

MASTER OF ADVANCED HEALTH CARE PRACTICE

MASTER OF ADVANCED RADIATION THERAPY PRACTICE

Deepen your specialist knowledge of radiation therapy, advance to a leadership position or embark on a research project with the Master of Advanced Radiation Therapy Practice, one of six specialisations within the Master of Advanced Health Care Practice.

With a contemporary and evidence-based curriculum, written by clinical experts, our innovative course will keep you up-to-date with advanced planning, treatment and imaging techniques and help you build translational skills in radiation therapy practice. It provides the tools to shape your future practice and develop new career pathways.

Delivered fully online, the Master of Advanced Radiation Therapy Practice offers the quality and recognition of a Monash postgraduate degree with the flexibility required by working professionals. This program also offers a research stream which can be used as a pathway to a PhD.

In the Master of Advanced Radiation Therapy Practice you will:

- Advance your clinical judgement and decision-making skills.
- Develop an understanding of local and international perspectives in radiation therapy service delivery and patient care.
- Focus on patient-centred practice and quality management to ensure safe delivery of radiation therapy.

Delivery mode: Online

Intakes: First Semester – February

Fees: Refer to monash.edu/study

Duration: 2 years/3 years (part-time only) depending on prior qualifications

COURSE STRUCTURE

PART A

Part A focuses on expanding core discipline skills (24 points)

PART B

Part B provides the opportunity to pursue advanced specialist study through either coursework or a research focus (48 points)

All students complete Part B. Depending on your qualifications and experience, you may be eligible to apply for credit of up to 24 credit points towards part or all of Part A. Even if you are eligible for credit, you can elect to do the longer form of the course.

It is anticipated that most radiation therapists will commence this course at Part B. Visit monash.edu/study to learn more about what you'll learn within the radiation therapy specialisation.

"I saw this course as an opportunity to expand my professional knowledge and pursue my passion in the field of radiation therapy. It's fulfilling to be able to work and study at the same time"

Nur

Radiation therapist, National Cancer Centre of Singapore

Master of Advanced Radiation Therapy Practice

RESEARCH STREAM PROJECTS

Monash is recognised globally for its research excellence. You can choose to undertake a research project or minor thesis in radiation therapy, where you'll be matched to a supervisor who is an expert in their field. Supported research areas include:

- Radiation therapy practice
- Fitness to practice
- Education
- Inter-professional practice

Research works best if it arises from a specific practice based challenge. Discuss your proposed research project with the course coordinator and we will endeavour to support your project.

LEARN MORE

For further information about the Master of Advanced Radiation Therapy Practice, including entry requirements, fees and scholarships, visit monash.edu/study

International students are eligible to study in their home country and must satisfy our minimum English language requirements.

WHY CHOOSE MONASH?

- Ranked #46 in the world for Clinical, Preclinical and Health Sciences (Times Higher Education 2018).
- The Faculty takes a bench to bedside approach; our clinical research is focused on directly improving outcomes for patients.
- We participate in Monash Partners Academic Health Science Centre, one of only four advanced research and translational centres in Australia.
