

Our Mission:

We enable our customers to make the world healthier, cleaner and safer

Healthier

We make a positive impact on human health by providing our customers with advanced technologies and expertise to deliver breakthrough medicines and diagnostics that improve lives.

Cleaner

We empower our customers with the tools to understand and address climate change. Our green technologies help ensure the quality of air and water that sustains all life.

Safer

From products that detect contamination in food, to instruments that help solve crimes and identify potential threats, we provide the solutions that enable our customers to protect our communities.

Who we serve

Lab and Life Sciences

- Research and academia
- Mass spectrometry
- Electron microscopy
- Molecular and cellular biology
- Genetic sciences
- Clinical and next-gen sequencing

Healthcare

- Clinical diagnostics
- Immunodiagnostics
- Microbiology
- Transplant diagnostics
- Healthcare supplies

Pharma and biotech

- Bioproduction
- API
- Formulation
- Clinical research
- Lab services
- Global logistics, labeling
- Manufacturing

Industrial & Applied Sciences

- Chemical analysis
- Chromatography
- Electron microscopy
- Next-generation sequencing
- Manufacturing and Processing
- Environmental
- Food and Beverage
