Monash offers one of the largest ranges of degree and double degree courses in Australia in the areas of:

- ART, DESIGN AND ARCHITECTURE
- ARTS, HUMANITIES AND SOCIAL SCIENCES
- BUSINESS
- EDUCATION
- ENGINEERING
- INFORMATION TECHNOLOGY
- LAWS
- MEDICINE, NURSING AND HEALTH SCIENCES
- PHARMACY AND PHARMACEUTICAL SCIENCES
- SCIENCE
STUDY ABROAD EXPERIENCES

900+ INCOMING TO AUSTRALIA
4000+ OUTGOING TO PLACES AROUND THE WORLD

17,000+ STAFF
22:1 ACADEMIC STAFF STUDENT RATIO
77,000+ STUDENTS FROM MORE THAN 170 COUNTRIES
300,000+ ALUMNI NETWORK ACROSS THE WORLD

Our courses are accredited by professional bodies such as:

Monash Business School is one of the few business schools across the globe, and the only one within the Group of Eight, with the esteemed ‘triple crown’ accreditation of AACSB, EQUIS and AMBA.

#57 EMPLOYABILITY
GLOBAL UNIVERSITY EMPLOYABILITY RANKING 2017
(Times Higher Education 2017)

★★★★★

THE GOOD UNIVERSITIES GUIDE 2018
AWARDED MONASH FIVE STARS FOR:

♥ Staff qualification
♥ Student demand
♥ Student retention

Adopt as your fundamental creed that you will equip yourself for life, not solely for your own benefit but for the benefit of the whole community.”

CAREER SUCCESS

At Monash, you’re at the centre of everything we do. We offer forward-looking education, focused on preparing you for the rapidly changing world of work. Our education leverages partnerships with industry, government and alumni, and we aim to provide you with an unprecedented breadth of opportunities to participate in work-integrated learning experiences and engage with industry.

You’ll be immersed in excellent learning and teaching environments and supported by world-class educators. During your time at Monash, you’ll have the opportunity to develop your own unique employability narrative, learn to be enterprising, and to develop the capacity to be the ‘CEO of yourself’. Through your academic program and the many other opportunities open to you at Monash, you’ll foster an appetite for lifelong learning, the capability to continually expand and deepen your employability skills, and develop a competitive edge in the graduate employment market.

Career Success Coaching

To enable you to develop an employability edge, Career Connect offers you access to our highly experienced and industry-based career success coaches. Our coaches deliver a range of employability workshops and facilitate small-group career conversations, and once you’re in your final year you can access one-on-one coaching. Career Success Coaching enables you to develop the knowledge to effectively transition from study to work both in Australia and around the world, and supports you to build the skills and gain the insight needed to stand out to employers.

We provide you with a range of online resources to support your career development, including building your LinkedIn presence, understanding interviewing techniques and how to navigate diverse employment markets around the world.

Whether you’re still deciding which career path to commence, or you know exactly where you want to go, Career Success Coaching provides individualised advice and support as to how you can use your Monash degree.

monash.edu/career-connect/jobs/plan/coaching
Student Futures

By using the Student Futures platform, you’ll build a bank of real-life examples which demonstrate you have acquired skills employers look for. This platform will help you to reflect on the employability skills you’re developing so that you can articulate your unique employability narrative when applying for jobs.

Student Futures celebrates the skills you’re developing through your course and participation in co-curricular opportunities at Monash and in your everyday life, including paid work, family responsibilities and contributing to your community. Winning the NAGCAS Best Practice in Careers Award in 2016 and the ATEM Best Practice in Innovation Award in 2017, the Student Futures platform gives you a competitive employability advantage which is unique to studying at Monash. Student Futures also features the ‘Voice of the Graduate’ series, showcasing profiles of recent graduates and global leaders who have studied at Monash, and the pathway they have taken to enable their career success.

monash.edu/student-futures

Student leadership development

While completing your studies, you’re encouraged to develop your talents, explore your beliefs and values, and cultivate the skills most associated with effective leadership to enable you to have a positive influence on the University, your community and the world.

At Monash, we understand that anyone can learn to lead and that leadership capability can be developed in all who seek it. That’s why we provide a rich and diverse range of engaging leadership opportunities for you. We want to empower you to take on real-world leadership challenges.

monash.edu/students/leadership

Monash Talent: get matched with a job you’ll love

When you’re ready to graduate, Monash Talent provides a graduate employment service that connects you with companies recruiting for employees just like you. Monash Talent uses an innovative online platform to match you with jobs that suit your skills and align with your passions. With great employers, streamlined applications and neuroscience-based testing, Monash Talent makes it much easier to get a job you’ll love.

LIFE-CHANGING RESEARCH
Monash research is making a positive impact in local communities and around the world.

Even before we became the global university we are today, our researchers looked beyond traditional boundaries, discovering ways of approaching the fields in which they worked.

It’s why a Monash education is so respected around the world. Things that we now take for granted wouldn’t exist without the initial work of Monash researchers, such as:

1973: Professors Alan Trounson and Carl Wood achieved the world’s first IVF pregnancy. The Trounson and Wood team went onto accomplish Australia’s first (and the world’s fourth) successful IVF birth in 1980.

1986: Monash’s Faculty of Pharmacy and Pharmaceutical Sciences designed and synthesised the anti-flu drug Relenza, a drug that is now used globally.

Today our ambition and optimism are stronger than ever. We have a clear vision of what we want our research to achieve and how we’ll help our researchers make it happen.

Nobel Peace Prize for climate change
In 2007, eight scientists from Monash University shared in the prestige of the 2007 Nobel Peace Prize, awarded jointly to the Intergovernmental Panel on Climate Change and former US Vice-President Al Gore. We judge our research not only by its academic excellence, but by the impact it has on the communities with which we engage and serve.

Helping the blind to see
The Monash Vision Group (MVG) draws on the capabilities of Monash University, The Alfred hospital and industry partners MiniFAB and Grey Innovation to develop bionic eye technology that connects to the primary visual cortex. This means that patients unable to make use of current retinal implants because of damaged optic nerves or physical trauma to the actual eyes may now have the opportunity to see again.

Eliminating dengue fever
Dengue fever is a deadly disease spread by mosquitoes carrying the dengue virus that infects millions of people every year. But research by Monash scientists has shown that a naturally occurring bacteria, Wolbachia, can be introduced into mosquito populations to prevent the spread of the virus to people. Researchers at the Eliminate Dengue program are now looking for ways to translate this approach to at-risk communities around the world.

Helping women give birth safely
Women in developing countries are often at risk of dying from postpartum haemorrhage because access to the lifesaving medicine oxytocin is severely limited. In an innovation that could save thousands of women, Monash researchers have developed a new form of oxytocin, which can be stored at room temperature and is inhaled by the patient. And it can be used with minimal training.

DID YOU KNOW?
In 2016, we had 4773 graduate research students studying at Monash University with a total research income of $353 million.
Muscle growth finding may assist with cancer treatment
Monash University’s Biomedicine Discovery Institute (BDI) researchers have collaboratively developed a therapeutic approach that dramatically promotes the growth of muscle mass, which could potentially prevent muscle wasting in diseases including muscular dystrophy and cancer.

Tackling global energy challenges
Bringing together a unique and diverse team of international researchers and organisations, Monash research tackles global energy challenges through the establishment of the ARC Centre of Excellence in Future Low-Energy Electronics Technology. Commencing operations in 2017, the centre acts as an international hub to combine high impact Monash research with global expertise, placing Australia at the forefront of new materials technology and research.

Global slum revitalisation
In only one of four successes selected from more than 600 applications worldwide, Monash was awarded a $14 million grant for a research project that’ll significantly advance human health and lives of more than a billion who live in urban slums globally. This research will deliver the first ever public health and environmental data on the outcomes of an alternative water management approach, forming the basis for policies and strategies of urban informal settlements worldwide.

Building stronger, lighter planes with 3D printing
Professor Xinhua Wu and her team at the Monash Centre for Additive Manufacturing (MCAM) are creating an aluminium alloy that will make aircraft 30 to 40 per cent lighter, twice as fuel-efficient and still structurally sound. So significant is this project that they’re working in close partnership with Microturbo, the European Space Agency and Bombardier.

Pioneering diabetes department at The Alfred
Australia’s only university department dedicated to research into diabetes was launched in August 2017 by the federal Minister for Health, Greg Hunt. Monash’s Department of Diabetes, led by Professor Mark Cooper AO, a senior endocrinologist at The Alfred hospital, will comprise a team of 60 scientists researching strategies to combat diabetes and its complications, including kidney and heart disease, and blindness.
We know that when, where, how and what you study is critical to progressing your career, skills and knowledge.

You might be a professional looking to gain expert knowledge in your current field or you might be looking for a career change. Whatever your ambition, Monash can help you get there.

Professional-entry master’s courses
These courses are specifically designed to prepare you to enter a regulated profession such as law, accounting or teaching. These courses can take two to four years to complete, depending on the discipline.

Some of these areas can also be studied at an undergraduate level; however a professional-entry master’s course is ideal if you make the decision to enter a different field to that of your first course.

Expert master’s courses
These courses allow you to extend expertise gained through your undergraduate degree, or add breadth to your knowledge and skills within a new or complementary field. If you complete a four-year honours bachelor’s degree, you can usually complete an expert master’s degree in the same discipline in just one year, meaning you graduate with both a bachelor’s and a master’s degree in five years.

See page 12 for a full list of coursework courses.

Double master’s courses
A double degree course allows you to study for two degrees at the same time. You’ll graduate with two master’s degrees, giving you more career flexibility and opportunities.

It allows you to keep your options open and develop expertise in different yet complementary areas.

Study modes
We know you have many priorities and commitments. That’s why we offer flexible study modes to allow you to build your study around your life.

Most courses are offered in both full-time and part-time study modes. Some units are offered in intensive block mode (usually Thursday to Sunday), allowing you to arrange a short break from work to complete a unit, and some are offered outside business hours. It’s whatever works best for you.

Off-campus (distance learning)
You don’t have to be at Monash to study with Monash. Through our online distance learning, you can study with Australia’s biggest university without ever having to set foot on campus. It’s the perfect option if you need to balance university with work, family and other personal commitments.

You’ll study the same units and gain the same qualification as you would if you were on campus. It includes a combination of print study material and electronic communication.

Please note: studying off-campus with Monash doesn’t entitle you to apply for an Australian student visa.

monash.edu/study

Gain credit for prior learning
Many of our master’s programs offer you block credit on the basis of your education background.

1-year programs

I want to undertake a master’s program in the same discipline

AN INTERNATIONAL EXPERIENCE

If you’re passionate about tackling global challenges and collaborating with some of the brightest minds in your discipline area, then Monash is the place where your ideas and actions can gain momentum.

Our graduate degrees will give you the edge in the employment market and prepare you for the professions of the future, both in Australia and overseas.

Our industry-relevant courses are embedded with the leadership, entrepreneurial and commercialisation skills that will advance your career.

You can take a semester at the University of Warwick in the UK, undertake master’s units at the Monash Centre in Prato, Italy, or complete a double master’s program with one of our international partners.

Globally connected, our alumni network is at the forefront of social and technological progress at many of the world’s best companies.

If you aspire to make a positive impact in the world, you’ll find Monash learning is all about discovery, creativity, challenge and opportunity.

Get ready to see the world

International placements
Choose from a range of international placements – Asia, Africa, Europe, US.

Overseas internships
Intern at the United Nations, New York, or Shandong Television in China – just two of many options.

Monash Malaysia
Our Monash Malaysia campus offers students from Australia and Malaysia the opportunity to spend a semester away from their home campus or apply for inter-campus transfer.

Monash Prato, Italy
Study at the Monash Prato Centre in Italy – offerings include art, design, architecture, Italian and law.

Connect
Connect with 330,000 alumni across the globe.

DID YOU KNOW?

With approximately 77,000 students and 330,000 alumni from more than 170 countries, Monash is Australia’s largest university.

GRADUATE COURSES 2019
OUR CAMPUSES

Monash has four Melbourne-based campuses, specialised teaching locations in Melbourne’s CBD, as well as international campuses and study centres.

Each Monash campus has its own personality, and all are friendly, respectful and welcoming communities where you’ll feel at home.

We have a campus in Malaysia, a joint graduate school in China, a learning centre in Italy, and a research centre in India. We also deliver awards at other locations with partners such as Laureate International in South Africa.

monash.edu/campuses

Melbourne CBD
Study law at the heart of the Melbourne legal precinct. All graduate law courses are taught at the Monash Law Chambers located at 555 Lonsdale Street, within walking distance of the Magistrates’, County and Supreme courts. The Law Chambers provides independent study spaces specifically designed for working professionals.

Clayton
Live, study and play at Clayton. Designed to give you everything you need in one place, Clayton is our largest campus with more than 36,000 students. You’ll learn alongside students from eight of Monash’s 10 faculties. You could be lunching with linguists or playing football with physicists. Make friends, find study partners and expand your mind.

Beautiful natural features such as the Rainforest Garden or the Lemon-scented Lawn complement on-campus arts spaces, sporting facilities and a variety of food and drink outlets. With every amenity close by, Clayton is a university town.

Caulfield
Caulfield, our second-largest campus with more than 17,000 students, is a hive of collaboration and creativity for fine arts, design and architecture, business and journalism. It’s also home to the Monash University Museum of Art (MUMA). Cafés, sporting facilities and a newly refurbished library surround the central Campus Green, a focal point for student gatherings. Next to the campus you’ll find a large supermarket and a variety of restaurants. Caulfield train station, a public transport hub, is just metres away, taking you to the city in less than 20 minutes.
Parkville

Parkville, our specialist pharmacy and pharmaceutical sciences campus with more than 2000 students, is in the heart of Australia’s top health and biomedical precinct. Our neighbours include major hospitals, the Walter and Eliza Hall Institute, the Howard Florey Institute, CSL Limited, the Ludwig Institute for Cancer Research and CSIRO’s Division of Health Sciences. Surrounded by parks, it’s a short tram ride from central Melbourne and within walking distance of the vibrant inner-city suburbs of Carlton and Brunswick, which have contributed much to Melbourne’s artistic and multicultural soul. It’s also home to our research arms, the Monash Institute of Pharmaceutical Sciences and the Centre for Medicine Use and Safety.

Peninsula

Monash University’s Peninsula campus is part of a vibrant, integrated health and education precinct, providing excellent education to approximately 4000 students and undertaking innovative research with our partners, especially in the areas of allied health and primary care. Courses are offered by the Faculty of Medicine, Nursing and Health Sciences, the Faculty of Education, and the Monash Business School.

DID YOU KNOW?

Studying at Caulfield but want to take some units at Clayton? Most of our Melbourne campuses are connected via a network of free shuttle buses. Many students who study at Caulfield live on the Clayton campus.
Live on campus at Monash for a convenient, focused and supportive environment designed to allow the disciplined study necessary to complete a graduate-level course.

Monash Residential Services (MRS) offers specific floors dedicated to graduate students. Some buildings have dedicated graduate lounges and other facilities that foster collegiality and recognise the needs of our more mature students.

Want to go for a swim? The pool is next door. Grocery shopping? The supermarket is a five-minute walk away. Banks, cafés, restaurants, parks, libraries, sporting facilities and a cinema – they’re all within easy reach.*

Living on campus is a great way to experience university life. Make new friends, be part of the Monash community and take the stress out of searching for a place to live.

Our residential support teams are always on hand to assist with any issues with campus living to help you stay focused on your studies. Monash on-campus accommodation is available at Clayton and Peninsula campuses. Applying is free, so book early to secure your place.

*Applies only to Clayton campus.

monash.edu/accommodation

DID YOU KNOW?
Living on campus is less expensive than comparable private rentals when you factor in all the inclusions. You get a fully-furnished apartment with all utilities and internet included. To view contract rates and dates, visit monash.edu/accommodation/accommodation/pricing

Off-campus accommodation
Not interested in living on campus? There are plenty of off-campus options. For further details and assistance, visit monash.edu/accommodation/accommodation/off-campus-options

If you need help deciding or advice on how to get started, call us on 1800 666 274 or send us a query online at ask.monash

We’ll be happy to help you with any questions you may have – not just before you arrive, but throughout your entire time at Monash.
SUPPORT SERVICES

At Monash, it’s not just about the course. You’re at the centre of everything we do.

We offer you careers counselling, academic support, health and wellbeing services, professional development opportunities and family support. We can even help you find somewhere to live. You can also take advantage of academic support services and modern study facilities designed specifically for graduate students.

monash.edu/study/student-life

**Academic support**

During your studies, you can access academic support programs to improve your written and oral expression, reading, listening and note-taking skills. Tutors are available to guide you through research methodology, conference presentation and the best way of submitting academic papers.

monash.edu/counselling/academic-support

**Monash Connect**

Monash Connect can advise you on anything from admissions, enrolment, fees, academic support, language support, graduations and scholarships. Student service centres are located on all Australian campuses.

monash.edu/connect

**Monash Postgraduate Association (MPA)**

As a Monash graduate student you’ll automatically become a member of the Monash Postgraduate Association, which provides services for graduate students including social functions, newsletters and publications, advice, advocacy and mediation, and seminars to help you transition from study to a successful career.

mpa.monash.edu

**Dedicated learning spaces**

We value the work of our research students and have invested in purpose-built facilities that reflect this. The PhD Hub in Building 88, 27 Sports Walk, Clayton campus, is open 24/7 to all graduate research students, while the Graduate Student Hub in Building 89, 21 Sports Walk, Clayton campus, is open from 7am to midnight for our graduate coursework and research students. In addition to these spaces, there are a number of central facilities dedicated to graduate students across our Clayton, Caulfield and Peninsula campuses.

monash.edu/graduate-research/current-students/graduate-spaces

**Monash Professional Pathways**

Through a combination of classroom-based programs (courses) and industry-based learning experiences (internships), Monash Professional Pathways supports those seeking professional experience and careers in Australia. Through us, graduates are better able to secure employment in their chosen fields and perform to employer expectations in their roles.

monashprofessional.edu.au

**Personal support**

**Career guidance**

Take advantage of our career development programs and individual career counselling.

monash.edu/careers

**Family support**

Monash University is proudly committed to supporting staff and students with family responsibilities by providing discounted fees at four quality childcare centres across Clayton, Caulfield and Frankston. Check the centres’ websites for further details, and to organise a tour of the facilities.

monash.edu/childcare

**Monash Sport**

Monash Sport offers a wide range of group fitness classes, gym memberships, aquatic activities and competitive or social sports.

monash.edu/sport

**Wellbeing**

Each Monash campus features a health, wellbeing and development hub with counsellors, medical practitioners, student advisers and a team of people from different faith communities to support you in all facets of university life — from accommodation and financial aid to life balance issues.

monash.edu/health

**Disability support services**

If you have a disability or medical condition that impedes your study, the Equity and Diversity Centre will help you access services such as learning support, assistive software or equipment loans.

monash.edu/disability

**DID YOU KNOW?**

Every Monash campus has a security office that is staffed 24 hours a day. Members of the security team are friendly and always ready to provide help and safety advice. They’re also happy to escort you anywhere on campus at any time of the day or night.

ART, DESIGN AND ARCHITECTURE
The Master of Architecture will equip you with the core skills and knowledge required to become a qualified architecture professional.

This is an advanced specialist course leading to registration as an architect. You’ll graduate ready to respond to the dynamic needs of contemporary built environments.

You’ll gain specialist knowledge in architectural design, theories, practices and evolving construction methods, and develop critical and conceptual skills to address relevant global issues such as sustainability, density, affordability and social responsibility. Through a diversity of architecture design studios and study units, you’ll have the flexibility to explore areas of architecture of interest to you. Throughout the course you’ll collaborate with relevant stakeholders on real projects and develop transferrable skills to become an independent entrepreneurial design professional and work as a key member of multidisciplinary teams to shape the future.

The Master of Architecture meets the academic requirements for registration as an architect in Australia. To register as an architect, you must also complete two years of professional practice and pass the AACA Architectural Practice Examination. For more details, please visit the Architectural Registration Board of Victoria website at www.arbv.vic.gov.au

**Entry requirements**

Depending on your prior qualifications and experience, you’ll be eligible for entry credit, which reduces the duration.

**ELIGIBILITY**

<table>

1. Selection is based on previous academic achievement. Applicants must also provide a compilation of evidence of creative engagement through any media, a current curriculum vitae and a statement of intent.
2. Selection is based on previous academic achievement, completed within five years. Applicants must provide a folio demonstrating their range of architectural skills. Shortlisted applicants may be invited for an interview.
3. Students who have successfully completed the Bachelor of Architectural Design at Monash University will automatically progress to the two-year Master of Architecture.

**DID YOU KNOW?**

MADA now offers two pathways into the Master of Architecture. See the entry requirements table for more information.

**DID YOU KNOW?**

Australia is a signatory to the Canberra Accord, which recognises the substantial equivalency of accreditation or validation systems in architectural education of the following agencies or organisations:

- Commonwealth Association of Architects (CAA)
- Canadian Architectural Certification Board/Conseil canadien de certification en architecture (CACB-CCCA)
- Acredidadora Nacional de Programas de Arquitectura y Disciplinas del Espacio Habitable/Comite para la Practica Internacional de la Arquitectura (ANPADEH/COMPIAR)
- Acracia Korean Certification Board (KAAB)
- National Architecture Accrediting Board (NAAB) (U.S.)
- The National Board of Architectural Accreditation of China (NBAA)
- The Royal Australian Institute of Architects (RAIA).

In addition to this, Monash’s Master of Architecture is recognised in:

- Malaysia by the Board of Architects Malaysia
- Singapore by the Singapore Board of Architects.
A professionally-focused program of advanced study in contemporary design practice to help you become a leader in your field.

This program is ideal for those keen to enter the expanding fields of professional design engagement, or design practitioners aiming to upgrade their expertise. You’ll be trained in advanced design thinking and processes that will equip you to create design solutions that engage experiential, communication, object and spatial contexts.

**Entry requirements**

Depending on your prior qualifications and experience, you’ll be eligible for entry credit, which reduces the duration.

**Collaborative design**

Collaborative design places you conceptually and practically at the intersection of interior, graphic and industrial design practice. The program will set you design challenges involving image, text, products, narratives, systems, services, public and private space, materiality and virtuality. You’ll develop independent conceptual and practical design skills alongside an ability to be part of collaborative design processes. You’ll expand your awareness across design disciplines; develop multidisciplinary design expertise; and build broader skills in leadership, professional adaptability and complex project planning.

**Interaction design**

The interaction design specialisation develops your skills in the design of contemporary artefacts, products and services that engage with interactive, user-focused technologies and processes. These can include, but aren’t limited to, health and medical equipment, ‘smart’ furniture, educational toys, wearable technologies, information kiosks and transport systems. You’ll use a diverse range of interactive processes, including the application of advanced technologies; electronics and programming; physical and virtual interface manipulation; engineering and material fabrication; and rapid prototyping. The specialisation gives you an understanding of the relationship between interactive activities, products and human behaviour.

**Multimedia design**

Multimedia design develops your skills in digital communication environments. This includes designing for the web; motion and animation; and interactive touchscreen devices and surfaces. Emphasising an advanced knowledge of existing and emerging digital design processes and systems, this specialisation embraces projects of varied scale, from hand-held smart devices to large public interactive screens. It develops your ability to build a communication narrative; use multimedia processes to fill community and business needs; and understand the end-user’s engagement with projects or products such as websites, apps and other screen-based media.

**Specialisations**

**Advanced studies in design**

This pathway allows you to construct, with approval, an individual program of study from across interaction design, multimedia design and collaborative design. This enables you to tailor your unit choices while addressing the fundamental principles of advanced design practice and thinking. It’ll inspire you to connect research and practice across the design disciplines, and to become a thoughtful design practitioner. You’ll broaden your knowledge of key design constructs, deepen your professional learning in design areas of interest, and advance your capacity as a design professional.

**DID YOU KNOW?**

Monash Art, Design and Architecture is the only Australian university to receive a 5, the highest possible ranking, in Visual Arts (Excellence in Research Australia Outcomes Report, Australian Federal Government, 2015).
URBAN PLANNING AND DESIGN
Professional Entry Master’s

Shape the way communities, towns and cities respond to dynamic global challenges.

With our new Master of Urban Planning and Design, you’ll acquire skills in shaping the built and natural environments of cities. The course will equip you with specialist knowledge in planning enriched by an understanding of design processes. This will develop your ability to think critically and creatively in addressing complex urban planning problems – key skills desired by employers of the future.

Guided by experienced academics and practitioners, you’ll explore issues relevant to the growth and transformation of cities through four research themes: Compact City, Ecological City, Sprawling City and Inclusive City. The majority of your study time will be spent on real-world projects. Working with industry, government and local communities, you’ll investigate solutions to some of the world’s pressing problems.

Through the Ecological City theme, you might focus on the impact of rising sea levels on seaside suburbs and towns; and through the Sprawling City theme, you might investigate the future of local food supplies due to the loss of prime agricultural land to residential housing. Our practice-based, applied approach will also help you develop the organisational, interpersonal and communications skills required by the busy urban professional.

In addition to our comprehensive urban planning program, you can customise your course and add breadth to your learning with a wide range of electives available across Monash University.

We invite applicants from backgrounds as diverse as architecture, landscape architecture, engineering, economics and geography. On graduating you could pursue a career in government departments and agencies, and in planning practices in Australia and around the world.

Note: This course is in the process of applying for accreditation by the Planning Institute of Australia (PIA).

Entry requirements
An Australian undergraduate degree (or equivalent) with at least a credit average (60 per cent) and an up-to-date curriculum vitae. Applications will be reviewed and successful candidates will be shortlisted for an interview.

COURSE CODE: F6004

“MADA is an incredibly engaged and energised group of architects, artists and designers working on some of the most challenging urban issues in Australia. I’m excited to bring urban planning into this environment. The new Urban Planning and Design program will enable students to engage in immersive, collaborative and hands-on experience to tackle real-world urban issues.”

PROFESSOR CARL GRODACH
Director, Urban Planning and Design
APPLIED LINGUISTICS

Expert Master’s

Applied linguistics is one of the fastest-growing fields of study in the humanities.

As globalisation expands, so does the demand for those with intercultural communication skills to reach wide audiences. The course offers a competitive advantage to language teachers, interpreters, editors and others working with language in increasingly multilingual and multicultural societies. You’ll gain a critical understanding of theoretical and practical issues relating to applied linguistics, including second language acquisition, language teaching, language contact and intercultural communication.

Entry requirements
Depending on your prior qualifications and experience you’ll be eligible for entry credit, which reduces the duration.

TAILOR YOUR OWN ARTS MASTER’S DEGREE

From Semester 1 2018, students enrolled in an Arts master’s by coursework program will have the option of tailoring their course by taking electives from another Arts master’s by coursework program.

To be eligible, students must be enrolled in the 96-credit-point (two years full-time) program in order to take 24 credit points of specified electives from another Arts master’s by coursework program.
BIOETHICS

A response to increasing community concern about ethical issues created by scientific discoveries in the health and biological fields.

Taught through the Monash Bioethics Centre (one of the World Health Organization’s six collaborating centres worldwide), you’ll work with expert staff who are internationally-recognised leaders and active, prominent contributors to public and professional discussions about a variety of issues in the field. You’ll have the opportunity to collaborate with industry and participate in study tours and field schools, both in Australia and overseas. The Master of Bioethics is particularly well-suited to health care professionals and scientists who face complex ethical issues in their working lives. It also offers skills development for those formulating related public policy and law, as well as for anyone wanting to explore issues of public concern. Your course takes a broad approach to key issues such as ethical theory, questions of life and death, ethical issues in patient care, human-research ethics, legal and policy issues in bioethics, and ethical issues in professional life. It’s suitable for those with little or no background in ethics or philosophy, and also for philosophy graduates with an interest in further study of bioethics.

Entry requirements

Depending on your prior qualifications and experience, you’ll be eligible for entry credit, which reduces the duration.

DID YOU KNOW?

As a Monash Master of Bioethics student you can apply for an annual fellowship to work as an intern in the Global Health Ethics Unit at the World Health Organization headquarters in Geneva, Switzerland.
COMMUNICATIONS AND MEDIA STUDIES

Expert Master’s

As the most established program of its type in Australia, the Master of Communications and Media Studies has a long record of success.

The program draws strongly on specialist expertise and focuses on fostering industry-ready graduates. You’ll be introduced to the latest developments and research in communications and media – including social and online media – always with a view to real-world application. The course features guest professional speakers in conjunction with industry-focused field trips to media outlets in Sydney, Melbourne, New York and Shanghai. You’ll have the opportunity of industry internships in Australia and overseas. For example, students in our program have recently completed internships with the United Nations in New York, and with Shandong Television in China. The course is ideal for those working or seeking employment in communications and media industries – for instance, electronic journalism, media strategy, public relations or brand marketing. The course also has a research option that can be a gateway to a further higher degree such as the PhD.

Entry requirements
Depending on your prior qualifications and experience, you’ll be eligible for entry credit, which reduces the duration.

**ELIGIBILITY (in equivalent Australian qualification terms)** | **Duration (years)**

3. Related fields include humanities or social sciences.
4. Qualification/experience or satisfactory substitute that the faculty considers to be equivalent.
5. Australian graduate certificate (or equivalent) in a related field.

Cultural and Creative Industries

Expert Master’s

This exciting course provides you with an overview of the rapidly growing cultural and creative industry sector, and its many employment opportunities.

You’ll gain a detailed understanding of this dynamic sector in close contact with a range of industry professionals and real-world projects from Australia and overseas. Whether exploring creative clusters in Melbourne and Shanghai, assessing festivals in rural Africa or understanding the business models of global digital industries, our diverse content will prepare you for emerging careers as the sector grows.

The course is intended for those who want to work in the arts, cultural and creative industries; in the public, independent or commercial sectors; in cultural policy and industry governance; in urban cultural regeneration and branding; or in culture and development projects.

FAMILY VIOLENCE PREVENTION
Graduate Certificate

This course gives you the opportunity to deepen your skills and understanding of key social frameworks underpinning domestic and family violence.

The course will build skills in a range of practice areas covering child safety, men’s behaviour change, health impacts of family violence, family violence in the criminal justice system, and working with victims and survivors. The knowledge and skills you’ll gain by completing this course are transferable across a wide range of professions and occupations where workers encounter domestic and family violence issues.

Designed to deliver specialised expertise in the area of family violence prevention, the course objectives focus on the requisite knowledge, skills, attitudes and values required of skilled practitioners working in a range of fields where family violence prevention is or will be occurring. Critical units focus on understanding the social underpinnings of family violence and criminal justice responses, as well as the role of health systems in the prevention of family violence.

On successful completion of the graduate certificate, you may be eligible for admission into the Graduate Diploma of Family Violence Prevention.

Entry requirements
You must have successfully completed a recognised bachelor’s degree or equivalent qualification with a 60 per cent average. Alternatively, applicants with five years relevant full-time informal learning, with a recommendation letter or reference from an employer, will be considered on a case-by-case basis.

FAMILY VIOLENCE PREVENTION
Graduate Diploma

This course delivers specialised expertise in the area of family violence prevention, while providing you with practical experience.

In the first half of this course you’ll build skills in a range of practice areas, including child safety, men’s behaviour change, health impacts of family violence, family violence in the criminal justice system, and working with victims and survivors.

You’ll then undertake real-world learning opportunities, building skills and competencies required in particular domains of family violence prevention work such as law and primary medical responses to family violence.

The diploma concludes with a placement unit/practicum that will expose you to family violence prevention practice, and develops skills professionals need to respond critically to the current and future needs of their industry.

The knowledge and skills you’ll gain by completing this course are transferable across a wide range of professions and occupations where workers encounter domestic and family violence issues.

Entry requirements
You must have successfully completed a recognised bachelor’s degree or equivalent qualification with a 60 per cent average. Alternatively, applicants with five years relevant full-time informal learning, with a recommendation letter or reference from an employer, will be considered on a case-by-case basis.
Tackle the complex political, economic, cultural and ecological challenges that lead to extreme poverty, poor health, fragile governance, inequality and environmental vulnerability.

Delivered by specialists from the humanities, social sciences, medicine, business, education and law, the course offers a broad approach to sustainable development with four streams: democracy, justice and governance; gender, conflict and security; crisis, change and management; and sustainable resource management. There are opportunities for fieldwork, study abroad and internships at sites of significant development practice in countries such as South Africa, Vietnam, Thailand, India, Indonesia and Fiji.

The course is designed for those working, or planning to work, in areas such as human rights advocacy; aid agencies in government and non-government sectors; non-government organisations; the Fair Trade business sector; community organisations; and international institutions such as the United Nations and the World Bank.

“Monash stood out to me because it was very practical about how you apply what you learn. There were lots of opportunities to get practical experience and skills in project management and research and development.”

AMANDA TAYLOR  
Master of International Development Practice
Our world is shaped by big questions about global justice, war, peace, social movements and interstate relations. The Master of International Relations gives you the skills to deal critically and analytically with such questions, providing a window into the dynamic world of 21st-century politics. The course explores the security, ethical, legal and economic dimensions of international relations. You’ll look at key issues in foreign policy, world order, European studies, crisis management and terrorism, as well as the gender, development, migration and governance aspects of global politics. Our graduates have gone on to a broad range of occupations at organisations including the United Nations, Australian government departments (DFAT, defence, attorney general), International Red Cross, Australian Federal Police, Australian Trade Commission and ASEAN Ministry of Foreign Affairs.

Entry requirements

Depending on your prior qualifications and experience, you’ll be eligible for entry credit, which reduces the duration.

Specialisations

**Advanced international relations**
Tailor your studies to suit your interests or needs while addressing the fundamental debates surrounding global politics. By selecting subjects across the range of available specialisations, you’ll be able to examine key issues in foreign policy, international and comparative governance, world order and security, human rights, European studies, crisis management, diplomacy and trade, or terrorism.

**Governance and security**
This provides you with a comprehensive understanding of how power, authority and participation is managed within and among states, as well as challenges to this domestically and internationally. You’ll focus on the practical applications of governance, institutions and the rule of law, and how it works in the global environment.

International diplomacy and trade
This specialisation is designed for those at the start of their working life, as well as those working in the field who want to further their careers in international public policy, NGOs and government departments such as the Department of Foreign Affairs and Trade. You’ll advance your knowledge of international trade, diplomacy and international law.

Political violence and counter-terrorism
Engage with the ideologies and conditions that give rise to political violence. You’ll focus on understanding terrorism and political extremism, the conditions associated with preventing and combating political violence, and the effects of these activities on democratic and civil liberties.

Double master’s with Master of Journalism
If you’re looking to enter the field of professional journalism, a Master of Journalism and Master of International Relations double degree provides a comprehensive introduction to the international political system. See page 25 for more information.

Double master’s with Shanghai Jiao Tong University, China
Offering a truly international perspective, this double-degree course immerses you in two cultures. It combines the Master of International Relations at Monash with the Master of Arts in Chinese Politics and Economy from Shanghai Jiao Tong University. Completed entirely in English, you’ll study one year at Monash University in Australia and one year in Shanghai. On successful completion, you’ll not only have the invaluable international insights this experience offers, but you’ll also graduate with degrees from both universities.
INTERNATIONAL RELATIONS AND JOURNALISM

Expert Double Master’s

Keen to further focus your interests and aspirations? This double-degree course could be for you.

You’ll complete one of the specialisations offered within the Master of International Relations for a comprehensive introduction to the international political system and key issues in international relations. You’ll also take on the main components of the Master of Journalism, giving you the chance to enter the journalism industry or, if you’re already part of the media, to extend your expertise.

The course’s national and international orientation means you’ll use a full range of media technologies and gain insights into approaches to international relations. With an overlap or reduction of electives taken, the overall duration of completing the two degrees is reduced.

Entry requirements
Depending on your prior qualifications and experience, you’ll be eligible for entry credit, which reduces the duration.

INTERNATIONAL SUSTAINABLE TOURISM MANAGEMENT

Expert Master’s

Sustainability is increasingly influencing tourism planning, development, governance and management as the industry expands.

With the growth rate of emerging economies doubling that of advanced economies in the years leading to 2030, sustainable tourism is playing a leading role in the United Nations Millennium Development Goals. This course meets the growing demand for specialists in tourism planning, marketing and industry management who not only have a deep understanding of global business activity, but also clear insights into the effects of planning and policymaking on the environment, society, culture and the economy. You’ll be able to take part of your studies overseas, broadening your understanding of the international market and the role that sustainable tourism can play in emerging economies.

Entry requirements
Depending on your prior qualifications and experience, you’ll be eligible for entry credit, which reduces the duration.

GRADUATE COURSES 2019 25
INTERPRETING AND TRANSLATION STUDIES
Professional Entry Master’s

Develop your practical and theoretical skills in translation and interpreting in English and a second language chosen from Chinese, French, German, Indonesian, Italian, Japanese, Korean, Russian or Spanish.

This course is endorsed by NAATI (National Accreditation Authority for Translators and Interpreters) for the following certification levels: Certified Translator, Certified Advanced Translator, Certified Interpreter, Certified Specialist Interpreter (Legal), Certified Specialist Interpreter (Health) and Certified Conference Interpreter.

Monash is also the only university in Australia to be a member of the Conférence Internationale Permanente d’Instituts Universitaires de Traducteurs et Interprètes (CIUTI), the world’s oldest and most prestigious international association of tertiary institutions offering degrees in translation and interpreting. We offer two specialisations: translation, and interpreting and translation.

Entry requirements
Depending on your prior qualifications and experience, you’ll be eligible for entry credit, which reduces the duration.

ELIGIBILITY
(in equivalent Australian qualification terms)

3. Related fields include humanities or social sciences.
4. Qualification/experience or satisfactory substitute that the faculty considers to be equivalent.
5. Australian graduate certificate (or equivalent) in a related field.

Specialisations
Translation
This prepares you for work in areas where written translation and writing skills are needed, such as literary and cultural translation, cross-cultural communication, business, law, science and technology, publishing, editing or journalism. You’ll work from your second (‘B’) language into your first (‘A’) language. You’ll also develop your research methods, giving you the chance to pursue doctoral studies in translation studies if desired.

Interpreting and translation
This prepares you for work in areas where interpreting (i.e. verbal translation) and cross-cultural skills are required, such as in health care, law, business or education settings, as well as international diplomacy and conferences. Training is bi-directional in the two languages, and you’ll need to be able to fluently converse in both.

DID YOU KNOW?
The Monash Master of Interpreting and Translation Studies is endorsed by the National Accreditation Authority for Translators and Interpreters (NAATI) at the highest possible levels. (NAATI sets the industry standards for translation and interpreting in Australia).

INTERNATIONAL DOUBLE MASTER’S PROGRAMS
The Master of Interpreting and Translation Studies can also be taken as part of a double degree program with an international partner in France, Italy or Japan.

This international double degree program immerses you in two cultures, with one full year in Australia and another at the partner university. You’ll complete the requirements of the Monash Master of Interpreting and Translation Studies (MITS), as well as a second degree with one of the following universities: Jean Moulin Lyon III (French, specialising in translation); Kobe City University of Foreign Studies (Japanese, specialising in interpreting and translation); Universitas Trieste (Italian and either French, German or Spanish, specialising in translation or in interpreting and translation).

See future.arts.monash.edu/ mits/double-degrees for further information.
JOURNALISM

Expert Master’s

The journalist of the future will play a crucial role in society by scrutinising and holding to account those in power, shedding light on systemic failings and finding the truth.

If you want to enter this rapidly changing industry, or you’re a part of the media and want to extend your expertise, the Master of Journalism is right for you. Working with award-winning journalists and academics with outstanding industry links, you’ll gain expert skills in research and reporting in print, digital, radio and video, and explore the media’s evolving role in society. Our innovative media labs allow you to build practical and applied skills in all media forms. There are excellent internship opportunities in a wide range of media outlets, from mainstream newspapers to niche websites specialising in areas such as politics, arts or fashion.

Monash journalism graduates are smart, skilled and ready. Media employers seek them out, and graduates have found work across major media outlets as well as in industries such as public relations, publishing and video/audio production.

Entry requirements

Depending on your prior qualifications and experience, you’ll be eligible for entry credit, which reduces the duration.

1. Selection is based on previous academic achievement. Credit average is required.
2. Even if you’re eligible for entry credit, you don’t need to take it. You may apply for and complete the longer duration.
3. Related fields include humanities or social sciences.
4. Qualification/experience or satisfactory substitute that the faculty considers to be equivalent.
5. Australian graduate certificate (or equivalent) in a related field.

Field schools

You’ll also have the opportunity to add an international perspective to your studies with the chance to observe how change and innovation are sweeping through newsrooms around the globe. Field trips to New York and Hong Kong involve visits to some of the world’s most prestigious media organisations, including the New York Times, Buzzfeed, Bloomberg and many others. You’ll learn first-hand how newsrooms are adapting to the pressures of changing consumption patterns, delivery platforms and business models. How do you become a media practitioner in the contemporary era? How are news values shifting to capture contemporary audiences?

DOUBLE MASTER’S PROGRAMS

Double master’s with Master of International Relations

This double-degree program is designed to optimise the contribution you can make as a journalist in the international field, using a full range of media technologies as well as insights into approaches to international relations. You’ll graduate with both the Master of Journalism and the Master of International Relations.

Double master’s with the University of Warwick, UK

In this double-degree program you’ll complete one year of the Master of Journalism at Monash, then undertake the taught component of one of the nine available Politics and International Studies (PAIS) programs in the Master in Arts (MA) degree at Warwick. You’ll conclude your studies with a joint dissertation (to be taken at either Monash or Warwick) with a supervisor from both Monash and Warwick. Upon successful completion, you’ll receive a Master of Journalism from Monash and a Master of Arts in Politics and International Studies from Warwick.
After completing a Bachelor of Arts in cultural anthropology at Monash, including her final semester abroad in Hawaii, Tiffany Korssen went on to study a Master of Journalism. In 2015, she completed an internship with the *Herald Sun* as part of her master’s course, and is now employed there as a journalist. “I really loved my summer intensive subject. We went to New York and Washington DC, visited Buzzfeed, Associated Press, *Washington Post* and other places of interest, and saw how their newsrooms operated. That was an amazing experience and I really suggest everyone look into that.”

TIFFANY KORSSEN
Master of Journalism
PUBLIC POLICY
Expert Master’s

Develop your expertise to work in policy areas across both the public and private sectors, from government organisations, multi-nationals through to independent consultancies.

This degree builds practical knowledge and skills for international professionals in policymaking and management across the spectrum of public sector activities. Combining expertise from across the University (social sciences, health, law, science, urban planning, business and economics), the course will develop your understanding of the politics and processes of policy formation, the delivery of policy programs, and the political and structural realities that can impact on such decision-making. The course combines a focus on foundation knowledge and understanding of critical issues in public policy, governance and policy evaluation. Your studies will develop your advanced expertise in a policy area chosen from environmental policy, health policy, public finance management, regulation and policy, social policy or urban policy. You’ll be equipped for careers in public, not-for-profit or private sector agencies involved in policy and service delivery at intergovernmental, national or regional government levels.

Entry requirements
Depending on your prior qualifications and experience, you’ll be eligible for entry credit, which reduces the duration.

TOURISM
Expert Master’s

Global demand is rising for highly-skilled professionals in international tourism and related industries.

Our Master of Tourism course, Australia’s longest-running and most industry-focused graduate tourism program, prepares you for a career in tourism management, planning, policy and sustainable development. You’ll develop specialised skills in all aspects of the international tourism industry, including key sectors such as tourism marketing and destination management.

You’ll gain a global perspective on all forms of tourism and take part in industry-based workshops or an internship, as well as field trips to local and international destinations. Our program has excellent international networks and partners, and you may also wish to participate in an international student exchange semester at one of our prestigious partner universities in Sweden, Estonia or Latvia.

ACCOUNTING
Expert Master’s
Focus on specific fields of accounting, develop high-level expertise and take the next step in your career.

Developed for accounting graduates, our forward-thinking curriculum connects research and practice to give you a deep understanding of the latest applications. You’ll align your professional learning with your career goals or interests, with specialist studies in financial accounting, forensic accounting, auditing, management accounting, and accounting information systems.

By studying this course you may be eligible for exemptions towards Chartered Institute of Management Accountants (CIMA) papers, associate membership and entry to the CPA Program of CPA Australia, entry to the Chartered Accountants Program of Chartered Accountants Australia and New Zealand, and associate membership of the Institute of Public Accountants.

Entry requirements
Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration. You’ll need to prepare a candidate statement that shows you have the motivation and academic skills to successfully complete the program.

PROFESSIONAL ACCOUNTING
Expert Master’s
Complement your undergraduate studies and gain the fundamental skills to work in the accounting profession.

This course is well-suited to recent graduates and professionals in the early stages of their careers who have a bachelor’s degree in another field and are seeking a complementary professional accounting qualification. You’ll explore all aspects of business, financial and management accounting, and develop a strong understanding of key concepts, and gain expertise in current business practices. You may also qualify for membership with leading accounting institutions and industry bodies, such as CPA Australia, the Institute of Public Accountants, and the Institute of Chartered Accountants Australia and New Zealand.

Entry requirements
An Australian bachelor’s degree (or equivalent) in a non-accounting discipline with Weighted Average Mark (WAM) of 65 per cent or an equivalent GPA as determined by the faculty. You’ll be ranked and selected based on your entire academic record.

You must also submit a one-page candidate statement in which you’re required to demonstrate that you possess the motivation and academic skills required to successfully complete the program.

"I’ve been pleasantly surprised by the student-centred environment that the University offers. I feel comfortable raising questions and having respectful debates, which has been critical to my learning within this course. I encourage anyone considering a graduate degree to make the most of their time and to make as many connections as possible. You’d be surprised by how much learning you can achieve just by reaching out."

TRINH NGUYEN
Master of Professional Accounting and Master of Business Law
PROFESSIONAL ACCOUNTING AND BUSINESS LAW
Expert Double Master’s

This advanced double degree will develop your skills to address the wide range of legal issues in contemporary business.

You’ll focus on specific fields of accounting practice alongside study of the legal environment and its effect on business practice in corporate governance, financial regulation, compliance and taxation. This course is designed for those who need specialist legal knowledge in their roles, such as those in regulatory, compliance or risk-management positions, and who want to combine this knowledge with an advanced accounting qualification.

Entry requirements
An Australian bachelor’s degree (or equivalent) in a non-accounting discipline with a Weighted Average Mark (WAM) of 65 per cent or an equivalent GPA as determined by the faculty. You’ll be ranked and selected based on your entire academic record.

You’ll also need to prepare a candidate statement that shows you have the motivation and academic skills to successfully complete the program.

ACTUARIAL STUDIES
Expert Master’s

Be ready to practise as an actuary across actuarial or risk management fields and develop your wider business awareness skills, including communication and critical thinking.

Designed for technical, mathematical and scientific graduates, as well as professionals in the early stages of their careers, you’ll broaden your knowledge of key mathematical learning constructs and gain the skills and professional values to become an effective actuary. The course deepens your understanding of specialist areas of actuarial practice and may include exemptions for Parts I and II of subjects of the Institute of Actuaries Australia.

Entry requirements
Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration.

You should be aware that the granting of exemptions from particular subjects may affect your ability to gain Actuaries Institute accreditation.

APPLIED ECONOMICS AND ECONOMETRICS

Expert Master’s

Develop your career in economics or econometrics, gain the analytical and technical skills required for the profession, and establish a solid grounding in commerce.

You can build your knowledge in one of three specialisations: applied econometrics; applied economics and econometrics; or business economics. With a comprehensive theoretical and practical curriculum across your chosen field, you’ll develop expertise in applied economic and econometric tools. You’ll also have the opportunity to undertake independent research in your specialisation.

Entry requirements
Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration.

¹ Selection is based on previous academic achievement. Applicants wishing to complete the applied econometrics or applied economics and econometrics specialisations must have achieved a result of at least 70 per cent (or equivalent) in a first-year undergraduate statistics course.
² Even if you’re eligible for entry credit, you don’t need to take it. You may apply for and complete the longer duration.
³ Related fields include economics, econometrics and business statistics.
⁴ For example, by a relevant graduate certificate.

Specialisations

**Applied econometrics**
This specialisation focuses on the econometric and statistical analysis tools required in the business, economics and finance sectors. You’ll develop econometric techniques across applied econometrics, time series analysis, financial econometrics, macro-econometrics and micro-econometrics. You’ll also be able to design and implement applied econometric projects for the government and business sectors.

**Applied economics and econometrics**
You’ll learn how to use economic or related theory and econometric models for assessing economic and public policies, and develop the knowledge and research experience to seek jobs in the private, public or institutional sector as an economist.

**Business economics**
Gain advanced knowledge of the theories analysing economic policies – focusing on how individuals, households, firms and governments interact and how economies work, with an emphasis on economic regulation. Designed for those who want to develop expertise in applied economic tools as well as undertake independent research, this specialisation extends your knowledge of economic analysis in the global economy. You’ll also be able to focus on areas of business strategy, competition policy, economic policy, project evaluation, pricing, and risk and regulation.
APPLIED FINANCE
Expert Master’s

If you’re a finance professional keen to add to your skills, this course allows you to tailor your learning to your career aspirations.

Focus on specialist areas of finance through advanced studies in global financial markets, funds management, financial planning, money market dealing and business forecasting.

You’ll learn from leading academics in the field of finance as well as industry experts. Our renowned Simulated Teaching and Research Laboratory (STARlab) offers valuable practical trading experience. The course is also a CFA Program Partner of the CFA Institute, which awards the International Chartered Financial Analyst designation.

Entry requirements
Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration.

ELIGIBILITY (in equivalent Australian qualification terms) | Duration (years)
---|---
Bachelor’s degree with a major in finance with a Weighted Average Mark (WAM) of at least 65%, OR Bachelor’s degree in any field with a WAM of at least 65% + significant work experience in the finance industry | 1.5
Bachelor’s (hons) degree in finance with a WAM of at least 65% | 1

1. Selection is based on previous academic achievement. For further details, visit monash.edu/study
2. You’ll be ranked and selected based on your entire academic record.
3. Even if you’re eligible for a shorter course duration, you may elect to complete the longer duration.

BANKING AND FINANCE
Expert Master’s

Gain a thorough understanding of the banking and finance industry and develop your proficiency across areas such as portfolio management, money markets, financial management, bank lending and risk management.

Designed for people with limited previous knowledge of banking and finance or those who are wanting to enter the industry, this degree will help you develop a deep understanding of the banking industry, and have practical opportunities to apply your knowledge. You’ll also benefit by developing your theoretical knowledge, and strengthening your critical thinking and communication skills.

Entry requirements
Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration.

ELIGIBILITY (in equivalent Australian qualification terms) | Duration (years)
---|---
Bachelor’s degree in any field with a Weighted Average Mark (WAM) of 60% | 2
Bachelor’s degree in a related field or a graduate certificate in a related field with a WAM of 60%, OR Bachelor’s (hons) degree in any field with a WAM of 60% | 1.5
Bachelor’s (hons) degree in a related field with a WAM of 60% | 1

1. Selection is based on previous academic achievement. For further details, visit monash.edu/study
2. You’ll be ranked and selected based on your entire academic record.
3. Even if you’re eligible for a shorter course duration, you may elect to complete the longer duration.

Specialisations
Contemporary management
The business environment is a global, complex and, sometimes, uncertain one. To manage and lead in business today, you need a holistic understanding of contemporary issues and contexts. A good leader is a person who understands this changing environment, incorporates leadership trends and adopts transferrable management skills to harness change and get the best out of their people.

This specialisation focuses on leadership, innovation and communication in a cross-cultural, multifaceted environment. You’ll gain an understanding of managing diversity and inclusion, and learn how to shape your management and negotiation skills for today’s global workplace.

Entrepreneurship
Entrepreneurship is an important engine of growth in the economy. It’s associated with uncertainty, particularly when it involves creating something new for which there is no existing market. An entrepreneur is someone who has an idea and who works to create a product or service that people will buy, by building an organisation to support those sales.

Entrepreneurship in this specialisation is the study and application of how new businesses are created as well as the actual process of starting a new business.

International business
Operating with an international perspective is a vital skill across all facets of business. In this specialisation you’ll cover international management, law, finance, economics, marketing and strategy. You’ll also gain analytical and communication skills that can be applied in a variety of organisational settings, and you’ll understand how all aspects of business interrelate and coalesce in a global environment.

Specialising in international business will prepare you for global business roles across the corporate, governmental and non-profit sectors.

Monash Business School is one of the few business schools in the world to have achieved the esteemed ‘triple crown’ of business school accreditations.
“My favourite part of the course has been learning all about supply chain, which is my course specialisation. It’s been challenging, but I’m lucky to have such interesting and great teachers. A highlight of the course was visiting the GS1 head office and having guest speakers come in every week to talk about their experiences.”

HELENE BOURQUIN
Master of Business
The Graduate Certificate of Business gives you the chance to take your career in a new direction and explore a variety of business areas.

You’ll broaden your current skill set and have a strong foundation in your preferred discipline, with choices including marketing, public sector management, human resources, economics and more.

Entry requirements
An Australian bachelor’s degree (or equivalent qualification) with a Weighted Average Mark (WAM) of 55 per cent or an equivalent GPA as determined by the faculty. You’ll be ranked and selected based on your entire academic record.

BUSINESS ADMINISTRATION

Expert Master’s

The Monash MBA is a two-year program that incorporates classes, experience-based modules, consulting projects, and overseas learning and engagement opportunities.

Featuring modules on innovation, transformation and globalisation, the Monash MBA takes a strategic and practice-based approach to management development. It’s designed for ambitious young professionals with a minimum of three years’ business experience.

The MBA program brings together international and local students from a wide range of professional and cultural backgrounds, and is committed to a global orientation in all its activities.

Working closely with leading professors, business executives and project supervisors, you’ll consult directly with business organisations throughout the program. Live projects on strategy, technology development and entrepreneurship are designed into the curriculum, and an international business project and strategy capstone complete the journey.

Study is undertaken in a combination of daytime, evening, weekend and intensive modes, which allows you to continue to work while completing your program.

Entry requirements

> You must have completed an Australian bachelor degree or an equivalent qualification
> A minimum of three years’ work experience is required, with minimum one year of managerial experience. Generally, students in the Monash MBA have five-plus years of work experience.

Shortlisted applicants will be invited to an interview.

EXECUTIVE BUSINESS ADMINISTRATION

Expert Master’s

This intensive 15-month program features executive-style one-week residential modules and a series of weekend modules.

Designed for executives in diverse sectors and professions with a minimum of 10 years’ work experience, the program addresses complex, challenging, strategic issues in organisations.

The course aims to develop graduates who are global in orientation and who can lead organisations at a senior level. It emphasises contemporary business and organisational challenges, and provides an integrated approach to discipline-based academic content.

The module themes are globalisation, innovation and transformation. The projects, cases and materials are strategic, global and contemporary, and the program has the active involvement of senior industry leaders locally and internationally.

The three international modules are taught in leading business schools in Europe, Asia and America. International business consulting projects in high-tech sectors – advanced manufacturing, life sciences, digital transformation – are undertaken in these markets.

Entry requirements

> Applicants must have completed an Australian bachelor’s degree or equivalent.
> Applicants must have a minimum of 10 years’ work experience.
> Applicants should be working executives in Australia and able to utilise program learning in their role.

Shortlisted applicants will be invited to a panel interview.

COURSE CODE: B6017
GLOBAL BUSINESS
Expert Master’s

Gain a comprehensive understanding of the dynamic economic, political and social forces that affect and impact global business, and develop skills to function and operate in a global environment.

The Master of Global Business is designed to build on your work experience and your undergraduate credentials by further developing and strengthening your business skills and acumen.

This program advances your ability to address the global issues and challenges faced by business and society by improving your ability to critically analyse, problem-solve and develop solutions. These skills are further enhanced and developed through an appreciation of the global context and how it applies to business, strategy, government, diplomacy, trade, sustainability, social responsibility and intercultural communication. For those interested in further research within this domain, the Master of Global Business can also provide a pathway for students interested in a higher degree by research.

The Master of Global Business ultimately looks to produce graduates with a comprehensive and multidisciplined perspective of global business that enables them to not only better understand the contemporary global environment in which business operates, but just as importantly create and produce innovative solutions for the business, professional, social and public policy communities that they serve.

Entry requirements
Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration.

In addition to the requirements below, you’ll need to provide a one-page statement of purpose. The course director may also seek to interview an applicant.

2. Even if you’re eligible for a shorter course duration, you may elect to complete the longer duration.
3. For example, by a relevant graduate certificate.

Graduate Diploma

Address the key areas of contemporary HR practice, and increase your capacity to influence change and make logical judgments.

This course is best-suited to those who want to pursue graduate studies in HR, as well as HR professionals keen to formalise their education in the field.

Entry requirements

An Australian bachelor’s degree (or equivalent qualification). You’ll be ranked and selected based on your entire academic record, with an overall average of 55 per cent preferred and two years of work experience required.
**MANAGEMENT**

**Expert Master’s**

Sharpen your management, decision-making and problem-solving skills so you can move into senior managerial positions.

In this course you’ll grow your knowledge of key management constructs and transform how you lead by exploring dynamic organisational environments.

This course is well-suited to experienced professionals from a range of backgrounds, including government, community service and not-for-profit organisations, as well as those with technical backgrounds in engineering and medicine who are keen to move into management.

**Entry requirements**

Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration.

**MARKETING**

**Expert Master’s**

If you’re an experienced professional seeking the latest thinking and problem-solving skills in marketing, this course is for you.

Taught by leading academics and industry experts with a focus on contemporary concepts and issues, this course attracts many students from the corporate sector, giving you invaluable networking and knowledge-sharing opportunities.

The units are developed in consultation with our industry advisory board to promote leadership and expertise. The course timetable offers flexible study options to suit your busy work schedules and personal commitments. Some units are offered in intensive five-day blocks or two-day split blocks, in addition to evening classes. The range of elective units on offer also allows you to customise the course to suit your professional interests and career goals, and includes the opportunity to undertake a corporate project under supervision.

**Entry requirements**

Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration. In addition to the requirements below, you’ll need to provide your resume, including two referees and a one-page statement of purpose.

EDUCATION
COUNSELLING
Professional Entry Master’s

Providing you with a professional qualification and offering a combination of theory and professional experience, this course equips you with all you need to start a rewarding career as a counsellor.

The course suits those from a range of professions, such as human resources, health, social welfare and education, and is taught by academics with extensive experience working as counsellors and psychologists.

It draws on the latest thinking and approaches to counselling and psychotherapy to develop your understanding of the mental health issues that arise across a lifetime. You’ll examine the various forms of professional counselling, including online and distance counselling, child and adolescent counselling, and individual, couples and group counselling. The ethical and professional issues faced by counsellors will be introduced, and creative approaches to counselling will be examined, including play therapy and art therapy. You’ll also gain in-depth knowledge of contemporary cognitive-behaviour therapies.

You’ll have the opportunity to develop your skills by completing 300 hours of professional experience, which includes contact and non-contact hours. Non-contact hours include any counselling-related duties associated with the placement centre that don’t involve counselling clients. Contact hours include face-to-face, telephone, group and online counselling.

Sourcing and completing your placement requires a time commitment of approximately two days per week for most students. Our Professional Experience Office will assist you in securing your placement, but you also have the opportunity to source your own placement, and we encourage you to be proactive in finding an opportunity that meets your specific goals. Recent placements have included wellbeing settings within early childhood centres, schools and tertiary settings, community health centres, and organisations such as ARVCIC, Headspace, Launch Housing and Skillsplus.

Master of Counselling graduates work across many fields, including careers counselling, education, child and family services, child protection services, health policy, family counselling, health services management and rehabilitation counselling.

Entry requirements
Depending on your prior qualifications and experience, you’ll be eligible for entry credit, which reduces the duration.

3. Related fields include counselling, education, psychology, social work.

Professional recognition
This course is accredited in Australia by the Australian Counselling Association (ACA) and Psychotherapy and Counselling Federation of Australia (PACFA). It’s registered for delivery in Singapore with the Singapore Committee for Private Education (SCPE), and recognised by the Singapore Association for Counselling (SAC).

In Hong Kong, it’s registered with the Hong Kong Council for Accreditation of Academic and Vocational Qualifications (HKCAAVQ).
EDUCATION

Expert Master’s

This course addresses the professional learning needs of educators, educational administrators, managers, policymakers and others interested or involved in learning and education, both locally and internationally.

The course looks at learning in schools, workplaces and community, and connects research and practice to make you a stronger thinker, an engaged practitioner and an advanced specialist.

You’ll broaden your knowledge of key learning constructs and deepen your understanding in specialist areas.

You can graduate with a generic, broadly applicable qualification by choosing general education studies and selecting units to suit your requirements, or choose one of the specialisations and gain a qualification highlighting your particular expertise.

Entry requirements

Depending on your prior qualifications and experience, you’ll be eligible for entry credit, which reduces the duration.

Flexible delivery

A flexible course delivery allows you to continue working while completing the course. You can choose a fully online offering, or to combine it with attendance at face-to-face workshops.

Specialisations

Adult learning

This specialisation focuses on ways to lead and develop learners and their learning – in workplaces, communities and local, global and virtual spaces. You’ll be offered ideas and approaches to enable participation and learning, through formal and non-formal means, and to expand practice and skill development in communities. You’ll look at contemporary theories, approaches and concepts around lifelong learning and participation.

You’ll identify local and global trends and practices in adult education, and develop strategies to design engaging learning activities for adults. As a graduate you’ll be well-positioned to manage, deliver and administer learning in workplaces, communities, tertiary and vocational education.

Applied behaviour analysis

This is for those interested in the principles and practice of applied behaviour analysis in clinical, school and work settings, as well as those aiming to become Board Certified Behavior Analyst® (BCBA). You’ll gain knowledge and expertise in the principles of behaviour modification and their application, the identification and assessment of behaviours, evidence-based practices for behaviour analysts, experimental design for research into behaviour analysis, and professional ethics in behaviour analysis. The units in this specialisation have theoretical and practical relevance to professionals in a range of contexts, including inclusive and special education, and the disability sector.

The Behavior Analyst Certification Board® Inc. has verified this course sequence as meeting the coursework requirements for eligibility to take the Board Certified Behavior Analyst® Examination. Applicants will have to meet additional requirements to qualify.

1. Selection is based on previous academic achievement.
2. Even if you’re eligible for entry credit, you don’t need to take it. You may apply for and complete the longer duration.
3. Related fields include counselling, education, psychology, social work.
Digital learning
This focuses on the issues regarding digital technology in education, and applying technology practices for learning. Aimed at professionals in school, tertiary, workplace or community settings, you’ll learn how best to design, facilitate and assess the use of digital technologies in teaching and learning.

Early childhood education
This specialisation addresses the emerging worldwide need to build the expertise of professionals in the early childhood sector. Your ability to lead educational work, innovative curriculum, teaching and policy, and professional learning in early childhood contexts will grow through your studies, and you’ll be ready to pursue senior roles in early childhood education, policy, leadership and management.

Educational leadership and policy
In this specialisation you’ll focus on leadership practices and policy development in educational contexts. It’s suited to those interested in leading educational initiatives and institutions, and expanding their knowledge of how to lead educational organisations. You’ll evaluate the factors that contribute to maintaining and sustaining such organisations, including human intellect, knowledge, values, emotion, learning, and organisational culture and climate. On graduating you’ll have developed your capability to improve organisations’ problem-solving and decision-making processes.

Expert teaching practice
Deepen your knowledge and practice of teaching and learning in various areas of your interest. It’s suited to professionals from schools, tertiary education, workplaces or community organisations and groups. The latest thinking about teaching practices and developments around curriculum assessment will be looked at, and you have the choice to focus your studies in the areas of:
> adult education
> educational technologies
> gifted education
> information and communication technologies
> language and literacy
> mathematics and science
> music.

General education studies
This general stream allows you to further your professional interests by choosing from a wide variety of subjects in the education field. You can select your preferred units from across all the specialisations, building a generalist course to satisfy your specific professional and personal interests. You’ll explore relationships between research and practice in the context of your choice, such as school, vocational, tertiary, workplace and community. As a graduate, you’ll be well-placed to pursue senior leadership and management roles in various educational settings.

Inclusive and special education
In this specialisation you’ll focus on building inclusive learning environments. You’ll study theories of, and approaches to, inclusion of diverse learners with particular cultural, social, cognitive and behavioural needs. You’ll discover ways that education can be transformed to include all learners, regardless of their age, sexuality, gender, class, ethnicity and disability. After graduating you’ll be able to develop effective ways to promote learners with diverse needs in a range of learning situations.

“Monash University provided me with the opportunity for further study on a flexible part-time basis, which allowed me to continue with my teaching career. The combination of excellent teaching and discussion from diverse viewpoints provided a thought-provoking and rewarding experience.”

RACHAEL RICHARDSON
Master of Education in Early Childhood Education
Educational and developmental psychologists focus on how people develop and learn throughout their lifetime. They work with individuals, families, groups and organisations, and have varying roles such as school psychologist, guidance officer, and child and adolescent counsellor. They conduct psychological and educational assessments and instructional planning for exceptional children, adolescents and adults.

The course is accredited by the Australian Psychology Accreditation Council (APAC), as a fifth and sixth-year sequence in psychology that prepares you to practise as an educational and developmental psychologist in settings including schools, health and welfare services, care facilities and business.

You’ll develop an advanced understanding of, and the skills associated with:

> human developmental stages and processes throughout the lifetime
> psycho-educational assessment and treatment approaches for problematic or atypical development
> advanced therapeutic counselling processes and the cycle of effective intervention and change
> contemporary models of exceptionality and inclusion
> evidence-based intervention and treatment programs for psychological problems and psychopathology across the lifetime
> contemporary research and theories of abilities, personality and psychopathology
> ethical, cultural and professional issues
> administering and reporting a range of essential psycho-educational assessment instruments for assessing abilities, personality and adjustment of children through to adults.

You’ll apply theory to practice with 1000 hours of supervised professional experience in a range of settings. In a research thesis, you’ll develop an evidence-based approach to psychology, carrying out reviews and scientific investigations relevant to the theory and practice of educational and developmental psychology.

As a graduate, you’ll be qualified to register as a psychologist with the Psychology Board of Australia (PsyBA). You’ll also meet most requirements for membership of the College of Educational and Developmental Psychologists of the Australian Psychological Society.

Entry requirements
A fourth year of psychology study from any course accredited by the APAC, which may be a graduate diploma or bachelor’s honours degree, with at least a distinction (70 per cent) average in fourth-year psychology. These qualifications must have been completed within the past 10 years. Those with international qualifications will need to have their qualifications assessed by the Australian Psychological Society (APS).

In addition, you must provide evidence of demonstrated suitability for work as a professional psychologist determined by completion of a supplementary form and satisfactory referee reports (one academic and one professional), relevant voluntary or paid work experience, and an interview.

Applicant checks:
> a Working with Children Check (before placement)
> provisional registration with the Psychology Board of Australia (before commencing study, and maintain such registration throughout the period of enrolment).

You must also meet the English language requirements of Monash and of the Psychology Board of Australia (PsyBA).

Consult the PsyBA website to ensure you meet these requirements: [www.psychologyboard.gov.au](http://www.psychologyboard.gov.au)

Professional recognition
Our psychology courses are accredited by the Australian Psychology Accreditation Council. Professional accreditation ensures those graduating from the courses hold degrees recognised by employers, and adhere to state and national accreditation standards.
EDUCATIONAL RESEARCH
Graduate Certificate

This course is aimed at high achievers wanting to take on a graduate research degree such as a research master’s degree or a PhD, but don’t have sufficient previous research experience.

It’s designed as a pathway course to prepare you to undertake research at a graduate level. You’ll learn about research methodology, research design and research ethics as you plan and conduct a research study that can lead to a graduate research course. Completion of this course to a high standard positions you to start a PhD or master’s by research in the field of education.

Entry requirements
A four-year Australian bachelor’s degree (or equivalent qualification from a recognised tertiary institution) in an education discipline or a relevant area with a high credit (65 per cent) average.

Additional requirements
A 100 to 200-word research proposal and a detailed CV listing qualifications, work experience and details of two recent referees.

EDUCATION STUDIES
Graduate Certificate

Designed to introduce you to the field of education at a graduate level, this course is suited to those with a first qualification in a discipline other than education.

It’s also a pathway for those who don’t meet the entry requirements for the Master of Education. It gives you an understanding of concepts and issues in education, locally and globally, and you’ll build your knowledge of major theoretical and professional debates in specialist areas.

Through your studies, you’ll:
> learn the foundational concepts and traditions in education
> gain an understanding of recent issues and debates in policy and practice
> apply critical perspectives in your evaluation of substantive and contemporary issues and ideas
> show analytical skills in evaluating, synthesising and communicating academic concepts
> build confidence in academic practice at an advanced level.

Course completion allows you to pursue education-related careers and/or further study in education. Credit will be granted for equivalent units in the Master of Education (D6002).

Entry requirements
An Australian bachelor’s degree (or equivalent qualification from a recognised tertiary institution) with a pass (50 per cent) average. Alternatively, those with five years’ relevant full-time informal learning, with a recommendation letter (such as a reference from an employer), will be considered on a case-by-case basis.

EDUCATION PATHWAY
The Graduate Certificate of Education Studies provides a pathway into the Master of Education for those who may not meet the direct entry requirements for admission into the Master of Education.
LEADERSHIP

Expert Master’s

Whether you work in industry, the public or community sector, or in formal education, if you’re looking to take the next step in your career, this course is for you.

Your leadership potential will be developed through a blend of formal and informal approaches that promote knowledge and transformation. The course gives you the chance to learn with and from professionals committed to leading individuals and organisations. It focuses on the latest theories of leadership and specialised study. You’ll study two common units – an interprofessional unit called leadership studies, and a leadership challenge project relevant to your specialist interests.

In addition, you’ll choose two units from one of two available specialisations.

Flexible delivery
A flexible course delivery allows you to continue working while completing the course. You can choose a fully online offering or combine it with attendance at face-to-face workshops.

Specialisations

Curriculum and pedagogy
Focusing on curriculum leadership and education transformation, you’ll acquire the skills to lead school and learning communities to rethink and reform what’s taught and learnt, and the ways in which it’s done, through four streams: digital learning, literacy, mathematics and science. As a graduate you can pursue leadership roles in educational, business or community settings.

General leadership studies
This specialisation offers the opportunity to select your two specialist units from across the other specialisations. You can tailor your studies to suit your own interests or needs while maintaining a strong focus on leadership. Our graduates work in a wide variety of organisations, from museums to the armed services, in schools and within management of large companies.

Organisational learning
You’ll develop your skills to support organisational learning and creativity. You’ll learn how to foster and nurture capability through learning, and to meet the strategic organisational directions in sustainable ways. You’ll graduate ready to take on leadership roles in educational, business or community settings.

Entry requirements

> A bachelor’s degree (or equivalent qualification from a recognised tertiary institution) in a related area with at least a credit (60 per cent) average and a minimum of two years of full-time relevant professional experience, OR
> A bachelor’s (hons) degree (or equivalent) and/or graduate certificate and/or graduate diploma (or equivalent) in any field with at least a credit (60 per cent) average and a minimum of two years of full-time relevant professional experience, OR
> A bachelor’s (hons) degree and/or graduate certificate and/or graduate diploma (or equivalent) in a related field with at least a credit (60 per cent) average.

PROFESSIONAL PSYCHOLOGY

Professional Entry Master’s

Designed to meet the requirements of the Australian Psychology Accreditation Council (APAC) and the Australian Health Practitioner Regulation Agency (AHPRA) for a generalist fifth year in psychology.

This course prepares selected psychology graduates in advanced psychotherapeutic skills required for general registration as a psychologist. It develops your professional capability to apply the theoretical, research, assessment and therapeutic skills involved in psychology. Following graduation, you’ll be able to undertake a year of supervised generalist practice, then progress to full registration as a psychologist.

You’ll develop expertise in applying counselling theories and practices through your understanding of evidence-based psychotherapies. You’ll learn core skills and theoretical concepts of the therapeutic process, and extend your practical knowledge in counselling interventions as you develop therapeutic relationships with a range of client groups. You’ll acquire the skills to administer, score, interpret and report on a range of psychological tests and assessments. You’ll engage with the Australian Psychological Society (APS) code of ethics and explore ethical dilemmas to support your practice in undertaking research, educational or professional roles in different workplaces.

You’ll gain professional experience through 300 hours of supervised activities in the faculty’s onsite clinic and off-campus clinical placements. On course completion, you’ll have the skills to undertake a final year of supervised practice in the field for general registration under the ‘5+1 internship model’ for registration. You’ll arrange a Psychology Board of Australia-approved one-year internship in a setting of your choice.

Entry requirements
Successful completion of an APAC-accredited fourth year of study in psychology with a minimum high credit (65 per cent) average completed within the past 10 years. In addition, you must provide evidence of suitability for work as a professional psychologist determined by two satisfactory referee reports (one academic and one professional).

If shortlisted, you’ll be required to attend an interview. Those with international qualifications will need to have their qualifications assessed by the Australian Psychological Society (APS). All applicants must also meet the English language requirements of the Psychology Board of Australia (PsyBA). Consult the PsyBA website to ensure you meet these requirements:
www.psychologyboard.gov.au

Professional recognition
Our psychology courses are accredited by the Australian Psychology Accreditation Council (APAC). Professional accreditation ensures those graduating from the courses hold degrees recognised by employers, and adhere to state and national accreditation standards.

“Monash has a great reputation, and I felt I would be able to thrive in an environment that values teaching, learning, research and the pursuit of knowledge. As part of my placement during my degree, I was able to work with clientele that I haven’t had the opportunity to work with, expanding my knowledge and allowing me to build on an important skill set that has ultimately increased my overall expertise as a psychologist.”

RICKY ABAD
Provisional Psychologist/AOD Clinician for Caraniche Pty Ltd
Master of Professional Psychology (2016)
PROFESSIONAL PSYCHOLOGY
Graduate Diploma

This is suited to those who want to pursue advanced graduate study in psychology at master’s or doctoral level, or to undertake supervised psychological practice.

You’re offered advanced study of psychology, research training and an introduction to psychological practice. By engaging with contemporary research and literature in developmental psychology, you’ll:

> understand human development across the lifetime, including biological, perceptual, cognitive, personality, social and emotional changes from infancy to adulthood
> examine legislation relating to the practice of psychology, and how to comply with it
> appreciate the role of ethics in maintaining the integrity of the profession
> learn about individual differences and how these may be assessed using different tools
> undertake an independent research project and develop an appreciation of the role of scientific research in the field of psychology.

You’ll be able to choose one elective. Topics include developmental psychology and wellbeing, or behaviour change interventions for practitioners. After graduating you can undertake further training and study needed for professional registration in psychology.

Entry requirements
An Australian bachelor’s degree with a major in psychology from any course accredited by the Australian Psychology Accreditation Council (APAC) with a minimum distinction (70 per cent) average in third-year psychology. These qualifications must have been completed within the past 10 years. Those with international qualifications will need to have their qualifications assessed by the Australian Psychological Society (APS). Visit www.psychology.org.au

Professional recognition
Our psychology courses are accredited by the Australian Psychology Accreditation Council (APAC). Professional accreditation ensures those graduating from the courses hold degrees recognised by employers, and adhere to state and national accreditation standards.

STEM EDUCATION
Graduate Certificate

This course is intended for educators keen to practise or extend their capacity as a STEM educator.

It’ll build your capacity to lead and support quality STEM education and inspire your students’ engagement with STEM disciplines. You’ll develop a sound understanding of concepts and contemporary issues in STEM education, contexts and systems, locally and globally, and of the major theoretical and professional debates in STEM education as located within contemporary research.

This will include content knowledge, pedagogical knowledge and pedagogical content knowledge, in addition to the leadership skills and research skills that inform and enhance the learning of STEM. Through educational research and practice, you’ll focus on building STEM capabilities to meet future workforce demands.

Entry requirements
You must have successfully completed a recognised bachelor’s degree in education or equivalent qualification with a pass (50 per cent) average. Alternatively, applicants with five years’ relevant full-time informal learning, with a recommendation letter or reference from an employer, will be considered on a case-by-case basis.

Flexible delivery
A flexible course delivery allows you to continue working while completing the course. You can choose a fully online offering or combine it with attendance at face-to-face workshops if you’re able and interested.
Do you have an undergraduate degree in any discipline, and want a career as a global educator and teacher?

Our curriculum combines theory and professional experience, giving you the skills and professional values to become an effective educator. You can choose to specialise in early years, primary or secondary education – or a combination of these. Through engagement with the latest thinking and practices, you’ll be able to effectively foster the learning of students of various ages and needs.

You’ll design learning experiences to ensure your future students progress in areas such as the arts and music, English, mathematics, physical education, health and wellbeing, science and humanities. You’ll engage with education priorities and policies, and learn how to apply these in practice to develop professional values that’ll position you as a research-informed future education leader.

You’ll gain professional experience by completing a minimum of 60 days of teaching practice throughout the course in urban, rural, remote or international settings and schools. This includes locations such as China, Cook Islands, England, India, Israel, Italy, Japan, Malaysia, Netherlands, South Africa, Switzerland, United Arab Emirates and Vietnam.

An education degree is an excellent basis for diverse careers in the classroom, government or private enterprise. As a Master of Teaching graduate, you’ll be ready to transform the lives of others through learning.

Entry requirements
A bachelor’s degree (or equivalent qualification from a recognised tertiary institution) with a pass (50 per cent) average. Admission into the course is competitive and may require a higher overall average than the minimum requirement.

If you’re applying for the specialisation in secondary education, you must also have appropriate discipline studies to qualify for two specialist teaching areas or one double teaching specialist area.

If you’re applying for the specialisation in primary and secondary education, you need to have appropriate discipline studies to qualify for one specialist teaching area.

To view the secondary teaching specialisations available at Monash, visit monash.edu/education/specialistareas

Additional requirement
All applicants must sit the CASPer test. CASPer is a requirement for many of the initial teacher education courses in Victoria. It’s a non-cognitive online test designed to assess an applicant’s personal and professional attributes.

For further information on the test visit: monash.edu/education/caspertest

Enrolment considerations
> You’ll need to meet English language requirements.
> You’ll be required to undergo a Working With Children Check before being able to carry out professional experience placements.
> The Australian Institute for Teaching and School Leadership requires all students of initial teacher education courses to “achieve the standard” in the National Literacy and Numeracy test prior to graduation.

Specialisations

- Early years education (Clayton campus)
  You’ll be qualified to teach infants and children from birth to five years of age in childcare, kindergarten and preschool settings, and to support their transition to school. You’ll gain professional experience through 60 days of supervised teaching placements in early-years settings. As a graduate of this specialisation you’ll be prepared for leadership in early-years educational environments.

- Early years and primary education (Clayton campus)
  This specialisation will qualify you to teach children from birth to 12 years of age in childcare, kindergartens, preschools and primary schools. You’ll learn the fundamentals of early-years education, how to support children’s transition to school, and their progress through the primary years. You’ll gain professional experience through 85 days of supervised teaching placements in early-years and primary education settings, and be prepared for leadership roles in both early-years and primary educational environments.

- Primary education (Peninsula, off-campus)
  You’ll be qualified to teach children aged five to 12 years in primary schools. You’ll gain practical professional experience through 60 days of supervised teaching placements in primary schools, and emerge ready to become an effective and proactive leader and educator in primary education settings.
Primary and secondary education
(Clayton campus)
Also available in accelerated mode.

As a graduate you’ll be qualified to teach children and adolescents aged five to 18 years in primary and secondary schools from foundation to Year 12. Building on the content knowledge developed in your undergraduate degree, you’ll be able to teach in one secondary specialist teaching area.

You’ll also study the key elements of the primary curriculum, including English and literacies, mathematics, arts, humanities and social education, science, and health and physical education. You’ll gain professional experience through 60 days of supervised teaching practice in primary and secondary settings. At the course’s completion you’ll have career options across primary and secondary schools, as well as in community contexts.

Secondary education (Clayton campus)
Also available in accelerated mode.

This specialisation qualifies you to teach adolescents aged 12 to 18 years in secondary schools in two specialist teaching areas (or one double specialist teaching area). You’ll gain professional experience through 60 days of supervised teaching practice in secondary environments. As a graduate of this specialisation you’ll be set for a future as an innovative specialist teacher in secondary school settings.

— This can be studied as an accelerated course where you’ll be required to undertake more than the standard annual load of 48 credit points in year one in order to complete the course in 1.5 calendar years. The fee quoted is based on 48 credit points of study for one standard year. Therefore you’ll be required to pay a higher fee in year one where more than the 48 credit points is required.

“I was looking for a career change and wanted to build on my previous knowledge and experience but also pursue a career that was meaningful to me. I discovered the Master of Teaching at Monash. One of the highlights of my course is professional experience. It has helped me to step out of my comfort zone. I received encouragement from my mentor teacher and developed confidence over time.”

BAI LIU
Master of Teaching in Secondary Education
This course suits a range of professionals, educators or prospective educators working in English language teaching locally or internationally, and leads to a graduate qualification in TESOL (Teaching English to Speakers of Other Languages).

You’ll develop expertise in the core principles of language teaching and learning, with an optional field observation program that allows you to observe Australian English and foreign language teaching practices and school structures. You’ll also micro-teach in a supportive environment with focused feedback to develop reflective skills and formative self-assessment – the keys to quality teaching.

You’ll look at the latest theories and practices for language acquisition, and gain an advanced understanding of the skills associated with:

> the role of social and cultural contexts in language learning
> a range of communicative approaches to teaching, learning and assessment, and planning for teaching in various TESOL contexts
> the evaluation, analysis and design of assessment tasks
> the development and maintenance of bilingualism and bi-literacy in formal learning environments
> English language education in local and global contexts
> transcultural and intercultural learning, communication and mobility, including in online learning settings
> the use of digital technologies to support learning.

As a graduate, you’ll be a skilled language teacher who can operate with confidence in a changing and increasingly internationalised world.

Flexible delivery
A flexible course delivery allows you to continue working while completing the course. You can choose a fully online offering or combine it with attendance at face-to-face workshops.

Entry requirements
Depending on your prior qualifications and experience, you’ll be eligible for entry credit, which reduces the duration.

“I am so proud to be a student at Monash University. Monash is the best way to help my dreams come true, not just for my career but also being able to contribute to my community back home in Indonesia. In addition, by being a student ambassador at Monash it allows me to experience new things. This program is really amazing because it provides training and workshops for leadership development, public speaking and event hosting.”

ANA NURHASANAH SURJANTO
Master of TESOL
ENGINEERING
The Master of Advanced Engineering offers a competitive advantage that positions you to lead innovation and drive industry change in your chosen field of engineering.

Monash is a global leader in engineering, attracting outstanding academics and featuring innovative research facilities that you’ll use while completing your studies. The only expert master’s program of its kind in Australia, this course is a key transitional stage in your career as an emerging business leader. It’s designed to foster innovative thinking, entrepreneurship, leadership and personal development.

Gain a depth of knowledge in your chosen specialisation, mastering the crucial skills to become a leading contributor in your field. The advanced master’s program offers 11 specialisations, including three cross-discipline specialisations.

You can complete your master’s degree in just one year, or you can choose a two-year option. The two-year program includes a major design project where you can participate in a multidisciplinary team to develop solutions to real-world problems and further deepen your skills in the engineering field.

The Master of Advanced Engineering is an inspiring study experience, designed to take everything you’ve achieved so far to the next level.

Entry requirements
Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration.

1. Selection is based on previous academic achievement.
2. Even if you’re eligible for entry credit, you don’t need to take it. You may apply for and complete the longer duration.
3. Applicants must provide a current curriculum vitae and 300-word statement. A phone interview may be requested.

Course structure
Entrants to the one-year program must complete 48 credit points as follows:
- 12 credit points: 2 x common core units
- 24 credit points: 4 x discipline core units
- 12 credit points: 2 x enhancement units

Entrants to the two-year program must complete 96 credit points as follows:
- 12 credit points: 2 x common core units
- 24 credit points: 4 x discipline core units
- 12 credit points: 2 x enhancement units
- 24 credit points: 4 x technical elective units
- 24 credit points: 4 x project units
Specialisations

Additive manufacturing engineering
This specialisation will train you in the conceptualisation, design optimisation, manufacture and testing of additively manufactured parts made from both metals and polymers. The program will explore the commercial aspects in areas that range from medical devices, through to specialist and one-off components, through to large-scale semi-continuous manufacture. You’ll examine the material characteristics that result in successful, qualified additive manufacturing parts.

Chemical engineering
 Ranked top 30 in the world (QS World University Rankings by Subject 2018)

The Master of Advanced Chemical Engineering course includes study areas such as advanced reaction engineering, process design and optimisation, conversion of bioresources into fuel, materials and specialty chemicals, and nanostructured membranes for sustainable separations and energy production, with an emphasis on the latest developments. You’ll develop skills vital for chemical engineers in industry and research.

Civil engineering (infrastructure systems)
 Ranked top 30 in the world (QS World University Rankings by Subject 2018)

As a Master of Advanced Civil Engineering (Infrastructure Systems) graduate, you’ll be ready to solve challenges in the design and operation of large-scale infrastructure systems, such as bridges, tunnels and pipe networks. You’ll be equipped with the advanced skills necessary for managing the problems posed by ageing infrastructure, and leading the designs of new inter-disciplinary complex infrastructure systems. The course suits new graduates and professionals who are keen to learn cutting-edge techniques in both theory and instrumentation, ready for real-world application.

Civil engineering (transport)
 Ranked top 20 in the world (ShanghaiRanking Global University Rankings by Subject 2018)

The Master of Advanced Civil Engineering (Transport) program addresses transport engineering and management, traffic engineering, intelligent transport systems and transport planning, and responds to the growing need for engineers with awareness of the characteristics of transport, including its technological, economic and social impact.

You’ll also look at the latest transport engineering and emerging technology, and how it can solve problems in the planning, design, management and operation of transport facilities. The course is suitable for new graduates, professionals and managers who are keen to upgrade their existing design and management skills, as well as to develop theoretical and applied knowledge in transport engineering and management.

Civil engineering (water)
 Ranked top 30 in the world (QS World University Rankings by Subject 2018)

The Master of Advanced Civil Engineering (Water) allows you to focus on water resources engineering and management. The program deals with surface and ground water flow, stormwater management, water quality, flood forecasting and mitigation. It’s designed to give you skills to meet the challenges posed by changing climatic conditions on water resource management. It’s suited to new graduates, professionals and managers who are keen to upgrade their existing design and management skills, as well as to develop theoretical and applied knowledge in water resources engineering and management.

Materials engineering

The Master of Advanced Materials Engineering program takes in practical aspects of the main classes of materials, such as metals, polymers, biomaterials, nanomaterials and energy-related materials. This course focuses on the most up-to-date aspects of the field, along with the use of materials and their electronic, chemical and mechanical properties. It’ll prepare you to appreciate and exploit the role of materials in tackling the technical, economic and environmental problems in the design and construction of engineering structures, processes and devices.

It’s ideally suited to new graduates, as well as professional engineers, who are eager to further their applied knowledge in materials engineering.

Electrical engineering

The Master of Advanced Electrical Engineering gives you a broad introduction to advanced techniques in signal processing, communications, digital systems and electronics. The units have been chosen around the common theme of embedded systems – special-purpose computing systems designed for specific applications.

They’re found just about everywhere, including in consumer electronics, transportation systems, medical equipment and sensor networks. The course will mix theory and practice, and includes hands-on learning in laboratories and team-based design projects.

Energy and sustainability engineering (Malaysia only)

If you’re a qualified engineer keen to deepen your knowledge in the energy and sustainability area, the Master of Advanced Energy and Sustainability Engineering is for you. The course builds foundations in general engineering through engineering analysis and entrepreneurship units. You can major in this program by examining the energy and sustainability area from a multidisciplinary perspective. You can also choose elective units such as environment and air pollution control and smart grids to further enhance your knowledge, or undertake a minor research work to pursue a topic of related interest.

Mechanical engineering

Most modern engineering projects are multidisciplinary in nature and require a range of skills and perspectives to accomplish the task. The Master of Advanced Mechanical Engineering course takes a systems approach to the design, monitoring and performance of complex mechanical engineering systems in the fields of renewable energy, aerospace, buildings, transportation and biomedical devices. The systems approach also informs the course – four discipline-based core units are vertically integrated so that common problems are examined from different perspectives, culminating in a sustainable systems unit.
Medical engineering
The Master of Advanced Medical Engineering allows you to focus on engineering design and the development of medical technologies. The specialisation encompasses recent advances in biomaterials, bioengineering and medical devices and instrumentation. You’ll develop a knowledge of the human body and its workings, as well as of the fundamentals of regulation, clinical practice and clinical trials of medical technologies. This specialisation addresses the growing needs of the medical technology industry by graduating engineers with an expertise in this field, along with a broad awareness of their clinical needs. It’s suitable for new graduates, professionals and managers who are keen to upgrade their existing design and management skills, as well as to develop advanced theoretical and applied knowledge in the area of medical engineering.

Renewable and sustainable energy engineering
This specialisation allows you to focus on sustainable energy technologies to address concerns about existing energy production. You’ll learn about the operation, benefits and limitations surrounding each of the major renewable energy technologies that play a key role in the growth of the emerging energy sector. You’ll develop an understanding of how such technologies modify existing electricity networks and the markets in which they operate. The specialisation is suitable for new graduates, professionals and managers who are keen to upgrade their existing design and management skills and to develop advanced theoretical and applied knowledge in the area of renewable and sustainable energy engineering.

“Applying to Monash was a no-brainer, given the fact that Monash is ranked in the world’s top 100 universities and one of the Group of Eight universities. But what attracted me most was the University’s focus on research and its influence across the world, which is backed by the world-class facilities provided to students.”

AESHWARY KUSHWAH
Master of Advanced Mechanical Engineering
The planning, design, construction and maintenance of infrastructure is crucial to the global economy. Skilled professionals are required to maintain ageing infrastructure, integrate new infrastructure into existing systems, and expand existing infrastructure — and it has to be done in a way that’s socially, environmentally and financially sustainable. The Master of Infrastructure Engineering and Management equips you to take on these challenges.

The program was developed in response to the growing need for engineers with expertise in infrastructure, including its technological, economic and social effects.

This course isn’t available to international students who are holders of an Australian student visa, for study onshore in Australia. However, holders of some other categories of Australian visas living in Australia, and students studying off-campus by distance learning (where this option is available) and living outside of Australia, may be eligible for this course.

Entry requirements
Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration.

TRANSPORT AND TRAFFIC
Expert Master’s

Traffic congestion, safety, environmental impacts and the efficiency of transport operations are global concerns.

With transport systems under pressure to deliver better economic, social and environmental results for the community, there's a growing demand for professionals prepared to tackle these challenges. The Master of Transport and Traffic course responds to the need for engineers with transport expertise, including its technological, economic and social effects. It also outlines the latest in transport engineering, and its use in solving problems in the planning, design, management and operation of transport and traffic facilities.

This program is delivered online. There are no classes to attend, making it ideal for students who wish to combine full-time work with part-time study. Students have access to structured learning resources and complete a range of individual and group learning activities through unit specific websites. This course isn't available to international students who are holders of an Australian student visa, for study onshore in Australia. However, holders of some other categories of Australian visas living in Australia, and students studying off-campus by distance learning (where this option is available) and living outside of Australia, may be eligible for this course.

BUSINESS INFORMATION SYSTEMS

Expert Master’s

Prepare for a career in business-focused IT areas such as IT management, project management, business information systems, information systems, information management or knowledge management.

The program covers the IT business spectrum, from supporting business operations through to supporting managers’ decision-making. It’ll get you ready for roles such as business analyst, systems analyst or project leader, or as an information manager, archivist or librarian. The course features core studies in IT project management and offers specialist units in business information systems and a wide range of elective choices. You can either complete a specialisation, or finish the general form of the degree without a specialisation.

There are four specialisations available in the Master of Business Information Systems:

> Business information systems
> Archives and recordkeeping
> Archives and recordkeeping/library information science
> Library information science.

In your final semesters, you can choose to complete an industry experience project or research thesis. You can apply for a scholarship place over summer in the highly regarded Monash Industry Team Initiative (MITI).

Entry requirements

Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration.

DATA SCIENCE

Expert Master’s

Data scientists extract the gold from big-data assets. Their insights drive innovation, transformation and competitive advantage in business, industry and government, and their expertise is sought-after worldwide.

From data curation and management to processing and analysis, data scientists play a major role in helping organisations harness the information to solve real-world business problems. We have the greatest expertise in data science theory and practice of any university in the Asia-Pacific region. The Master of Data Science prepares you for a career in the field, giving you the skills in data management, analytics, data analytics, big data management and processing.

You’ll cover statistical and exploratory analysis, data formats and languages, processing of massive data sets, and management of data and its effects in an organisation and community. In your final semesters you can choose to complete an industry experience project or research thesis. Additionally, you can also apply for a scholarship place over summer in the highly-regarded Monash Industry Team Initiative (MITI).

Entry requirements

Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration.

DATA SCIENCE

Graduate Diploma

The rise of big data has changed how organisations do business.

The Graduate Diploma in Data Science puts you at the forefront of this exciting field. Learn about statistical and exploratory analysis, data formats and languages, processing of massive data sets, and management of data and its effects in an organisation and community.

Whether you’re already a data scientist and want to formalise your qualifications, or have an analytic bent and want to transfer your skills to data science, this course is for you.

This fully online course allows you to take one unit every two months, equivalent to half-time study, giving you the flexibility to combine study, work and family.

Entry requirements

The entry requirement is successful completion of an undergraduate degree (or an equivalent qualification) relating to IT, business (with mathematics or statistics), economics, econometrics, science or engineering, with completed studies in one of programming, databases, mathematics or statistics.

Qualifications in other disciplines will also require two years of professional work experience with six months of programming, databases or statistics.
“I chose to study my master’s at Monash as it has a good reputation all over the world and it may help me to get a good job after I graduate. The flexibility of the course provides a range of units to choose from to learn the basics, and gives you time to decide which specific area of IT you want to focus on.”

LIYING CHEN
Master of Information Technology
Are you ready to embark on a high-status technology career? Do you want to progress to the next level as a technology specialist?

With a Master of Information Technology, you could become a software engineer, an enterprise data architect, a mobile systems analyst, a cloud consultant, or even a chief technology officer.

This course features core studies in IT project management and software engineering, and offers a wide range of electives choices spanning data management technology, mobile and distributed systems, machine learning, cloud computing and cybersecurity. In your final semesters you can choose to complete an industry experience project or research thesis. Additionally, you can also apply for a place over summer in the highly-regarded Monash Industry Team Initiative (MITI).

Entry requirements
Depending on your prior qualifications and experience, you’ll be eligible for entry credit, which reduces the duration.

This course is accredited by the Australian Computer Society.

---

This course offers a pathway to higher-level research in IT for high-achieving students who have completed a relevant undergraduate and coursework master’s degree but don’t have a research component in order to progress.

Entry requirements
An undergraduate degree (equivalent to an Australian degree) and a master’s coursework degree at a recognised tertiary institution in information technology or a related discipline with a distinction average (at least 70 per cent) across all units.

A 500 to 1000-word research proposal and a detailed resume listing your qualifications, work experience and details of two recent referees are also required as part of the application.
This course prepares you for a career in network administration or network management, or as a systems analyst, systems designer, data communications specialist, network security engineer, administrator or cybersecurity specialist.

You’ll take advanced studies in networks and security, including network structures, network protocols, information security, software security, network security, quality of service and network design. As a network and security professional, your skills will always be in high demand. In your final semesters you can choose to complete an industry experience project or research thesis. Additionally, you can also apply for a scholarship place over summer in the highly-regarded Monash Industry Team Initiative (MITI).

Entry requirements

Depending on your prior qualifications and experience, you’ll be eligible for entry credit, which reduces the duration.

“Monash has one of the best courses in network security. I was always keen on knowing the underlying concepts behind the networks that run and connect the world today. Networks and its associated issues, design and implementation is what attracted me the most to this course.”

SANDHYA GAWALI

Master of Networks and Security

This course is accredited by the Australian Computer Society.
LAWS
COMMERCIAL LAW
Expert Master’s | For non-law graduates

Are you ready to take your career in the world of commercial law to the next level?

The Master of Commercial Law is for those working in roles requiring a sound grasp of commercial law issues. Focusing on areas that include corporate and competition law, banking and finance law, and tax law, it allows you to choose from an extensive range of domestic and international commercial law units – our offering caters to a variety of career aspirations and interests. You’ll investigate contemporary law issues, practice and scholarship, and evaluate complex issues relevant to the field from theoretical, international and interdisciplinary perspectives.

ENTRY REQUIREMENTS (In equivalent Australian qualification terms)

You must satisfy one of the following:

A. A bachelor’s (hons) degree (or equivalent) in a relevant discipline including business, economics, commerce or another relevant discipline, as determined by the faculty, with a minimum credit average.

B. A bachelor’s degree (or equivalent) + A graduate diploma (or equivalent) in law or a related discipline, including business, economics, commerce or another relevant discipline.

OR

A. A bachelor’s degree (or equivalent) + Sufficient relevant work-based experience or professional learning to provide the equivalent of a bachelor’s (hons) degree in one of those disciplines, as determined by the faculty.

1. You’ll be assessed on your entire academic record, with a credit average (or equivalent) preferred. As a general rule, those who don’t have a credit average or are relying on relevant work experience to satisfy entry requirements will need to have worked for at least two years, although the required period may be shorter where the work experience has been supplemented by other relevant learning.
If you’re interested in dispute resolution, this course will help advance your career in this developing area of expertise. It’s a course suited to those working, or who want to work, as a dispute resolution practitioner, including as an arbitrator or mediator. You’ll receive a thorough theoretical and practical grounding in law and the advanced skills required to work in this field. You’ll gain in-depth knowledge in areas of dispute resolution in the courts, and alternative dispute resolution methods. You’ll also explore contemporary law issues, practice and scholarship, and evaluate complex issues relevant to the field from theoretical, international and interdisciplinary perspectives.

ENTRY REQUIREMENTS (in equivalent Australian qualification terms)¹

You must satisfy one of the following:

**A** A bachelor’s (hons) degree (or equivalent) in a relevant discipline including education, management, psychology, human resources, business administration, industrial relations, communications or another relevant discipline, as determined by the faculty, with a minimum credit average.

**B** A bachelor’s degree (or equivalent) + A graduate diploma (or equivalent) in law or a related discipline, including education, management, psychology, human resources, business administration, industrial relations, communications or another relevant discipline.

**C** A bachelor’s degree (or equivalent) in a relevant discipline including education, management, psychology, human resources, business administration, industrial relations, communications or another relevant discipline + Sufficient relevant work-based experience or professional learning to provide the equivalent of a bachelor’s (hons) degree in one of those disciplines, as determined by the faculty.

---

¹ You’ll be assessed on your entire academic record, with a credit average (or equivalent) preferred. As a general rule, those who don’t have a credit average or are relying on relevant work experience to satisfy entry requirements will need to have worked for at least two years, although the required period may be shorter where the work experience has been supplemented by other relevant learning.
GOVERNMENT LAW AND REGULATORY PRACTICE

Expert Master’s | For non-law graduates

The world of government law and regulatory practice offers diverse career opportunities.

This is aimed at those working with or within government and regulatory bodies, including careers in federal, state or local government. It gives you a thorough theoretical and practical grounding in government law and regulatory practice, and the advanced skills needed to working in these fields. You gain in-depth knowledge and evaluate complex issues relevant to the field from theoretical, international and interdisciplinary perspectives.

ENTRY REQUIREMENTS (in equivalent Australian qualification terms)

You must satisfy one of the following:

A  A bachelor’s (hons) degree (or equivalent) in a relevant discipline including government, regulation, social work or another relevant discipline, as determined by the faculty, with a minimum credit average.

B  A bachelor’s degree (or equivalent) + A graduate diploma (or equivalent) in law or a related discipline, including government, regulation, social work or another relevant discipline.

OR  A graduate certificate (or equivalent) in law or a related discipline, including business, economics, commerce or another relevant discipline, as determined by the faculty.

C  A bachelor’s degree (or equivalent) in a relevant discipline including government, regulation, social work or another relevant discipline + Sufficient relevant work-based experience or professional learning to provide the equivalent of a bachelor’s (hons) degree in one of those disciplines, as determined by the faculty.

1. You’ll be assessed on your entire academic record, with a credit average (or equivalent) preferred. As a general rule, those who don’t have a credit average or are relying on relevant work experience to satisfy entry requirements will need to have worked for at least two years, although the required period may be shorter where the work experience has been supplemented by other relevant learning.

GOVERNMENT LAW AND REGULATORY PRACTICE
Expert Master’s | For non-law graduates

HUMAN RIGHTS LAW

Expert Master’s | For non-law graduates

Are you passionate about human rights? Would you like to enhance your skills in this diverse field?

If so, the Master of Human Rights Law provides a thorough theoretical and practical grounding in the laws governing this field. You’ll develop advanced professional skills to further your specialist career in non-government organisations, government sectors, community groups or human rights-related organisations such as international development agencies. You’ll also gain an understanding of the Australian legal system, and will investigate contemporary law issues, practice and scholarship, and evaluate complex issues relevant to the field from theoretical, international and interdisciplinary perspectives.

ENTRY REQUIREMENTS (in equivalent Australian qualification terms)

You must satisfy one of the following:

A  A bachelor’s (hons) degree (or equivalent) in a relevant discipline including social sciences, humanities or another relevant discipline, as determined by the faculty, with a minimum credit average.

B  A bachelor’s degree (or equivalent) + A graduate diploma (or equivalent) in law or a related discipline, including social sciences, humanities or another relevant discipline. OR A graduate certificate (or equivalent) in law or a related discipline, including social sciences, humanities or another relevant discipline, as determined by the faculty.

C  A bachelor’s degree (or equivalent) in a relevant discipline including social sciences, humanities or another relevant discipline. + Sufficient relevant work-based experience or professional learning to provide the equivalent of a bachelor’s (hons) degree in one of those disciplines, as determined by the faculty.

1. You’ll be assessed on your entire academic record, with a credit average (or equivalent) preferred. As a general rule, those who don’t have a credit average or are relying on relevant work experience to satisfy entry requirements will need to have worked for at least two years, although the required period may be shorter where the work experience has been supplemented by other relevant learning.
ENTRY REQUIREMENTS (in equivalent Australian qualification terms)

You must satisfy one of the following:

A. A bachelor’s (hons) degree (or equivalent) in a relevant discipline including economics, engineering, medicine, science, computer science, industrial design, business administration or another relevant discipline, with a minimum credit average.

B. A bachelor’s degree (or equivalent) + A graduate diploma (or equivalent) in law or a related discipline, including economics, engineering, medicine, science, computer science, industrial design, business administration or another relevant discipline.

OR

A. A graduate certificate (or equivalent) in law or a related discipline, including business, economics, commerce or another relevant discipline, as determined by the faculty.

C. A bachelor’s degree (or equivalent) in a relevant discipline including economics, engineering, medicine, science, computer science, industrial design, business administration or another relevant discipline + Sufficient relevant work-based experience or professional learning to provide the equivalent of a bachelor’s (hons) degree in one of those disciplines, as determined by the faculty.

1. You’ll be assessed on your entire academic record, with a credit average (or equivalent) preferred. As a general rule, those who don’t have a credit average or are relying on relevant work experience to satisfy entry requirements will need to have worked for at least two years, although the required period may be shorter where the work experience has been supplemented by other relevant learning.
LAWS (LLM)
Expert Master’s | For law graduates

The Monash LLM is ideal for law graduates wanting to develop in-depth knowledge of a particular legal area, or those wanting to advance their professional expertise in an area of practice. You’ll gain advanced skills and knowledge of law developments, practice and scholarship of one or more areas of law.

ENTRY REQUIREMENTS (in equivalent Australian qualification terms)

You must satisfy one of the following:

| A | A juris doctor or a bachelor’s (hons) degree in law, or an equivalent qualification |
| B | A bachelor’s degree in law (or equivalent) + A graduate diploma in law OR A graduate certificate in law OR an equivalent graduate qualification |
| C | A bachelor’s degree in law (or equivalent) + Sufficient relevant work-based experience or professional learning that together constitute the equivalent of one of the above qualifications*. |
| D | A bachelor’s degree in law (or equivalent) + Admission to practise as an Australian lawyer |

*For the purposes of satisfying these requirements, other learning may include, but is not confined to, learning in the context of other non-law degrees.

You’ll be assessed on your entire academic record, with a credit average (or equivalent) preferred. As a general rule, those who don’t have a credit average will need to have at least two years of relevant work experience, although the required period may be shorter where the work experience has been supplemented by other relevant learning.

Fees are per 48 credit points, which represents a standard full-time course load for a year.

COURSE CODE: L6004
Specialisations

Commercial law
You’ll receive a thorough theoretical and practical grounding in commercial law and develop the advanced skills needed to work in the commercial field. You can choose from an extensive range of commercial law units, including those in corporate law, competition law, banking and finance law, and tax law.

This specialisation suits graduates keen to develop or enhance specialist careers in professions and occupations requiring a sound grasp of commercial law issues, including as accountants, company administrators and business managers.

You’ll investigate contemporary issues in law, practice and scholarship, and evaluate complex issues relevant to the field from theoretical, international and interdisciplinary perspectives. You’ll grow your capacity to take on independent research, and have the option of a pathway to doctoral studies.

Dispute resolution
You’ll receive a thorough theoretical and practical grounding in dispute resolution and develop the advanced skills needed to work as a dispute resolution practitioner, including as an arbitrator or mediator.

You’ll explore contemporary issues in law, practice and scholarship, and evaluate complex issues relevant to the field from theoretical, international and interdisciplinary perspectives. You’ll grow your capacity to take on independent research, and have the option of a pathway to doctoral studies.

Government law and regulatory practice
You’ll receive a thorough theoretical and practical grounding in government law and regulatory practice, and develop the advanced skills needed to work with or within government and regulatory bodies.

It’s best suited to those interested in developing or enhancing specialist careers in the federal, state or local government sectors, or in occupations requiring a high level of interaction with government and regulatory bodies.

You’ll examine contemporary issues in law, practice and scholarship, and evaluate complex issues relevant to the field from theoretical, international and interdisciplinary perspectives. The course lifts your capacity to undertake independent research, and includes options for a pathway to doctoral studies.

Human rights
You’ll get a thorough theoretical and practical grounding in the laws governing international and domestic human rights, and develop the advanced skills needed to work in this diverse field. The extensive range of units allows you to develop your knowledge across the breadth of human rights law. The course suits those interested in developing or enhancing specialist careers within the government sector, or in development agencies and other local and international human rights-related organisations.

You’ll explore contemporary issues in law, practice and scholarship, and evaluate complex issues relevant to the field from theoretical, international and interdisciplinary perspectives. The course lifts your capacity to undertake independent research, and includes options for a pathway to doctoral studies.

Intellectual property and communications law
You’ll gain a thorough theoretical and practical grounding in the laws regulating intellectual property regimes and the broader fields of communications and technology, and develop the advanced skills needed to work in this complex, dynamic field.

It’s suitable for those keen to develop or enhance their specialist careers in intellectual property, communications and technology, including careers within media organisations and the public sector.

You’ll investigate contemporary issues in law, practice and scholarship, and evaluate complex issues relevant to the field from theoretical, international and interdisciplinary perspectives. The course increases your capacity to undertake independent research, and includes options for a pathway to doctoral studies.

International and comparative law
You’ll gain advanced legal knowledge across a spectrum of legal issues with international significance. These include public international law, international human rights and humanitarian law, international criminal law and justice, international commercial and comparative law, international trade and finance law, and the impact of international legal frameworks.

Your in-depth studies will allow you to work in non-government organisations (NGOs), government and industry (domestically or internationally) in positions that call for understanding of international legal frameworks.

Law and international development
You’ll receive a thorough theoretical and practical grounding in the laws and regulatory frameworks governing the ways in which the international community provides assistance to developing countries to improve their peoples’ quality of life.

You’ll also develop the advanced skills needed to work as a professional in this field. It’s ideally suited to those interested in developing or enhancing specialist careers in international development within government, non-government or not-for-profit sectors.

You’ll explore contemporary issues in law, practice and scholarship, and evaluate complex issues relevant to the field from theoretical, international and interdisciplinary perspectives. The course increases your capacity to take on independent research, and includes options for a pathway to doctoral studies.

Workplace and employment law
You’ll be provided with a thorough grounding in workplace and employment law, and develop the skills required to work in workplace and employment relations, including in the public sector, corporate management, trade unions and employer associations. It’s suited to those interested in developing or enhancing specialist careers in human resources and the management of workplace and employment relations. The course includes options for a pathway to doctoral studies.
Are you looking for a graduate pathway into the study of law?

The Graduate Diploma in Law is ideal for law and non-law graduates wanting to gain further legal expertise, and adds value in the workplace as well as offering the chance to hone legal knowledge and skills. It’ll enable graduates of law and other disciplines to develop advanced skills for legal or professional practice or higher learning, and is a pathway for entry to a master’s degree. While this course normally comprises eight coursework units, applicants may be eligible to obtain credit for up to four units for recognised work experience or previous learning.

ENTRY REQUIREMENTS

You must satisfy one of the following:

A. A bachelor’s degree (or equivalent) in law with a credit average

B. A bachelor’s degree (or equivalent) in any other discipline + Sufficient work-based or other learning in a related field that together constitutes the equivalent of a bachelor’s degree in a related discipline.

1. You’ll be assessed on your entire academic record with a credit average (or equivalent) preferred. As a general rule, those who don’t have a credit average or are relying on relevant work experience to satisfy entry requirements will need to have worked for at least one year, although the required period may be shorter where the work experience has been supplemented by other relevant learning.
JURIS DOCTOR
Professional Entry Master’s | For non-law graduates

This degree satisfies the academic requirements for admission to practise as an Australian lawyer.

Our juris doctor (JD) is an intensive, graduate-entry law degree designed for non-law graduates. The course provides advanced and integrated knowledge of the principal areas of legal practice, legal concepts and broader perspectives about the law.

It develops advanced professional skills in problem-solving, critical thinking, research, communication, collaboration, self-management, ethical awareness and professional judgment.

The skills and knowledge learned in the course are applied in a later-year professional project, and the electives allow flexibility and choice via a wide range of specialist units. The JD recognises the specific needs of graduate entrants and teaches the skills available only from one of Australia’s leading law schools. Small class sizes and innovative teaching promote interactivity and in-depth learning. All classes are taught at the city-based campus in the heart of Melbourne’s legal precinct.

ENTRY REQUIREMENTS (in equivalent Australian qualification terms)

You must satisfy one of the following:

A  An undergraduate degree (or equivalent) with at least a Grade Point Average (GPA) of 5.0 on a 7-point scale.

B  A bachelor’s degree (or equivalent) with at least a Grade Point Average (GPA) of 4.0 on a 7-point scale and LSAT score of 150+ (taken within five years prior to applying for admission).

C  If, in addition to a bachelor’s degree (or equivalent), the applicant has incomplete studies in a law admission degree course, a minimum GPA of 5.0 on a 7-point scale in the law studies, with no fail result in the final year, is required. Credit for prior studies, up to a maximum of 48 points, may be awarded.

COURSE CODE: L6005
Develop advanced skills and prepare yourself for a career in international development.

This expert graduate course gives you a thorough theoretical and practical grounding in the laws and regulatory frameworks governing the ways in which the international community provides assistance to developing countries to improve their peoples’ quality of life.

It develops advanced skills and suits those keen for a career in international development within government, non-government or not-for-profit sectors. You’ll explore contemporary law issues, practice and scholarship, and evaluate complex issues relevant to the field from theoretical, international and interdisciplinary perspectives.

ENTRY REQUIREMENTS (in equivalent Australian qualification terms)

You must satisfy one of the following:

A  A bachelor’s (hons) degree in a relevant discipline including development studies, commerce, economics, environmental studies, government, international studies, science, social work or public administration or another relevant discipline, as determined by the faculty, with a credit average.

B  A bachelor’s degree + A graduate diploma in law or a related discipline including development studies, commerce, economics, environmental studies, government, international studies, science, social work, public administration or another relevant discipline.  OR  A graduate certificate in law or a related discipline including development studies, commerce, economics, environmental studies, government, international studies, science, social work, public administration or another relevant discipline, as determined by the faculty.

C  A bachelor’s degree in a relevant discipline including development studies, commerce, economics, environmental studies, government, international studies, science, social work or public administration, or another relevant discipline. + Sufficient relevant work-based experience or professional learning to provide the equivalent of a bachelor’s (hons) degree in one of those disciplines, as determined by the faculty.

1. You’ll be assessed on your entire academic record, with an Australian credit average (or equivalent) in each qualification. As a general rule, those who don’t have an Australian credit average (or equivalent) or are relying on relevant work experience to satisfy entry requirements will need to have worked for at least two years, although the required period may be shorter where the work experience has been supplemented by other relevant learning.
ENTRY REQUIREMENTS

You must satisfy one of the following:

A. A bachelor’s (hons) degree (or equivalent) including human resource management, industrial relations or another relevant discipline, as determined by the faculty, with a minimum credit average.

B. A bachelor’s degree (or equivalent) + A graduate diploma (or equivalent) in law or a related discipline including human resource management, industrial relations or another relevant discipline. OR A graduate certificate (or equivalent) in law or a related discipline including human resource management, industrial relations or another relevant discipline, as determined by the faculty.

C. A bachelor’s degree (or equivalent) in a relevant discipline including human resource management, industrial relations or another relevant discipline. + Sufficient relevant work-based experience or professional learning to provide the equivalent of a bachelor’s (hons) degree in one of those disciplines, as determined by the faculty.

1. You’ll be assessed on your entire academic record, with a credit average (or equivalent) preferred. As a general rule, those who don’t have a credit average or who rely on relevant work experience to satisfy entry requirements will need to have worked for at least two years, although the required period may be shorter where the work experience has been supplemented by other relevant learning.
MEDICINE, NURSING AND HEALTH SCIENCES
ADDICTIVE BEHAVIOURS

Expert Master’s

The Master of Addictive Behaviours is offered in partnership with Turning Point, an internationally-renowned clinical treatment and research centre.

The course gives you a comprehensive overview of addiction science, policy and practice. It’s a multidisciplinary, modular graduate degree that’s delivered online but retains a strongly interactive focus.

You’ll learn from national and international experts from Monash, Turning Point and other leading universities, and cover issues such as problem drinking and gambling, and the misuse of prescribed and illicit drugs.

The program is built on a strong conceptual and theoretical foundation, with topics covered including epidemiology, public health and policy, prevention and treatment, and research methods.

It suits graduates in psychology, criminology, nursing, medicine and social work, and professionals in the fields of criminal justice, mental health, community health and public policy.

Entry requirements
Depending on your prior qualifications and experience, you’ll be eligible for entry credit which reduces the duration.

<table>
<thead>

<td>3</td>
</tr>
<tr>
<td>Bachelor’s (hons) degree in a related field^ + three years’ (full-time equivalent) professional work experience with the addiction field, OR Graduate diploma in a related field^ + three years’ (full-time equivalent) professional work experience within the addiction field</td>
<td>2</td>
</tr>
</tbody>
</table>

1. Selection is based on previous academic achievement.
2. Even if you’re eligible for entry credit, you don’t need to take it. You may apply for and complete the longer duration.
3. Related fields include nursing, social work, medicine and psychology (i.e. health), research, teaching, law, policy, sport health and human resources.
4. Examples of high level written skills include published journal articles and book chapters, etc.

Additional requirements
Each application will be considered on its own merit. You may be required to participate in an interview. The following may need to be provided before your application can be assessed:

> A curriculum vitae showing relevant industry experience
> Academic transcript(s) of relevant degrees
> A statement of purpose (500 words) outlining reasons for undertaking the course and your area(s) of interest
> Examples of high-level written skills, including journal articles and book chapters.

These requirements are dependent on the level of entry for which you’re applying.
Your initial year in the Master of Biomedical and Health Science course will focus on intensive training.

This includes how to conduct research through coursework and research skills training, and engaging in specialist research in theory units, followed by a second year of a full-time research project and internship under the supervision of an academic staff member.

Entry requirements
Depending on your prior qualifications and experience, you’ll be eligible for entry credit, which reduces the duration.

1. Selection is based on previous academic achievement.
2. Even if you’re eligible for entry credit, you don’t need to take it. You may apply for and complete the longer duration.
3. Related fields include biomedical science, allied health or life science discipline. Where an applicant has the equivalent of a three-year Australian bachelor’s degree in a non-related discipline, the selection panel will instead consider relevant and significant work experience as equivalent.

Specialisations

Cancer biology and therapeutics
This provides you with the skills to formulate a research question on the role of cancer-causing genes and the clinical applications of therapies arising from the discipline knowledge gained. The emphasis is on understanding cancer biology, including the molecular mechanisms underpinning human cancers and targeted therapeutics used to treat patients with this disease.

Cardiovascular diseases
This gives you the skills to formulate a research question and conduct research on the role of the cardiovascular system in health and disease, with emphasis on dysfunctions of the cardiovascular system in disease or how disease impacts on the cardiovascular system.

Infectious diseases and population health
You’ll gain the skills to formulate a research question and conduct research on the most important, prevalent, emerging or neglected diseases affecting humans. The emphasis is on diseases affecting resource-poor or low and middle-income countries.

Neuroscience
You’ll be provided with the skills to formulate a research question and conduct research on the relationships between brain processes and behaviour, in health and/or disease, with emphasis on changes in brain and behaviour when there’s brain injury and/or neurodegeneration.

Regenerative medicine and stem cells
This provides you with the skills to formulate a research question and conduct research on the repair or replacement of damaged human tissues and organs in health and disease, with emphasis on the cells, factors, other biological building blocks, and bioengineered materials and technologies that assist the body’s regenerative capacity.
BIOSTATISTICS

Expert Master's

The Master of Biostatistics gives you a sound understanding of the theory and application of biostatistics relevant to professional practice.

You'll acquire skills and experience in complex statistical analyses, identifying and implementing appropriate statistical methodology, communicating biostatistical results and understanding biostatistical results and biostatistical literature. You’ll develop the technical skills to start a professional career as a biostatistician.

Units in this degree are offered in conjunction with partner universities in the Biostatistics Collaboration of Australia (BCA), a consortium of leading universities in Australia established to jointly develop and deliver a distance-based program in biostatistics.

Entry requirements
> An Australian bachelor’s degree (or equivalent) in science, psychology, medicine, pharmacy, nursing, health sciences or a quantitative discipline, plus a minimum of one year of full-time equivalent experience in clinical/health research or in a quantitative sector (e.g. engineering); and completion of MPH5041 introductory biostatistics or an equivalent unit or equivalent knowledge as deemed by the faculty.

Students without this background are encouraged to enrol in the Graduate Diploma in Biostatistics.

Additional requirements
> A statement of purpose (250 words) outlining reasons for undertaking the course and your area(s) of interest.

BIOSTATISTICS

Graduate Diploma

This course equips you with a broad range of theory and techniques for extensive upskilling in biostatistical methods.

It gives you an understanding of the mathematical background, theory and application of the principles of epidemiology and biostatistics in health and medical research. It also develops the analytical skills you’ll need to become statistically self-sufficient.

Units in this degree are offered in conjunction with partner universities in the Biostatistics Collaboration of Australia (BCA), a consortium of leading universities in Australia established to jointly develop and deliver a distance-based program in biostatistics.

Entry requirements
> An Australian bachelor’s degree (or equivalent) in science, psychology, medicine, pharmacy, nursing, health sciences or a quantitative discipline, plus a minimum of one year of full-time equivalent experience in clinical/health research or practice or in a quantitative sector (e.g. engineering); and completion of MPH5041 introductory biostatistics or an equivalent unit or equivalent knowledge as deemed by the faculty.

> A Graduate Certificate of Biostatistics from Monash University or another university in the BCA, or equivalent as deemed by the faculty.

Additional selection criteria
> A curriculum vitae relevant work experience or a statement from an employer to substantiate your period of employment.
> A statement of purpose (250 to 300 words) outlining reasons for undertaking the course and area(s) of interest.
BIOTECHNOLOGY

This new course integrates biotechnology and entrepreneurship, and equips you with the skills and knowledge to work in one of Victoria’s fastest-growing sectors.

The Master of Biotechnology integrates biotechnology and entrepreneurship through a range of multidisciplinary coursework, research and work-integrated units in modern areas of studies that pave the way to myriad employment prospects.

In the first year (Part A) of the course, you’ll be taught theoretical knowledge and practical skills in contemporary biotechnology-related topics, and the processes involved in obtaining research funding and translating biomedical products from lab to life.

In the second year (Part B) of the course, if you’ve achieved above a 70 per cent average in your first-year studies, you’ll have the option to undertake either a three-month or six-month industry placement in a pharmaceutical, medical device, life science and/or regulatory organisation. If you satisfactorily complete the placement program, you’ll be well-positioned to work in competitive industrial environments.

Part B will also allow you to undertake a research project, where you’ll work closely with experts in a specialised area of research to advance knowledge of human diseases, and explore therapeutic targets for the prevention and treatment of these conditions.

In addition to the industry placement program and research project, Part B offers a range of coursework electives in interdisciplinary fields of pioneering developments in biotechnology research and enterprise.

Entry requirements

Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration.

CLINICAL EMBRYOLOGY

Expert Master’s

This intensive training course gives you the knowledge and practical skills to contribute to human infertility clinical services. Your studies will include the foundations of mammalian embryology, detailed assessment of all infertility treatment strategies, and the theoretical basis behind embryo production, embryo selection and cryopreservation, with a focus on all current and future technologies associated with assisted reproductive technology (ART).

Through this internationally-renowned course you’ll acquire the practical skills required of andrologists and embryologists through continual hands-on training, and be ready to work in and manage human ART clinics. By completing a research project, you’ll enhance your research skills and have the opportunity to attend and present at local and international conferences.

You can also exit the course early with a Graduate Diploma in Clinical Embryology if you meet the requirements.

Entry requirements
You must have one of the following:

- An Australian bachelor’s degree (or equivalent) in a related field such as veterinary science degree, OR
- An Australian bachelor’s (hons) degree in science with a second class honours or above, OR
- An Australian bachelor’s degree and a Graduate Diploma in Reproductive Science from Monash University with a distinction (70 per cent) average, OR
- An Australian bachelor’s degree and a graduate diploma with a distinction (70 per cent) average deemed equivalent to the Monash University Graduate Diploma of Reproductive Sciences, OR
- An Australian bachelor’s degree in any field with a pass average, and at least one year (full-time equivalent) of professional experience in embryology or reproductive biology.

Additional requirements
- All applications are assessed on academic merit and relevant experience
- A curriculum vitae including work experience and two referees and/or work references, where applicable
- A statement of purpose (under 200 words) outlining why you wish to join this course.

Note: The Master of Clinical Embryology is a high-demand course. There’s a quota on the number of successful applicants. Applicants meeting the minimum academic requirements are not guaranteed entry.

CLINICAL MEDICINE

Expert Master’s

The Master of Clinical Medicine gives experienced health care practitioners the knowledge and skills to meet the challenges facing the modern health care system.

Delivered in partnership with The Alfred, this course will give you an academic framework to develop a range of advanced problem-solving and decision-making skills to achieve best-practice health outcomes for patients. Advance your career as you join the next generation of leaders in emergency, trauma and critical care.

Entry requirements
- MBBS AQF level 8 degree or equivalent medical degree recognised by the Medical Board of Australia, AND
- Registration with the Australian Health Practitioner Regulation Agency (AHPRA) or equivalent accredited professional registration body, AND
- A minimum of two years’ equivalent full-time experience in a related discipline and evidence of current engagement in clinical practice in area of specialisation.

International applicants will need:
- MBBS AQF level 8 degree or an equivalent medical degree recognised by the Medical Board of Australia, AND
- A current appropriate study visa (e.g. Training Visa), AND
- A minimum of two years of equivalent full-time experience in a related discipline and evidence of current engagement in clinical practice in the area of specialisation.

Applicants will need to meet additional requirements for each specialisation. Please visit monash.edu/study/courses/find-a-course/2018/clinical-medicine-m6023

2018 fees p.a.

> Master of Clinical Emergency Medicine
> Master of Clinical Trauma Medicine
> Master of Critical Care Medicine

Fees are per 48 credit points, which represents a standard full-time course load for a year. However, students will receive up to 24 points of specified credit in Part A for prior studies undertaken at The Alfred hospital by means of short courses, reducing the fee to A$13,000 for 2018. (Fees for the short courses are charged separately.)

COURSE CODE: M6023
The Graduate Certificate of Advanced Clinical Nursing is a post-professional program for registered nurses keen to undertake specialist training.

The course combines theory and clinical practice components with the aim of developing lifelong learners with problem-solving, communication and research skills. Successful graduates will work as specialist nurses in one of the following areas:

- Paediatric nursing
- Paediatric intensive care nursing
- Paediatric emergency nursing
- Medical surgical nursing.

Offered in partnership with key health care provider Monash Health, you’ll undertake clinical practice and assessment in an innovative clinical specialist environment. You’ll undertake leadership units at Monash and apply theory to practice under specialist supervision.

Entry requirements

- An Australian bachelor’s nursing degree (or equivalent), or qualification/experience or satisfactory substitute that the faculty considers to be equivalent. You must be employed as a registered nurse in paediatric nursing, paediatric intensive care nursing, paediatric emergency nursing or medical surgical nursing at an industry-partnered organisation.

Additional requirements

A letter from an employer outlining support for your study that includes your employment in at least one of the course’s practice areas.

Specialisations

Depending on your background, your studies will focus on:

- Paediatric nursing
  These studies provide a foundation for any nurse working with children, and prepares you for the management of ill paediatric patients. You’ll develop theoretical and clinical proficiency in the therapeutic interventions essential to care for paediatric patients and their families. The principles and practices taught throughout the course can be applied to all areas of paediatric nursing. You must be employed in a paediatric ward to complete this stream.

- Paediatric intensive care nursing
  This prepares you to deliver care to paediatric patients and their families in the intensive care unit. You’ll develop theoretical and clinical proficiency in the management of critically ill paediatric patients with respiratory, cardiac and renal conditions, and shock. This stream will also prepare you to manage mechanical ventilation and advanced haemodynamic monitoring in the paediatric population. You must be employed in an intensive care unit that treats paediatric patients to complete this stream.

- Paediatric emergency nursing
  These studies prepare you to deliver care to paediatric patients and their families in emergency departments. You’ll develop theoretical and clinical proficiency in assessment, recognition and management of the deteriorating paediatric patient. Skills will include advanced paediatric resuscitation, ventilation, triage, haemodynamic monitoring, trauma and transportation considerations. You must be employed in an emergency department that treats paediatric patients to complete this stream.

- Medical surgical nursing
  The advance practice general nurse requires a diverse knowledge and skill base to appropriately and effectively assess and manage clients/patients in a hospital environment. These studies enable you to develop proficiency in the holistic management of patients with cardiac, respiratory and renal dysfunction, and shock in the ward environment. You must be employed in a medical or surgical ward to complete this stream.
CLINICAL RESEARCH
Expert Master’s

The only course of its kind in Victoria, our Master of Clinical Research develops the analytical and communication skills necessary to work in the broad domain of clinical research and practice.

Through this program you’ll develop a detailed understanding of biostatistics, epidemiology, data management, clinical trials, clinical measurement, ethical practice, systematic reviews and meta-analysis, and critical appraisal of the scientific literature for application in research and clinical practice.

Taught by some of Australia’s leading clinical academics and with flexible content delivery, our curriculum is designed to help you balance the demands of a busy workflow with the need to engage in further professional development.

You may be eligible to take an alternative exit from the program with a Graduate Certificate or Graduate Diploma of Clinical Research, provided the award requirements have been met. Our program also offers a research stream, which can be used as a pathway to a PhD. You may also consider undertaking the Graduate Diploma of Clinical Research as a pathway to the master’s program.

Entry requirements
Depending on your prior qualifications and experience, you’ll be eligible for entry credit, which reduces the duration.

COURSE CODE: M6028
“By completing this course I’ll be able to practise as an accredited dietitian. It’ll provide me with greater opportunities for employment in my field and greater flexibility. Throughout the course I’ve been continually exposed to new environments and employment possibilities. By studying at Monash, I know I’ll be able to handle whatever comes my way.”

ANNA SCOBIE
Master of Dietetics
DIETETICS Professional Entry Master's

This graduate course equips you with the professional and personal qualities for future dietetic practice in a variety of workplace settings.

It integrates academic teaching and learning with clinical, population health, food service, research and management experience, and is carried out in both academic and professional practice placement settings. Professional practice placements may be in an urban or rural setting. You'll complete supervised placements in both clinical and community settings, gaining a breadth of professional experience. You'll work closely with patients at Victoria's major hospitals, and implement public health projects with organisations such as YMCA and Parks Victoria.

In this course, there are also plenty of opportunities to apply your dietetics knowledge outside of the classroom. You'll learn through simulated patient scenarios, hands-on food activities and by working in Monash's on-site nutrition clinic.

Graduates will fulfill the national competency standards for entry level dietetics as defined by the Dietitians Association of Australia (DAA).

Entry requirements
Dependong on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration.

Master of Dietetics

COURSE CODE: M6002

Fees are per 48 credit points, which represents a standard full-time course load for a year.

* A limited number of Commonwealth Supported Places (CSP) are available to eligible applicants. The CSP rates published in this guide are indicative and can vary depending on unit enrolment.

~ This course is not available for first-semester (February) entry unless you have completed the Monash University Bachelor of Nutrition Science degree with the required subjects, or an equivalent nutrition science degree where credit may be given for units completed that are equivalent to the first-semester units of the master's program.
FORENSIC MEDICINE

Expert Master’s

You’ll gain the advanced expertise that’ll make you highly sought-after in the forensic medical, dental or science fields.

Building on your qualification in medicine, dentistry, biomedical science or radiography, you’ll be able to apply your knowledge in the interests of justice and will learn to make high-level, independent judgements in the forensic setting; gain sound knowledge of medico-legal principles; gain the skills to clearly communicate medico-legal issues to the justice system; prepare effective and objective medico-legal reports; critically evaluate the ethical and legal issues arising in forensic medical practice; and interpret wounds and injury patterns.

You’ll have the necessary attributes to work in the fields of forensic medicine, dentistry or science within the parameters of the justice system. You may be able to take an alternative exit from the program with a Graduate Diploma of Forensic Medicine or Graduate Certificate of Forensic Medicine, provided you’ve met the requirements.

Entry requirements

Clinical forensic medicine

> A Bachelor of Medicine and Surgery + current employment in clinical practice with a minimum of three years’ experience, AND
> Satisfactory proof of appropriate current professional medical registration in your current country of residency and practice – for example, Australian citizens and permanent resident visa holders must hold current professional registration with the AHPRA, OR
> Bachelor of Nursing or Master of Nursing + current employment as a registered nurse in clinical nursing practice in a medical or surgical ward of a hospital with a minimum of three years’ experience, AND
> Satisfactory proof of current professional registration as a registered nurse in your country of residency and practice – for example, Australian citizens and permanent resident visa holders must hold current professional registration with the Nursing and Midwifery Board of Australia (NMBA) and the AHPRA.

Enrolled nurses are not eligible to apply for entry to this course.

Forensic odontology

> A Bachelor of Dentistry and current employment in a dental practice with a minimum of three years’ experience, AND
> Satisfactory proof of appropriate current professional dental registration in your current country of residency and practice – for example, Australian citizens and permanent resident visa holders must hold current professional registration with the AHPRA.

Forensic medical science

> Bachelor of Biomedical Science (hons) and current employment in a relevant laboratory setting with a minimum of two years’ experience, OR
> Bachelor of Science (Honours) and current employment in a recognised forensic institute with a minimum of two years’ experience, OR
> Bachelor of Radiography and Medical Imaging (Honours) + current employment in radiography practice with a minimum of two years’ experience, AND
> Satisfactory proof of appropriate current professional registration as a radiographer in your current country of residency and practice – for example, Australian citizens and permanent resident visa holders must hold current professional registration with the AHPRA.

Specialisations

Clinical forensic medicine

Clinical forensic medicine covers a wide range of activities at the intersection of medical practice and the law. These medico-legal services overlap many other medical specialty areas – paediatrics, gynaecology, clinical toxicology, emergency medicine, psychiatry, dentistry and forensic pathology. However clinical forensic medicine discipline has become home to the issues inherent in child and adult sexual/physical assault, traffic medicine and custodial medicine. The services are provided by clinicians working either exclusively in the field of clinical forensic medicine or in the other medical specialities, including general practice.
Forensic odontology
Forensic odontology covers the handling, examination and evaluation of dental evidence that will be presented in the interest of justice. It covers activities such as human identification (including mass-fatality victim identification), bite mark analysis, craniofacial trauma analysis, age estimation (of both the living and the deceased), child abuse and dental malpractice.

As a forensic odontologist your expertise will be called upon across the medico-legal spectrum, and you’ll work closely with forensic pathologists, clinical forensic medical practitioners, forensic anthropologists and forensic scientists.

Forensic medical science
Forensic medical science covers disciplines including forensic toxicology and pharmacology, mortuary technical science, forensic imaging and forensic aspects of molecular biology. As a forensic toxicologist you’ll be concerned with the analysis and interpretation of body fluids for the discovery of forensically relevant drugs (either illicit or prescription), the results of which will apply to cases involving both for the living and dead.

Forensic toxicologists need a solid understanding of forensic pathology and death investigation, as most of the work is carried out in a coronial environment. As a mortuary scientist you’ll work with forensic pathologists in conducting the forensic autopsy, and be responsible for evisceration and reconstruction of the deceased, the safe collection of forensic samples, and for the ethical and respectful treatment of the deceased.

Mortuary science increasingly involves understanding advanced imaging modes, and appreciating the capabilities of fields such as forensic anthropology, molecular biology and, particularly, forensic pathology, and death investigation systems and protocols.

“...I chose this course for its flexible learning schedule, and the opportunity to learn from some of Australia’s best forensic practitioners at the Victorian Institute of Forensic Medicine. My most memorable moment during the course was practising forensic odontology with the late Dr Anthony Hill. The Master of Forensic Medicine has made me a better practitioner in the field, and the knowledge and skills developed have allowed me to be involved in advance-level casework. After completing this course, I volunteered in Nepal after the 2015 earthquake, providing guidance to Nepalese forensic dentists in disaster victim identification.”

DR ALISTAIR SOON
Dental Officer (Forensic), Queensland Health Forensic and Scientific Services
Master of Forensic Medicine (2015)
HEALTH ADMINISTRATION
Expert Master’s

This course provides the academic preparation for managers in health care and public health, and those aspiring to such a career.

This includes managers in the broad range of health care organisations, from central agencies, health insurers, non-government organisations and the various health provider organisations. You’ll receive structured learning in key management disciplines, including policy, organisational theory, financial management, human resources management, economics and marketing, with an emphasis on health care organisations and specific health-focused domains such as epidemiology, biostatistics and managing the patient care process.

The course takes an adult-learning approach, encouraging self-directed learning, independent research and enquiry, reflection from practice, and peer learning with guidance from experienced academics.

Entry requirements
An Australian bachelor’s degree (or equivalent) in a related discipline, including health sciences, business, commerce, economics or law, and two years’ work experience or qualification/experience or a satisfactory substitute that the faculty considers to be equivalent, and a minimum of two years’ industry/management experience.

The minimum industry experience is needed for you to apply complex theories and knowledge to professional practice in health care and public health management. It also enables you to positively contribute to the peer learning incorporated into the course.

Additional requirements
The following must be submitted before an application can be assessed:

> A curriculum vitae showing relevant industry experience or a statement from an employer to substantiate your period of employment
> Academic transcript(s) of relevant degrees
> A statement of purpose (250 words) outlining reasons for undertaking the course and your area(s) of interest.

ADVANCED HEALTH CARE PRACTICE

Expert Master’s

Are you a medical practitioner, nurse, midwife, occupational therapist, physiotherapist, radiographer, radiation therapist, primary health care practitioner or manager?

The Master of Advanced Health Care Practice is a pathway for professionals like you to gain a master’s-level qualification that enhances your undergraduate degree – and provides the widest range of career options for the future. This course is inter-professional, and you’ll complete a common module – essentials of advanced health care practice and research. This reflects the collaboration required in practice to deliver the highest-quality health care.

Entry requirements
Depending on your prior qualifications and experience, you’ll be eligible for entry credit, which reduces the duration.

Specialisations

Clinical midwifery
This is designed to prepare experienced registered (in their country of origin) midwives for senior management, education, and professional and specialist leadership roles in a range of midwifery settings.

Medical imaging
This specialisation is designed for radiographers and nuclear medicine technologists keen to assume advanced-practice roles in advanced modality-based imaging, clinical leadership and education. It’ll give you opportunities to either complete a research project or study a variety of topics, including advanced CT, MRI, image interpretation, patient assessment, hybrid and molecular imaging, data management and health informatics, clinical leadership and education.

Occupational therapy
This helps occupational therapists deepen their knowledge and practice in advanced human occupation, health and wellbeing: to develop knowledge and skills for leading the management, design and delivery of health and community programs; and to take on a program of study designed to develop advanced occupational therapy practice roles, such as in hand therapy, using adaptive and assistive technology, or addressing the needs of children with disabilities and their families.

Paediatric physiotherapy
If you’re a physiotherapist with an interest in developing advanced-practice roles in the sub-speciality of paediatrics, including neonates, infants and those with particular needs, this specialisation’s ideal for you.

Primary health care
Designed for those working within inter-professional primary health care teams, this specialisation enables medical practitioners, nurses, allied health professionals and primary health care administrators and managers to undertake a research project in their area of interest.

Radiation therapy
This is designed for radiation therapists keen to hone their knowledge and skills before assuming advanced-practice roles in radiation therapy planning and treatment. Your key topic areas include international and local perspectives on radiation therapy service provision, patient care and the management of radiation-induced side effects, radiation therapy imaging, and advances in radiation therapy for breast cancer.

COURSE CODE: M6001

1. Selection is based on previous academic achievement. There are specific requirements for each specialisation – for further details, visit monash.edu/study
2. Even if you’re eligible for entry credit, you don’t need to take it. You may apply for and complete the longer duration. Not all specialisations are available for study as a 1.5-year duration.

Fees are per 48 credit points, which represents a standard full-time course load for a year.

* This course is delivered in off-campus mode apart from the clinical midwifery practice specialisation, which is delivered at the Peninsula campus.

^ The Master of Advanced Radiation Therapy Practice is only offered in Semester 1 (February).
HEALTH AND SCIENCE RESEARCH

Graduate Diploma

Develop your passion for research.

Build on your undergraduate degree and advance your knowledge in a health or science discipline through a combination of coursework and research. You’ll also undertake research methodology training and carry out an independent research project in your selected discipline, working closely with a supervisor who’ll provide you with guidance and academic counselling. The course offers a pathway to higher-degree research.

Entry requirements

An Australian bachelor’s degree (or equivalent) with at least a distinction (70 per cent) average in a relevant discipline, as well as a distinction (70 per cent) average in at least 24 points at level 3 or above in the discipline, or qualification/experience or satisfactory substitute that the faculty considers to be equivalent.

Specialisations

Medicine, Nursing and Health Sciences
- Biomedical science
- Emergency health
- Nursing
- Nutrition science
- Physiotherapy.

Science
- Astrophysics
- Biological sciences
- Chemistry
- Earth science
- Materials science
- Mathematics and statistics
- Physics.

HEALTH SERVICES MANAGEMENT

Expert Master’s

If you’re working or planning to work in middle or senior management roles in health care, the Master of Health Services Management is for you.

Your core units cover law for health systems, clinical leadership and management, improving health care quality, financial issues in health care management, foundations health policy, epidemiology and biostatistics, reform and development of health services, and a health services management case study. You can choose your electives from units offered in our Master of Public Health or other approved master-level management units. You can also exit the course early with a Graduate Certificate in Health Services Management or a Graduate Diploma in Health Services Management if you meet the requirements.

Entry requirements

An Australian bachelor’s degree (or equivalent) in an appropriate discipline with at least a credit 60 per cent average and relevant professional experience or qualification/experience or satisfactory substitute that the faculty considers to be equivalent.

Additional requirements

- A curriculum vitae showing relevant industry experience.
- A statement of purpose (250 words) outlining your reasons for undertaking the course must be submitted for an application to be assessed.
“Monash stood out to me because of the wide range of subjects to choose from, allowing me to tailor the course to what was most relevant to me and the direction I wish to take my career. I’ve been able to use what I’ve learnt in this course to directly influence practice in my workplace.”

LISA DONE
Master of Health Services Management (2016)
HEALTH SERVICES MANAGEMENT

Graduate Certificate

This certificate targets professionals working within the health care sector keen to expand their knowledge in the management of health services.

It’ll give you the core competencies in health services management, including leadership, human resource and financial management of health services. The course articulates with the Master of Health Services Management and the Master of Public Health.

Entry requirements
An Australian bachelor’s degree (or equivalent) in an appropriate discipline with at least a credit (60 per cent) average, or qualification/experience or a satisfactory substitute that the faculty considers to be equivalent.

Additional requirements
> A curriculum vitae showing relevant industry experience.
> A statement of purpose (250 to 300 words) outlining your reasons for undertaking the course must be submitted for an application to be assessed.

Graduate Diploma in Health Services Management

This graduate diploma gives you a broad framework to manage clinical health care systems.

The course covers human resource, financial, informational, medico-legal, political, cultural, economic, ethical, industrial, technological and psychosocial issues.

Entry requirements
An Australian bachelor’s degree (or equivalent) in an appropriate discipline with at least a credit (60 per cent) average and relevant professional experience, or qualification/experience or satisfactory substitute that the faculty considers to be equivalent. The department will individually assess applications from those without a degree who have extensive professional experience.

Additional requirements
> A curriculum vitae showing relevant industry experience
> A statement of purpose (250 words) outlining your reasons for undertaking the course and your area(s) of interest.
Our four-year graduate entry medical program is designed as an integrated, interdisciplinary curriculum. It will prepare you to graduate with the knowledge, skills and attributes of a beginning medical practitioner.

The overall vision is to deliver a course that supports the high international reputation and strengths established by the Faculty of Medicine, Nursing and Health Sciences at Monash University.

You’ll see the discoveries of our renowned researchers put into clinical practice and benefit from our links with the largest health care provider network in Australia, which includes the Monash Medical Centre and The Alfred (Melbourne’s major casualty hospital), Eastern Health and Victorian health services in rural, regional and outer metropolitan Melbourne. The course is designed as an integrated curriculum, with units taught in an interdisciplinary fashion by staff from across the faculty and in a wide range of learning environments both on-campus and at clinical sites.

**Entry requirements**

To be eligible for consideration, you must have (or be in the final year of) one of these Monash University degrees:

- Bachelor of Biomedical Science (including double degrees)
- Bachelor of Pharmacy (Honours)
- Bachelor of Physiotherapy (Honours)
- Bachelor of Science with specified units.

A minimum weighted average mark of 70 per cent is required for consideration.

Fifty domestic places are reserved for students undertaking Monash’s Bachelor of Biomedical Science. A further 25 places are available to students of all specified degrees.

You’ll be ranked on your academic results. If you’re shortlisted, you’ll be invited to attend a Multiple Mini Interview (MMI) and will have to complete a Situational Judgement Test (SJT) as part of the selection process. (Note: applicants are not required to undertake the GAMSAT.)

**Special requirements**

Upon enrolment you’ll be asked to comply with the mandatory immunisation requirements in readiness for clinical/fieldwork placements.

You’ll also have to obtain a Police Check (annual requirement) and a Working with Children Check.

It’s highly recommended that you hold a current Provide First Aid certificate before enrolling in this course.
MEDICAL ULTRASOUND
Professional Entry Master’s

If you want to pursue a career as an accredited sonographer, this course is for you.

After completing the first two foundational units of the course, you’ll take part in supervised clinical ultrasound training practise for a minimum of three days a week, or equivalent. (Please note that the University does not accept any responsibility for finding clinical placements.) You can exit the course after 48 credit points (a minimum two years of study) with a Graduate Diploma in Ultrasound, which meets the qualification requirement for accreditation as a sonographer.

The final year of the course focuses on developing your research skills through an ultrasound research project. This course is fully supported by nationally-recognised academics, sonographers and researchers.

Entry requirements
To be eligible for admission, you must have either:
> An Australian bachelor’s degree in radiography and medical imaging (or equivalent) with at least a pass (55 per cent), OR
> A related science or health science degree with at least a pass (55 per cent) average, including the study of “full-body” human anatomy and physiology (or equivalent bridging course), OR
> Qualification/experience or a satisfactory substitute that the faculty considers to be equivalent, AND
> You must also have passed either Year 12 level physics or an equivalent bridging course†.

Additional requirements
Following completion of the two foundation units (SON4000 and SON4010), you must be engaged in supervised clinical ultrasound training practise for a minimum of three days a week (or equivalent). It’s your responsibility to secure your clinical training placement. Note: competition for limited clinical training placements is very high. Applicants from a non-imaging background are strongly advised to secure their clinical placement before undertaking this program. The University does not accept any responsibility for finding clinical placements.
† Details of equivalent bridging courses in physics and human anatomy and physiology can be obtained by contacting the Department of Medical Imaging and Radiation Sciences via email: radiation.sciences@monash.edu

Florence Nightingale Faculty of Health Sciences

RANKED TOP 30 IN THE WORLD
QS World University Rankings by Subject 2018

MEDICINE
Expert Master’s

Gain the skills to deliver collaborative and optimal perioperative care to patients presenting with complex, chronic and acute medical conditions requiring surgical intervention.

It takes an evidence-based and risk-informed approach to the justification of perioperative medical interventions in modern surgical settings. You’ll also develop skills in research and clinical leadership in this emerging medical discipline. The course – conducted by Monash’s Anaesthesia and Perioperative Medicine and Public Health and Preventive Medicine – is recognised by the Australasian College for Emergency Medicine (ACEM) and the Australian and New Zealand College of Anaesthetists (ANZCA).

Entry requirements
An Australian MBBS or an equivalent basic medical degree recognised by the Medical Board of Australia or a satisfactory substitute that the faculty considers to be equivalent. Additionally, English language requirements must be met.
MENTAL HEALTH SCIENCE

Expert Master’s

This course develops professional knowledge and skills for clinicians delivering mental health care.

Depending on your undergraduate studies, you can select from community mental health, child psychotherapy, psychiatrist-in-training or mental health nursing. These specialisations aim to meet the specific needs of these disciplines within mental health services. The course can be completed by coursework, or if you’re seeking to build your research capability, you can incorporate a research project or minor thesis as part of your studies. This three-year, part-time degree is taught off-campus by some of Australia’s most experienced mental health professionals and researchers, allowing you to apply the latest thinking to your workplace as you study. The course also includes an on-campus workshop.

Whichever specialisation you choose, you’ll graduate with the ability to evaluate research literature, identify research gaps, conduct practice-based research projects, and develop, apply and advocate evidence-based best practice.

Entry requirements

An Australian bachelor’s degree (or equivalent) in a related discipline1 with at least a credit (60 per cent) average, or qualification/experience or satisfactory substitute that the faculty considers to be equivalent and relevant work experience. You must submit a comprehensive curriculum vitae citing evidence of current employment with the relevant mental health focus.

Specialisations

Child psychotherapy

The child psychotherapy specialisation gives you a deep understanding of psychoanalytic and developmental theory, and how it can help children and adolescents with emotional and behavioural problems. Completing all units in this pathway fulfils part of the criteria for professionals to be eligible for membership of the Victorian Child Psychotherapy Association.

Community mental health

The community mental health specialisation provides a thorough understanding of community mental health practice in Australia, from population-based to individual clinical and rehabilitation interventions, to family and community support, to policy and planning. It’s relevant not just to case management, disability support and non-clinical mental health workers, but also to clinical psychologists, trainee psychiatrists, general practitioners, psychiatric nurses, occupational therapists and social workers.

Mental health nursing

The mental health nursing specialisation provides a deep understanding of the philosophy and theory underpinning mental health nursing, its values and the requisite skills to maintain clinical relationships and assist in person-centred mental health care that aids recovery. Through completion of elective units that include psychoanalytic and developmental theory, mental health of the elderly, psychopharmacology and physical treatments, transcultural mental health, forensic mental health and family violence, the mental health nurse will be equipped to provide competent clinical care in a range of mental health settings.

Psychiatrist-in-training

The psychiatrist-in-training specialisation corresponds to the curriculum required by the Royal Australian and New Zealand College of Psychiatrists’ (RANZCP) Formal Education Course (FEC) as described in the college regulations for trainee psychiatrists in a clinical training program. This specialisation will correspond with the FEC curriculum that covers the first three years of psychiatry training, providing the knowledge, values and skills covered by that curriculum and complementing the entrustable clinical activities undertaken through the RANZCP supervised clinical training for psychiatrists.

Alternative exits

> Graduate Certificate of Mental Health Science
> Graduate Diploma of Mental Health Science
> Master of Child Psychotherapy
> Master of Community Mental Health
> Master of Mental Health Nursing
> Master of Psychiatry

Fees are per 48 credit points, which represents a standard full-time course load for a year.

*Mental health nursing specialisation only.

COURSE CODE: M6022
The Master of Advanced Nursing prepares you for leadership roles in clinical nursing, management and education.

Clinical specialisations include emergency nursing, intensive care nursing, mental health nursing, perioperative nursing, and nurse practitioner. Clinical specialties require that you have concurrent employment as a registered nurse in the area. The course enables you to develop advanced practice knowledge and leadership in specialist practice, including skills to plan, implement, coordinate and evaluate health care, as well as the ability to formulate policy for a diverse and multicultural society.

Specialisations include:
- Emergency nursing**
- General studies in advanced nursing
- Intensive care nursing**
- Mental health nursing**
- Nursing education
- Nursing leadership and management
- Nurse practitioner*
- Perioperative nursing**.

The program has flexible teaching delivery options and offers a range of individual career pathways, including nursing, education or management positions within industry, government or independent professional practice.

Most specialisations can be taken by coursework, or a combination of coursework and research.

You can also exit the course early, if you meet the requirements, with a Graduate Certificate of Advanced Nursing or a Graduate Diploma of Advanced Nursing.

Entry requirements
Depending on your prior qualifications and experience, you’ll be eligible for entry credit, which reduces the duration.

### ELIGIBILITY

<table>
<thead>
<tr>
<th>Eligibility</th>
<th>Duration (years)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bachelor’s degree in nursing (or equivalent) with a credit (60%) average</td>
<td>1.5</td>
</tr>
<tr>
<td>Bachelor’s (hons) degree in nursing (or equivalent) with a credit (60%) average</td>
<td>1</td>
</tr>
</tbody>
</table>

1. Selection is based on previous academic achievement.
2. Not all specialisations are available for full-time study. Even if you’re eligible for entry credit, you don’t need to take it. You may apply and complete the longer duration.

Additional requirements
- Application letter advising specialisation
- Certified evidence of current nursing registration
- Certified copy of transcript of results/previous education achievements
- Letter of support from employer (where applicable).

### Specialisations

#### Emergency nursing (Peninsula)
You’ll be equipped with leadership skills in emergency nursing management to plan, implement and coordinate and evaluate health care, as well as formulate policy for a diverse, multicultural society.

#### General studies in advanced nursing (Clayton and Peninsula)
This enables you to tailor your unit choices to suit your interests or needs while maintaining a strong focus on leadership. You’ll liaise with your course coordinator to choose the units that will best suit your needs.

##### Intensive care nursing (Clayton)
This gives you the leadership skills in intensive care nursing management to plan, implement and coordinate and evaluate health care, as well as formulate policy for a diverse, multicultural society.

##### Mental health nursing (Peninsula)
You’ll gain the leadership skills in mental health nursing to plan, implement and coordinate and evaluate health care, as well as formulate policy for a diverse, multicultural society.
Nursing education (Peninsula)
You’ll be provided with leadership skills in a variety of nursing education contexts, including curriculum development.

Nursing leadership and management (Clayton)
You’ll gain leadership and management skills in a variety of nursing service contexts and individual career pathways, including nursing, education or management positions within industry, government or independent professional practice.

Nurse practitioner (Clayton)
In this specialisation you’ll gain an advanced understanding of health assessment, diagnostics, pharmacology and clinical decision-making in order to provide holistic care to patients in your scope of practice. Nurse practitioners may be involved in, among many other things, making direct referrals of patients to other health care professionals, prescribing medication, and ordering diagnostic investigations. This specialisation is accredited by ANMAC for nurse practitioner endorsement.

Perioperative nursing (Clayton)
This specialisation will provide you with leadership skills in perioperative nursing, combining scrub scout and peri-anaesthetic role management, to plan, implement and coordinate and evaluate perioperative care, as well as formulate policy for a diverse and multicultural society.

“I’m currently employed at Monash Health and work within the intensive care unit as a critical care registered nurse. This University has worked tirelessly to forge great industry connections, and a degree from Monash is well-recognised and valued in my sector. This degree has made me a better and more desirable ICU nurse. I apply the skills I’ve learnt throughout the course on every shift, and I’m able to share specialist knowledge and skills I’ve gained with new students and my peers.”

CHLOE PEPPIN
Graduate Certificate of Advanced Nursing (2016)
NURSING PRACTICE
Professional Entry Master's

The Master of Nursing Practice provides a professional nursing qualification for those who have gained an Australian bachelor's degree (or equivalent) from a recognised university.

This intensive program immerses you in clinical experience from the start of your degree. You'll spend half your week on clinical placement in metropolitan and regional Victoria, where you'll put classroom concepts into practice on the wards.

The Master of Nursing Practice provides you with the knowledge and clinical skills to provide high-quality nursing care.

Once graduated you're skilled in problem-solving and clinical reasoning, competent and safe in your practice of clinical nursing skills, and able to work within legal and ethical standards of practice.

Entry requirements
An Australian bachelor's degree (or equivalent qualification from a recognised tertiary institution, excluding a Bachelor of Nursing qualification obtained in Australia) with at least a credit (60 per cent) average.

You'll also need to provide evidence of previous tertiary-level study of a minimum of one six-credit-point unit in human biology (or a related area) from any recognised tertiary institution or the Monash Human Biology short course, which has been assessed as equivalent to this requirement. For further details, visit monash.edu/medicine/nursing/study/humanbiology

Special course requirements
Upon enrolment you'll be asked to comply with the mandatory immunisation requirements in readiness for clinical/fieldwork placements.

You'll also be required to obtain a Police Check (annual requirement) and a Working with Children Check.

"The Master of Nursing Practice has given me the tools I need to answer some of the most challenging health problems facing my community here and back at home."

YADASA GUTU
Master of Nursing Practice (2017)
The Master of Occupational and Environmental Health gives you the skills in quality-level occupational health and safety services to identify, prevent and manage occupational and environmental health risks and related health problems.

You’ll learn to systematically control related hazards and exposures within a broad range of workplace and community environments. You’ll be equipped to take responsibility for high-level independent judgements, and initiate, implement and evaluate risk management interventions within varied occupational and environmental contexts.

It’s particularly suited to medical practitioners, nurses, allied health personnel, scientists and occupational health and safety managers. The course is offered by off-campus learning, however compulsory block attendance is required each semester.

Entry requirements
An Australian bachelor’s degree (or equivalent) in a related discipline or qualification/experience or satisfactory substitute that the faculty considers to be equivalent.

Additional requirements
> A curriculum vitae showing relevant industry experience.
> A statement of purpose (250 words) outlining your reasons for undertaking the course and your area(s) of interest.
> Academic transcripts must be provided before application can be assessed.

It’s particularly suited to medical practitioners, nurses, allied health personnel, scientists and occupational health and safety managers. The course is offered by off-campus learning, however compulsory block attendance is required each semester.

Entry requirements
An Australian bachelor’s degree (or equivalent) in a related discipline and qualification or experience, or satisfactory substitute, that the faculty considers to be equivalent.

Additional requirements
> A curriculum vitae showing relevant industry experience.
> A statement of purpose (250 words) outlining your reasons for undertaking the course and your area(s) of interest.
> Academic transcripts must be provided before an application can be assessed.

OCCUPATIONAL AND ENVIRONMENTAL HEALTH

Graduate Diploma

This course gives health professionals the attitude, skills and knowledge to provide preventive health services to both reduce the health impacts of disease and injury, and to systematically address hazards arising from workplaces and within communities.

It caters for the special needs of medical practitioners, nurses, allied health personnel, scientists or OHS managers keen to develop adaptable and responsible skills as OHS and environmental health practitioners. The course is offered by off-campus learning, however compulsory block attendance is required each semester.

Entry requirements
An Australian bachelor’s degree (or equivalent) in a related discipline and qualification or experience, or satisfactory substitute, that the faculty considers to be equivalent.
OCCUPATIONAL THERAPY PRACTICE

Professional Entry Master’s

Become an occupational therapist in just two years with our accelerated learning program.

It requires full-time enrolment over two years from July to May (mid-year intake), and operates over 72 weeks. This includes 1000 hours of fieldwork education to meet the World Federation of Occupational Therapists’ minimum standards for the education of occupational therapists. You’ll also have opportunities to work with clients on campus in our supported accommodation units.

Our course is an integrated curriculum focused on scenario-based learning (SBL). The two years of the SBL curriculum are organised into the following units:

> Foundations of occupational therapy
> Humans as occupational beings
> Occupational performance
> Enabling change in human occupation
> Transition to practice
> Advanced professional practice.

Working collaboratively with one of our partners, you’ll also complete an extensive practice-based project in the community, and build professional skills in communication and project management.

Entry requirements

> An Australian undergraduate degree (or equivalent) with at least a high credit (65 per cent) average, and have completed either:
> A minimum of at least one six-credit-point unit of study in human anatomy/physiology or a related area from any recognised tertiary institution or the Monash Human Biology short course (visit monash.edu/medicine/nursing/study/humanbiology), OR
> BMA1901 Human Structure and Function as a single-unit enrolment at Monash.

Applicants who are already registered occupational therapists in Australia or overseas aren’t eligible to be considered for this course.

Special course requirements

Upon enrolment you’ll be asked to comply with the mandatory immunisation requirements in readiness for clinical/fieldwork placements. You’ll also need to obtain a Police Check (annual requirement) and a Working with Children Check.
This qualification replaces the Master of Emergency Health.

The Master of Specialist Paramedic Practice (which includes a nested graduate certificate for the aeromedical and retrieval specialisation, as well as a graduate diploma for the intensive care and extended care specialisations) supports existing and experienced paramedics in improving their current knowledge, skills and clinical practice in order to prepare them for specialist clinical positions, as well as for leadership, education and research roles.

You’ll be provided with advanced education and training in pre-hospital care in an intensive care, extended care or aeromedical and retrieval specialisation. You’ll extend your clinical practice by initially undertaking specialist paramedic-focused training in advanced clinical leadership and decision-making, as well as advanced techniques, in order to provide the highest level of care in your chosen specialisation. You’ll also explore clinical practice within an integrated emergency medical system, and consider the issues and trends that influence scope of practice and service delivery.

You’ll study clinical research methodology and may choose to complete a research project or other specialist elective coursework units to enhance your clinical skills. Completion of the research stream provides a pathway into higher degrees by research (subject to meeting separate HDR entry requirements.) You may also apply to exit the master’s course with one of the nested awards, provided you meet the criteria.

Entry requirements
To be eligible for admission, you’ll need to have:

> An Australian bachelor’s degree (or equivalent), with at least a credit (60 per cent) average in emergency health or equivalent undergraduate studies leading to practice as a paramedic, OR
> Qualification/experience or satisfactory substitute that the faculty considers to be equivalent.

You’re required to have both:

> Independent authority to practise as an advanced life support paramedic (or equivalent), AND
> A minimum of two years experience in the field of paramedic practice post-qualification at the time of commencement of the course. You may also be considered on an individual basis with appropriate employer endorsement.

Specialisations

**Aeromedical and retrieval**
Gain the necessary education and training for aeromedical and retrieval roles, as well as leadership, education and research positions. You’ll start by undertaking specialist aeromedical and retrieval education and training, as well as education in advanced integrated health care practice, before completing specialty elective study. This stream will equip you to successfully complete an aeromedical and retrieval internship/program with your retrieval service provider in order to provide the specialist aeromedical, retrieval, rescue and coordination roles in your area of clinical practice.

**Extended care**
Develop the necessary skills for a specialist extended care paramedic role, as well as leadership, education and research positions. You’ll initially undertake specialist extended care paramedic education and training, as well as education in advanced integrated health care practice, before going on to complete specialty elective study. This stream gives you the skills to complete an extended care internship/program and provide an extended range of out-of-hospital assessment, referral, prescription and management services in the community.

**Intensive care**
This course provides paramedics with the necessary education and training for specialist intensive care paramedic roles, as well as leadership, education and research positions. You’ll initially undertake specialist intensive care paramedic education and training, as well as education in advanced integrated health care practice, before going on to complete specialty elective study. This stream will give you the skills to complete an intensive care internship and provide the highest level of paramedic care for cardiac, respiratory, medical, trauma, paediatric, obstetric and environmental emergencies.

---

**Fees are per 48 credit points, which represents a standard full-time course load for a year.**

COURSE CODE: M6015
**PSYCHOLOGY**

**Graduate Diploma**

This course provides you with a major in psychology accredited by the Australian Psychology Accreditation Council (APAC), allowing you to do the further training needed to obtain professional qualifications.

It's offered in a purely online mode, but will include at least one hour each week of participation in live learning activities. The course structure consists of an APAC-accredited sequence in psychology of nine core units and one elective. Studies include developmental and biological psychology, research design and analysis, cognitive and social psychology, abnormal psychology, perception and personality, psychological testing, theories of ability and ethics, and research methods and theory.

Electives offered may include units covering counselling, health psychology, addiction studies, human neuropsychology and cognition, psychology and the law, and music psychology.

**Entry requirements**

You'll need to have completed an Australian bachelor's degree (or equivalent qualification) in any discipline or higher university qualification.

---

**PSYCHOLOGY ADVANCED**

**Graduate Diploma**

Increase your understanding of theoretical and methodological aspects of research, develop your analytic, research and communication skills, and gain advanced knowledge in specific areas of the science and practice of psychology.

You'll complete learning activities to expand your knowledge of statistics and the ethics of psychological research and practice, and broaden your understanding of the discipline. You'll also take on a supervised research project, providing training in both discipline-specific and generic research skills. The research project is the basis of a literature review and research paper you'll present at the end of the course.

**Entry requirements**

> An Australian bachelor's degree with a major in psychology or a graduate diploma in psychology, accredited by the Australian Psychology Accreditation Council (APAC) with at least a distinction (70 per cent) average across second and third-year psychology units (including psychology electives), or across all psychology graduate diploma units excluding any foundational units.

These qualifications must have been completed within the past 10 years. Applicants with international qualifications will need to have their qualifications assessed by the Australian Psychological Society (APS).

www.psychology.org.au
PUBLIC HEALTH

Expert Master’s

You’ll be provided with the full range of quantitative, analytical and communication skills to work in public health.

You’ll also learn the quantitative methods of the population-based health sciences and their problem-solving application for primary care provision in Australia and developing countries.

Entry requirements

You need to satisfy the following entrance requirements to be considered for entry to this course. To be eligible you’ll need to have either:

> An Australian bachelor’s degree (or equivalent) in a related field and two years of relevant experience1 or one year of hospital experience in a clinical role as a medical practitioner, OR
> One year of experience in the health industry and two years’ experience in full-time work.

Additional requirements

> Curriculum vitae, relevant work experience or a statement from an employer to substantiate your period of employment
> A statement of purpose (250 words) outlining your reasons for undertaking the course and areas of interest.

1. Relevant experience in the health industry, government sector, policy, a provider (e.g. hospital or clinic), non-government organisation (NGO), academic institution, consulting or pharmaceutical company.

“I got to hear first-hand from industry experts and to network with them. It gave me the skills and confidence to think laterally and to gain up-to-date knowledge of the pressures on health systems in an array of contexts, and from a number of perspectives.”

FRANCES NG

Master of Public Health (2013)
PUBLIC HEALTH

Expert Master’s

Your internationally-recognised passport for careers in government, industry and organisations throughout the health sector.

Taught by Victoria’s leading public health professionals and The Alfred hospital clinicians, our graduates contribute to improving public health on a national and global scale. You’ll develop the full range of qualitative, analytical and communication skills to work and lead in public health.

Our program offers a wide choice of electives around our expertise in areas such as epidemiology and biostatistics, clinical research methods, health economics, health promotion and policy, so you can customise your studies around your career interests.

Study units are offered in flexible delivery mode – on-campus, off-campus, block mode or online.

Entry requirements

Depending on your prior qualifications and experience, you’ll be eligible for entry credit, which reduces the duration.

Fees are per 48 credit points, which represents a standard full-time course load for a year.

COURSE CODE: M6024
RADIATION THERAPY
Professional Entry Master’s

If you have a first degree in science or a related health discipline, this two-year, accelerated learning program allows you to gain a professional entry-level qualification at graduate level.

After completing the program, you’ll be able to apply for general registration as a radiation therapist from the Medical Radiation Practice Board of Australia. You’ll have job opportunities in both the public and private health sectors in metropolitan and regional Australia. It’s the only online graduate-entry radiation therapy program offered in Australia, and if you’re an interstate student you may be able to study in your home state.

Entry requirements
> An Australian bachelor’s degree (or equivalent) in science or health science, including study of human anatomy and physiology with at least a credit (60 per cent) average, or qualification/experience or satisfactory substitute that the faculty considers to be equivalent, AND
> Applicants must also have passed either Year 12 level physics or equivalent bridging course*.

* Details of equivalent bridging courses in physics and human anatomy and physiology can be obtained by contacting the Department of Medical Imaging and Radiation Sciences via email: radiation.sciences@monash.edu

Additional requirements
You’ll be required to undertake additional assessment and will be invited via email to attend the University or a nominated site. You need to be available to attend the additional assessment in person at the specified location.
You must undertake a clinical visit to a radiation therapy centre and provide documentary evidence of the visit at the time of submitting your application for the program.
If you don’t provide evidence of this visit, you won’t be eligible for the Master of Radiation Therapy. Clinical centre visit dates and the clinical visit verification form can be found on the Department of Medical Imaging and Radiation Sciences website. You must refer to the information available in the special requirements outlined. It’s your responsibility to ensure you have the correct documentation.
For more information, please visit monash.edu/medicine/spahc/radiography/teaching/postgrad/master-radiation-therapy

Special course requirements
> Upon enrolment you’ll be asked to comply with the mandatory immunisation requirements in readiness for clinical/fieldwork placements.
> You’ll also have to obtain a Police Check (annual requirement) and a Working with Children Check.
> Complete a level two first aid course.

REPRODUCTIVE SCIENCES
Graduate Diploma

You’ll gain broad knowledge and receive practical training in the applications of reproductive biology in animals and humans, and explore the social and ethical issues these raise.

On completion of the course, you’ll be able to show a thorough theoretical understanding of human and animal reproductive sciences, and demonstrate practical techniques in human clinical and veterinary reproductive sciences. If you pass all units for this course and achieve an overall grade average of distinction (70 per cent) or above, you may qualify for admission into the Master of Clinical Embryology or into higher degrees by research.

Entry requirements
You’ll need to have successfully completed a bachelor’s degree in nursing or biological, medical, agricultural or veterinary sciences, or equivalent qualifications or experience in the reproductive sciences gained after completing a pass degree in another field (Bachelor of Science should include a major field of study in anatomy, biology, biochemistry, genetics, pharmacology, physiology, microbiology, immunology or zoology).
“I chose to study social work at Monash because of its reputation. Each week we had experts from various professional fields across Victoria come to lectures and share their real-life experiences, as well as some contemporary issues within the field. I completed a placement with the Cancer Council of Victoria within the prevention division, and I’ve gained experience with a number of programs such as Quit Victoria, PapScreen, SunSmart and the Obesity Policy Coalition. This has given me valuable insight into advocacy for evidence-based policy reform, educating the community about ways to reduce cancer risks, and understanding supports available to cancer patients and their families.”

CAM LIANG
Master of Social Work (2017)
SOCIAL WORK
Professional Entry Master’s

This course prepares you for a career as a professionally-qualified social worker.

It includes studies in theory, skills development and supervised professional practice, and opportunities for group-based learning, community engagement, practice research and integration of social work theory and practice. The theoretical content builds on knowledge graduates have acquired in previous higher education, while the social work skills components and professional practice introduce you to contemporary social work practice.

The course is accredited by the Australian Association of Social Workers (AASW), and includes 1000 hours of supervised professional practice.

Entry requirements
> You’ll need to have an Australian bachelor’s degree (or equivalent) with at least a credit (60 per cent) average, AND
> Completed two full-semester units in the study of society (as required by the Australian Association of Social Workers). Units fulfilling the prerequisite studies of society are broadly assessed and include sociology, social science, social psychology, human development, anthropology, philosophy, history, gender, law, politics, media, the arts, technology and multicultural society. Your past academic standing is also a significant factor in selection. Your potential selection is based on academic merit and the completion of two broad studies of society.

Special course requirements
> Upon enrolment you’ll be asked to comply with the mandatory immunisation requirements in readiness for clinical/fieldwork placements.
> You’ll also need to obtain a Police Check (annual requirement) and a Working with Children Check.

TRANSLATIONAL RESEARCH
Graduate Certificate

Bring your research from bench to bedside.

The course modules give you the basic foundations of discipline-specific laboratory research questions and how these can be applied to broader clinical applications. Your main focus is to form an appreciation that fundamental scientific questions may have multidisciplinary clinical answers.

Entry requirements
You must have completed an Australian bachelor’s degree (or equivalent) in a health science/basic science discipline; or another degree with industry experience in research and development (for example, CSIRO, CSL, the biopharmaceutical industry or in clinical trials) that the faculty considers to be equivalent or a satisfactory substitute.
PHARMACY AND PHARMACEUTICAL SCIENCES
The Master of Clinical Pharmacy is designed for pharmacists wanting to advance their skills in the provision of clinical pharmacy services to patients with complex clinical needs.

The course consolidates two previously offered degrees – the Master of Clinical Pharmacy and the Master of Pharmacy Practice – into a revised and updated Master of Clinical Pharmacy that offers greater flexibility to students, but also acknowledges a shift in the way pharmacy is practised.

Clinical pharmacy no longer takes place solely in hospitals; with the growth of patient-centred care, it’s being practised in a wide variety of health care settings, including community pharmacy.

All of the subject areas covered within the former Master of Pharmacy Practice are still available as part of the Master of Clinical Pharmacy. The course has a focus on evidence-based practice and quality use of medicines. The learning experience is student-driven and patient-focused. You can select units related to various areas of pharmacy practice, or choose a more research-focused stream in which you’ll undertake a practice-based research project.

**Entry requirements**

Depending on your prior qualifications and experience, you’ll be eligible for entry credit, which reduces the duration of the course.

“Choosing to do the intern training program at Monash was an easy decision. The individualised support and access to industry-leading staff at the University meant I knew I would get a great educational experience that supported me throughout my internship.”

MATTHEW SCOTT
Graduate Certificate in Pharmacy Practice (Internship) (2017)
This course provides the opportunity to complete an intern training program accredited by the Australian Pharmacy Council, and to credit this towards a graduate qualification.

Completion of an intern training program is a prerequisite for registration as a pharmacist in Australia. The intern training program accounts for 12 credit points of this 24-credit-point qualification. The remaining 12 credit points can be accrued via our Intern Foundation program, which helps you get the most out of your internship through workplace-based learning, or via elective units that cover topics in pharmacy practice, clinical pharmacy, economics and wound care relevant to pharmacy.

Entry requirements
An Australian undergraduate degree in pharmacy (or equivalent), or successful completion of Australian Pharmacy Council requirements if the applicant is an overseas practitioner from a country other than New Zealand.

WOUND CARE
Expert Master’s

Equip yourself with the skills to tackle complex wound care problems.

The Master of Wound Care is designed to enable health professionals to advance knowledge and skills in the provision of care for patients with complex wounds. You’ll gain specialist skills to enable the formulation, implementation and evaluation of wound care management plans. You’ll also hone your skills in leadership, professional communication, reflective practice and innovation in wound care to improve clinical practice and patient outcomes.

This flexible course allows study towards a graduate certificate, a graduate diploma or a full Master of Wound Care. For administrative purposes, all students enrol in the master’s program but can exit early with a graduate certificate or graduate diploma.

Entry requirements
An Australian undergraduate degree in pharmacy, podiatry, medicine, nursing, occupational therapy or equivalent, with at least two years’ relevant clinical experience and professional registration. Division 1 registered nurses who don’t have a degree but can demonstrate extensive relevant clinical experience will be considered for admission. Division 2 nurses are not eligible for admission.

FINANCIAL MATHEMATICS
Expert Master’s

Do you have an aptitude and passion for mathematics and statistics, a keen interest in finance and insurance, and want to work for a major financial organisation in finance, insurance or the money market?

This course gives you a deep understanding of the finance world, and the ability to speak its language. Combining theory with hands-on practical skills via an industry placement or research project, the program ensures you’ll graduate with the skills increasingly sought-after by banks and other financial institutions.

It offers advanced training in the core areas of stochastic, financial and insurance modelling, statistical analysis and computational methodology, as well as in a range of elective topics from economics, econometrics, finance, mathematics and probability.

As a graduate of this course you’ll be able to pursue specialist careers in research departments within banks, insurance and consultancy firms, or derivatives of valuation and portfolio management within investment houses.

Entry requirements
Depending upon your prior qualifications and experience you may be eligible for entry credit, which reduces the duration.

MATHEMATICS
Expert Master’s

Mathematics underpins our way of life and our prosperity. Its importance ranges from fundamental developments enabling new technologies, to theories backing up scientific research, to analyses of our physical and societal environments.

The program is designed for graduates with a bachelor’s degree and a strong foundation in mathematics. You’ll acquire advanced knowledge and skills in mathematics, and the capacity to use them to tackle complex problems in a variety of situations. The flexible coursework offering ensures that you can create a program to suit your interests, from pure mathematics that develops the core theory, to statistics and applied and computational mathematics that extend this theory to bring practical solutions to real-world problems. All these fields contribute to a far-reaching and comprehensive master’s program. The combination of coursework and project equips you with advanced knowledge and skills that make you employable in industry, or prepares you for doctoral studies.

This master’s course caters to various backgrounds, and allows for three entry points and programs (96 points over two years, 72 points over 18 months and 48 points over one year), depending on your previous studies.

Entry requirements
Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration.

The Master of Science is an advanced program for science graduates with an undergraduate degree in a related discipline. It’s designed for two distinct groups of students: the professional scientists aiming to extend their industry-related knowledge and skills for career advancement, and those considering a research degree.

In the first year of the course, you’ll complete advanced studies in a chosen field as well as a project in your chosen topic. In the second year of the course, you’ll complete further studies to deepen your knowledge in your chosen field. These studies will culminate in a capstone unit involving a research project that could be theoretical in nature or applied to an industry context.

The Master of Science is available in the following disciplines:

- Astrophysics
- Atmospheric science
- Earth science
- Physics.

Entry requirements
Depending on your prior qualifications and experience, you’ll be eligible for entry credit, which reduces the duration.

Our future hangs in the balance. Humanity is developing at a speed causing widespread environmental, economic and social challenges for sustaining life on Earth. It’s vital for us to change and adapt in all aspects of how we work and live.

If you’re future-conscious and want to transform society through sustainable solutions, this is your chance to learn the skills you’ll need. It’ll give you the training, language and tools to be a leader in a rapidly growing field. You’ll explore the trends, issues and science underlying global sustainability problems, and learn how to evaluate, analyse and collaborate across sectors to influence, motivate and effect positive, sustainable change.

Get hands-on, real-world experience through an internship, interdisciplinary or research project to help drive innovation, and be taught by global and professional experts from multiple disciplines and sectors who are leading the environment and sustainability agenda in Australia and internationally.

Combine your industry experience or previous study with a strong foundation in understanding sustainability challenges, and use it to advance sustainability solutions in your sector. You’ll have the skills to provide strategic leadership in policy formulation, governance and regulatory advice, management and capacity-building in sectors as diverse as business, government and not-for-profits.

Entry requirements

Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration.

1. Selection is based on previous academic achievement.
2. Even if you’re eligible for entry credit, you don’t need to take it. You may apply for and complete the longer duration.
3. Related fields include business, environmental science, humanities, science or social sciences.
4. For example, by relevant further studies or work experience.

Specialisations

Corporate environmental and sustainability management

This specialisation explores the complex mix of social, ecological and economic sustainability challenges faced by organisations. It equips you with the skills to implement strategies and initiatives to address these challenges.

Environment and governance

You’ll gain the skills to understand governance to enable societal and governmental change, and responsible action to support sustainability. Enriched with the knowledge of world leaders from environmental and social sciences, and through case studies, you’ll explore the dynamic processes of environmental governance and implementation.

Environmental security

You’ll gain an understanding of the scientific knowledge needed to guide the sustainable use, management and protection of the natural environment. You’ll also develop the literacy needed to interpret and translate scientific evidence about environmental security for a range of stakeholders.

International development and environment

Examine how environmental change, economic transformations and institutional practices interact to reshape social and ecological vulnerability, resilience and sustainability. You’ll develop the skills to analyse the causes of poverty, disadvantage and environmental change, and to plan and implement international development projects and programs.

Leadership for sustainable development

You’ll gain the theoretical insights, analytical skills and practical capacities to guide, influence and lead processes that result in positive social, environmental and economic outcomes. You’ll develop the literacy and core skills to analyse complex situations, identify effective intervention points, create novel solutions and collaboratively design processes of influence to enable change.

Alternative exits

> Graduate Certificate of Environment and Sustainability
> Graduate Diploma of Environment and Sustainability

Fees are per 48 credit points, which represents a standard full-time course load for a year.

COURSE CODE: S6002
“I am future-conscious and always keen to learn about sustainable solutions. The Master of Environment and Sustainability has enabled me to evaluate, analyse and collaborate across sectors to influence, motivate and effect positive, sustainable change. This forward-thinking interdisciplinary course provided me with the knowledge that’s needed to mitigate and adapt to global changes and to integrate sustainability principles from a social, economic and environmental perspective in my current role with UNESCO Bangladesh.”

KIZZY TAHNIN
Culture Program Officer, UNESCO Bangladesh
Master of Environment and Sustainability
The Master of Project Management is a forward-thinking, interdisciplinary course that integrates the knowledge needed to manage projects and programs across multiple sectors. The course is designed to provide specialist project management expertise and gives you the education, language and tools to be a leader in a rapidly growing field. Learn how to critically analyse complex problems, identify adaptive approaches and use innovative practices to deliver outcomes and manage complex projects.

You’ll have the opportunity to work on real-life projects and gain hands-on project leadership experience in a range of areas. Focus on one discipline or choose from a range of discipline-specific electives covering IT, business, engineering, law and sustainability.

As a graduate you’ll be strongly placed to provide strategic project leadership in a wide range of settings, such as business delivery, IT development and engineering solutions in corporate, government and not-for-profit sectors.

ADMISSIONS AND APPLICATIONS

Applying for graduate degrees by coursework programs.

Applications for graduate coursework programs can be made online via monash.edu/study/apply, except for the Master of Teaching.

Applicants for this course must apply through the Victorian Tertiary Admissions Centre at www.vtac.edu.au

All applicants for coursework programs must meet the minimum entry requirements and English language requirements.

For details, visit monash.edu/admissions/entry-requirements/minimum-entry-requirements monash.edu/admissions/english-language-requirements.html monash.edu/study/apply

SCHOLARSHIPS

At Monash, we’re committed to attracting academic high achievers and producing internationally competitive graduates.

Coursework scholarships

If you’re a prospective or continuing coursework graduate student, there’s a variety of scholarships and bursaries available. The number of scholarship and bursary offers made in any one year varies.

Research scholarships

The Australian Government’s Research Training Scheme covers your research course fees if you’re an Australian or New Zealand citizen or Australian permanent resident. There are various other scholarships and bursaries available to assist with other costs.
Fees

All graduate coursework programs are available as full-fee places. Some courses also offer Commonwealth Supported Places (CSP).

You’ll need to pay the full tuition cost of the course and must make the payment upfront each semester.

Fees and duration quoted are for study at Australian campuses only. Fees are quoted in Australian dollars, and are the annual average fees per 48 credit points of study in each course for 2018 unless otherwise stated. Fees are adjusted annually. Please see monash.edu/fees for updates.

FEE-HELP

The FEE-HELP scheme provides an income-contingent government loan facility for students. Australian citizens and holders of a permanent humanitarian visa are eligible for the FEE-HELP scheme. If you want to fund part or all of your tuition fees through FEE-HELP, you must complete the loan request form by the relevant census date and provide a tax file number. You can elect to pay a portion of fees directly to the University, and the remaining debt will be registered as a loan through the Australian Taxation Office (ATO). You’ll start repaying any HELP loan through the ATO once your income reaches the minimum threshold for compulsory repayment. A loan for up to the full tuition fee charged for the course can be accessed, but there’s a lifetime limit.

See the Monash University FEE-HELP website for details: monash.edu/enrolments/loans/domestic-full-fee.html

For more information, contact Monash Connect at your campus or visit the Department of Education and Training.

Commonwealth Supported Place (CSP)

For CSP, units are grouped into three broad bands. The band in which the unit is located determines your contribution amount for that unit. Usually, the units you’re required to enrol in to complete your course will each fall into the same band. The table outlines the annual student contribution amount for a full-time student who’s enrolled in a standard full-time course where all units are in the same band. In a standard full-time year, students typically study 48 credit points.

| THE 2018 STUDENT CONTRIBUTION AMOUNT (SCA) RATE |  |
|---|---|---|
| Band | Unit discipline group | Student contribution amounts for CSP |
| 3 | Law, dentistry, medicine, veterinary science, accounting, commerce, administration, economics | $10,754 |
| 2 | Computing, built environment, health, engineering, surveying, agriculture, mathematics, statistics, science | $9185 |
| 1 | Humanities, behavioural science, social studies, clinical psychology, foreign languages, visual and performing arts, education, nursing. | $6444 |

For more information, contact Monash Connect at your campus or visit the Department of Education and Training.
