CRICOS: 0100211

COURSE CODE: B6020

A future-focused, innovation-led course designed to provide you with the skills needed to navigate regulatory compliance within an increasingly complex corporate environment.

With the Master of Regulation and Compliance you'll learn how to establish, implement and manage comprehensive compliance programs across a broad range of industries. You'll discover how to identify key risks within businesses and gain an understanding of the contemporary regulatory and compliance environment in which business operates.

Designed in conjunction with industry experts, this course will equip you to manage beyond compliance, through exposure to international best practice and cutting-edge regulatory technologies. You'll also work on real-life case studies that offer practical insight into current regulatory issues that arise in the domestic and international context.

Where could it lead?

The degree will establish you as an expert in regulation and compliance. You'll be strategically placed to further your career in a range of compliance, assurance, corporate governance and risk-related managerial roles in the private or non-government sectors. You may also be placed within the senior ranks of government, including domestic and international regulatory agencies.

The degree is tailored for flexibility and caters to your previous experience, with the option to study part time or full time. You can focus on one discipline or select from a range of discipline-specific regulation-orientated electives in the areas of: financial services; sustainability and the environment; employment and human resources; global enterprise; artificial intelligence and new technologies; and ethics and risk management. You also have the opportunity to apply your knowledge practically through an international study tour or corporate project.

Expertise in regulation and compliance is an area of increasing demand for companies within Australia and those operating internationally across a number of different markets. Your skill set will be relevant across all sectors, giving you the freedom to further your existing management career or join an industry that inspires you.

* Some compulsory units are offered from our City location.

Course structure

The course is structured in two parts: Part A. Mastery knowledge and Part B. Application studies. All students will complete Part A. Depending upon your prior qualifications, you may receive credit for all or some of Part B.

Part A. Mastery knowledge <i>(48 credit points)</i>	Part B. Application studies <i>(48 credit points)</i>
