arts major | Arts minor | BIB core unit |
| Trimester C | BIB core unit | BIB core unit | BIB core unit | BIB core unit |

YEAR 2
| Semester 1 / Trimester A** | Arts major | Arts major | Arts minor | BIB elective |
| Semester 2 | Arts major | Arts major | Arts minor | Arts elective |
| Trimester C | BIB core unit | BIB core unit | BIB core unit | BIB core unit |

YEAR 3
| Trimester A, B or C | Study abroad or investigative project in business or industry-based project |
| Trimester B / Trimester 2** | BIB core unit | Business Capstone Unit* | Arts elective | Arts elective |

** Depending on unit selection in the Bachelor of Arts degree, you may be required to undertake some Bachelor of International Business units in these periods to meet course progression requirements. Some travel between the city location and Caulfield/Clayton campuses will be required.

Note: The above course maps are a guide only and may be subject to change. Some double degrees may vary in length depending on their structure and requirements. For more information on degree course maps, visit monash.edu/study
If your bachelor’s degree leaves you hungry for more, there are a number of ways to continue your studies at Monash Business School.

Honours in commerce
This is an opportunity to expand on your undergraduate degree by exploring the latest research and developments in commerce. You’ll build a more conceptual understanding of the study areas and undertake independent research. If you decide to take your studies even further, honours will prepare you for a higher degree by research (PhD).

How it works
The Bachelor of Commerce (Honours) degree is available only to selected students. If you’re eligible, you’ll complete an extra year of study on top of your bachelor’s degree. Some programs are made up of advanced theory, research training and research; for others, you’ll complete set coursework along with a research project. Specialty areas include accounting, econometrics, economics, finance, management and marketing.

Why honours?
If you’re looking to build specific expertise, honours will take you a step closer to higher qualifications such as a master’s by research or coursework, Master of Philosophy or Doctor of Philosophy (PhD). But it’s not just a stepping stone — honours alone gives you a deeper insight into your area of specialisation, something that will set you apart from other candidates in the employment market.

Graduate study
Whether you’re working towards an accreditation, looking to broaden your skill set, or keen to deepen your expertise in a certain field, graduate study will take your qualification to the next level.

Monash Business School has a range of graduate courses with a graduate certificate and diploma in business, as well as master’s degrees in business, accounting, banking, finance, business law, global business, economics and econometrics, actuarial studies, management, marketing and project management. Some can be undertaken directly after undergraduate study, while others require industry experience. If you’re interested in a higher level of education and have significant experience under your belt, we also offer MBA study options. PhD programs are also available across all major areas of business.

1. The scores provided are to be used as a guide only, and are either the lowest selection rank to which an offer was made in 2019 or an estimate (E). For double-degree courses, you must meet the prerequisites for both courses.

2. Completion of a double degree in the three-year timeframe depends on choice of major.

3. This Monash Guarantee doesn’t apply to the Laws pathway, which requires an ATAR of 90+.

4. Not available with all specialisations.
