How to enrol in the Bachelor of Engineering (Honours) and Bachelor of Biomedical Science
### Quick facts

<table>
<thead>
<tr>
<th>Course Title</th>
<th>Bachelor of Engineering (Honours) and Bachelor of Biomedical Science</th>
</tr>
</thead>
<tbody>
<tr>
<td>Short title</td>
<td>BE(Hons)/BBiomedSc</td>
</tr>
<tr>
<td>Course code</td>
<td>E3004</td>
</tr>
<tr>
<td>Engineering specialisations you can choose</td>
<td>Chemical, Civil, Electrical and Computer Systems, Materials or Mechanical.</td>
</tr>
</tbody>
</table>
| You’ll graduate with | Two awards:  
1. The award title for your engineering specialisation for example: Bachelor of Chemical Engineering (Honours)  
2. Bachelor of Biomedical Science |
| Credit points | 40 units x 6 credit points = 240 credit points  
41 units x 6 credit points = 246 cps if you need two foundation units |
| Duration     | 5 years full time - domestic and international students  
10 years part time - domestic students |
| Time limit   | 10 years                                                             |
Now for the course structure

**Level 1**

**Engineering Common first year**
Students commence engineering and acquire knowledge in core disciplines, design and teamwork

**Biomedical Science**
The course provides an interdisciplinary approach to the study of biomedical science, with five central themes:

- molecular and cellular biology
- body systems
- infection and immunity
- disease and society and
- diagnostic and research tools.

These themes are interwoven in units throughout the course.

<td>units</td>
<td>Levels 2, 3 and 4 units are taken in your specialisation over the remaining four years</td>
</tr>
</tbody>
</table>

| Level 3 | Builds basic theory and further design skills |

| Level 4 | Extends theory and design into more complex, professional scenarios |

| Level 4 | Provides specialised electives and an individual project |
Let’s enrol

- Your **handbook entry** and **course map** detail the units and other requirements you must meet to complete your degree
- You’ll need to enrol for both semester 1 and 2
  - Full-time study (local and international students)
    - 4 units per semester/ 8 units for the year
  - Part-time study (local students only)
    - 2 units per semester/ 4 units for the year
- What you enrol in is dependent on your academic preparation
  - I’m enrolling in Level 1 of the course
  - I have been awarded credit for part of the course
These five units are compulsory and must be completed at Level 1

- **ENG1001** Engineering design: Lighter, faster, stronger
- **ENG1002** Engineering design: Cleaner, safer smarter
- **ENG1003** Engineering mobile apps
- **ENG1060** Computing for engineers
- **ENG1005** Engineering mathematics

**Tips!**
- ✓ Split your design units (ENG1001 and ENG1002) across two semesters
- ✓ If you don’t have a background in physics, put ENG1001 in semester 2
- ✓ Keep ENG1060 and ENG1005 in the same semester
Level 1 - foundation units

Foundation units develop your understanding of the natural and physical sciences and mathematics that underpin all engineering disciplines. You may have completed these units in your final year of school or in tertiary study. If you haven’t, these units are compulsory.

**ENG1090** Foundation mathematics (equivalent to VCE Specialist Maths units 3 & 4). You don’t need to take foundation maths if you’ve completed:
- VCE Specialist Maths (score of ≥30)
- IB higher level maths (4 or above)
- A Level mathematics (B or above)
- MUFY Adv Maths 1 & 2 (≥ 65%+)
- or any higher level maths with calculus.

Maths is the language of engineering so if you’re not confident with calculus, strengthen your maths foundation by taking ENG1090. If you have taken Gao Kao Maths you should enrol in ENG1090.

**PHS1001** Foundation physics (equivalent to VCE Physics units 3 & 4). You don’t need to take foundation physics if you’ve completed:
- VCE, IB or A Level Physics (pass grade)
- MUFY Physics (≥ 65%+)
- Physics at a tertiary level (pass grade)
- AP Physics 1 and 2 (if you have only completed Physics 1 or Physics C you must take PHS1001).
Your remaining Engineering units will depend on whether you needed to take any foundation units.

| I need to take two foundation units | You have no remaining engineering units to choose  
To avoid having to take 9 units in Level 1, you can take ENG1003 Engineering mobile apps in your second year as an overload  
Now for your Biomedical Science units |
| I need to take one foundation unit | You have no remaining engineering units to choose  
Now for your Biomedical Science units |
| I don’t need to take any foundation units | You have one engineering elective unit to choose |
Examples of electives (Engineering elective list)

- CHE1010 Grand challenges in chemical engineering: Delivering sustainable food, water and energy
- CHM1011 Chemistry 1 or CHM1051 Chemistry 1 advanced
- ECE2072 Digital systems
- ENE1621 Environmental engineering
- ENG1021 Spatial communication in engineering
- ENG1051 Materials for energy and sustainability
- ENG1811 Engineering design C: Automated, integrated and connected world
- ENG2801 Leadership and innovation
- FIT2085 Introduction to computer science for engineers
- MAE2405 Aircraft performance
- MAT1830 Discrete mathematics for computer science
- MEC2404 Mechanics of fluids
- PHS1002 Physics for engineering
- RSE1010 Natural resources engineering
- TRC2001 Introduction to systems engineering

Tip!

✓ CHE1010, ENE1621, ENG1021, ENG1051, ENG1811, PHS1002, CHM1011 & RSE1010 are good choices if you’re not too sure which specialisation to choose at the end of Level 1.

* for Software engineers
These Level 2 engineering electives are offered in first year to extend capable students and provide a deeper insight into some of the specialisations:

- **CHE2161** Mechanics of fluids
- **ECE2041** Telecommunications
- **ECE2072** Digital systems
- **ENG2801** Leadership and innovation
- **FIT2085** Introduction to computer science for engineers
- **MAE2405** Aircraft performance
- **MEC2404** Mechanics of fluids
- **TRC2001** Introduction to systems engineering

**Tips!**
- You must have passed four units to be eligible to undertake these Level 2 electives so you’ll need to enrol in them in semester 2
- Don’t underestimate the difficulty and level of work involved in these units. Remember, you will be in class with Level 2 students.
These two biomed units are compulsory in Level 1:

- **BMS1011** Biomedical chemistry
- **BMS1062** Molecular biology
## Let’s enrol

### Here’s what to enrol in if you don’t need any foundation units

<table>
<thead>
<tr>
<th>Sem</th>
<th>ENG1001 Engineering design: lighter, faster, stronger</th>
<th>ENG1005 Engineering mathematics</th>
<th>ENG1060 Computing for engineers</th>
<th>BMS1011 Biomedical chemistry</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sem 1</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Sem 2</td>
<td>ENG1002 Engineering design: cleaner, safer, smarter</td>
<td>ENG1003 Engineering mobile apps</td>
<td>Engineering elective unit</td>
<td>BMS1062 Molecular biology</td>
</tr>
</tbody>
</table>

### Tip!

- You cannot swap the semesters of any of the units.

### Here’s what to enrol in if you need to take both Foundation physics and maths

<table>
<thead>
<tr>
<th>Sem</th>
<th>ENG1002 Engineering design: cleaner, safer, smarter</th>
<th>PHS1001 Foundation physics</th>
<th>ENG1090 Foundation Mathematics</th>
<th>BMS1011 Biomedical chemistry</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sem 1</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>

<td>ENG1005 Engineering mathematics</td>
<td>ENG1060 Computing for engineers</td>
<td>BMS1062 Molecular biology</td>
</tr>
</tbody>
</table>

Tip!
✓ You cannot swap the semesters of any of the units.
## What if I have credit?

**Students granted some credit or credit across multiple year levels**

- Your credit has been keyed
- The units you need to enrol in are listed on the [course map](#)
- Print off a course map and mark the units you have been granted credit for
- Enrol in eight units, starting from the lowest year level, making sure to check prerequisites have been met.

### Tip!
- Prerequisites are listed against each unit in the specialisation section of the [handbook](#) (at the bottom of the course page)

<table>

</tbody>
</table>
How to apply for credit

• **Apply for credit** for university level subjects you’ve completed
• **Search online** for current credit decisions
• You don’t need to give us your results or syllabus for Monash enhancement units (we have these already!)
• Enrol in a standard enrolment to secure your place in the course. Your enrolment can be changed when your application has been processed.

Tip!

✓ Submit your credit application as quickly as possible to give you plenty of time to change your enrolment if you have to
✓ You will only be awarded credit if you have room in your course structure.
## What next?

<table>
<thead>

<td>• Order your ID card (Get Started - Step 4)</td>
</tr>
<tr>
<td>• Select your preferred class times in Allocate+</td>
<td>• Select your preferred class times in Allocate+</td>
</tr>
<tr>
<td>• <a href="#">Attend Orientation</a> (Get Started – Step 5)</td>
<td>• <a href="#">Attend Orientation</a> (Get Started – Step 5)</td>
</tr>
<tr>
<td>Collect and register your arrival by scanning your card at <a href="#">Monash Connect</a>.</td>
<td>You need to register your arrival at Monash Connect by 28 February 2020.</td>
</tr>
</tbody>
</table>
Orientation provides critical academic and social preparation for your study in engineering. Your attendance is required. See you in February!

Tip!
✓ We’ll send you a reminder email and further orientation details in early February. Be sure to monitor your student email account.
