Preparing our graduates for an ever-changing workforce by helping them to develop skills in ethical and social innovation, leadership and a creative and fluid mindset.
‘This degree allows students to comprehend our volatile and disruptive world. It explores the interplay between economics and politics, which generate philosophical questions such as ‘what do we owe strangers?’

‘You’ll be able to take those insights and approach problems in a holistic, creative and effective way. With this degree, you can turn your knowledge into actions that affect change.’
