

MASTER OF ADVANCED PRIMARY HEALTH CARE PRACTICE

MASTER OF ADVANCED HEALTH CARE PRACTICE

Enhance your primary health knowledge or embark on a research project with the Master of Advanced Primary Health Care Practice, one of seven specialisations within the Master of Advanced Care Practice.

Developed by leading academics and researchers, our course is designed to benefit all health professionals, policymakers and those working in primary health networks. It will challenge your thinking about best practice primary health care, providing the tools to shape your future practice and make an impact in the primary care landscape.

Delivered fully online, the Master of Advanced Primary Health Care Practice offers the quality and reputation of a Monash graduate degree with the flexibility required by working professionals. This program can also be used as a pathway to PhD entry.

In the Master of Advanced Primary Health Care Practice you will:

- Write persuasive proposals for new programs and services.
- Use research findings and knowledge to improve health outcomes for clients.
- Make evidence-based recommendations for clinical practice and change management.
- Present your innovations at professional conferences.

Course code

M6001

Study mode

Online

Intakes

First semester: February

Second semester: July

Durations

Full time: 1.5 years

Part time: 3 years

Duration depends on prior qualifications or study load taken

COURSE STRUCTURE

PART A

Part A focuses on expanding your core skills and knowledge.
(24 points)

PART B

Part B provides you with the opportunity to pursue advanced specialist study through research in areas of importance to you.
(48 points)

Visit monash.edu/study/course/m6001 to learn more about what you'll learn within the primary health care practice specialisation.

All students complete Part B. You may be eligible for up to 24 credit points towards Part A of the course, depending on your qualifications and experience.

RESEARCH

Monash is recognised globally for its research excellence. You can choose to undertake a research project or minor thesis, where you'll be matched to a supervisor who is an expert in their field.

Supported research areas include:

- Mental health
- Alcohol and other drugs
- Chronic illness, ageing well and supportive care
- Longitudinal studies

Research works best if it arises from a specific practice-based challenge. Discuss your proposed research project with the course coordinator and we will endeavour to support your project.

Completion of the research stream within the Master of Advanced Primary Health Care Practice can be used as a pathway to a PhD.

WHY CHOOSE MONASH?

- Ranked #31 in the world for Clinical, Preclinical and Health Sciences (Times Higher Education 2021).
- We take a bench to bedside approach; our clinical research is focused on directly improving outcomes for patients.
- We participate in Monash Partners Academic Health Science Centre, one of only four advanced research and translational centres in Australia.

"We welcome applications from medical practitioners, nurses, allied health professionals and primary health care administrators and managers, to join our multi-disciplinary team – working towards solutions for the future of primary health care practice."

Professor Darryl Maybery
