EVOLVING HEALTH LEADERSHIP

CAN YOU SEE YOURSELF SHAPING THE FUTURE OF HEALTHCARE?

THE EVOLVING HEALTHCARE SYSTEM
As changes across the health sector accelerate and intensify, leaders in healthcare education and practice face significant leadership challenges. How can we help individuals, teams, and whole organisations shift in fundamental and unprecedented ways to achieve/enhance outcomes within the hospital and community context?

INTRODUCING EVOLVING HEALTH LEADERSHIP
Delivered in partnership with a leading behavioural consultancy, NeuroPower, our fully-online course is grounded in Monash University’s high-quality clinical research and NeuroPower’s latest insights in neuroscience and behavioural science to equip health leaders to:

- define a new form of health leadership in a world that is rapidly transforming
- apply new ways to lift individual and team performance (including shifting from being a ‘great clinician/educator’ to an ‘outstanding leader’)
- humanise health education and healthcare delivery by creating positive teams and cultures that deliver world-class person-centred care.

WHO SHOULD ATTEND
This course is designed for leaders of all levels across health professions education and delivery, from acute, community and primary care through to preventative care and health education and research. This includes roles in administration, allied health, general practice, medical, midwifery, nursing, operational, practice managers, and more.

LEARNING OBJECTIVES
1. Translate key trends in health leadership to your health organisation (with a focus on practical implications).
2. Articulate the unique contributions of leaders at each layer of your health organisation.
3. Identify factors that are preventing leadership alignment across your organisation.
4. Apply insights from neuroscience and behavioural science to individual and team decision-making and interactions.
5. Design interactions and team environments that better satisfy the social cognitive needs of the human brain (your own and those of others).
6. Develop a practical and nuanced action plan for how your organisation/team can evolve its leadership approach.

ACCELERATE YOUR QUALIFICATION
Participants who complete the assessed version receive a Monash micro-credential worth 6 credit points towards the future Masters in Health Professions Education. This course is projected to commence in 2022.
