Day and evening
classes

February
and July

CRICOS: 079580M

COURSE CODE: B6004

Gain a thorough understanding of the banking and finance industry, even if you are new to it.

This degree is designed for people with limited previous knowledge of banking and finance or those who are wanting to enter the industry. You'll cover banking systems, money markets, financial management, financial modelling, investments, lending and risk management. And throughout your degree, it'll come together to form a practical skill set – including critical thinking and communication skills – that you can put to use straight away in the changing financial world.

Course structure

The course is structured in three parts. Part A. Advanced preparatory, Part B. Mastery knowledge and Part C. Application studies. All students complete Part B. Depending on prior qualifications, you may receive credit for Part A or Part C or a combination of both.

Part A. Advanced preparatory (24 credit points)	Part B. Mastery knowledge (48 credit points)	Part C. Application studies (24 credit points)	
Four units: – Accounting for business – Economics – Business statistics – Financial management theory	Eight units: – Case studies in banking and finance – Bank lending – Institutional asset and liability management – International banking – Financial institutions and markets – Financial modelling – Portfolio management and theory – Advanced derivatives	Four elective units: You're recommended to complete electives from the following list: – Financial statement analysis and business valuation – Introduction to financial accounting – Management accounting – Climate change and carbon management strategies – Treasury and financial markets – Credit risk modelling – Scandal: Risk, ethics and consequences in finance law	– Funds management – Mergers and acquisitions – Introduction to risk management – Risk financing and treasury management – International study program in banking and finance – Business ethics in a global environment – Corporate sustainability regulation – Data visualisation and analytics – High dimensional data analysis – Algorithms and programming foundations in Python – Quantitative methods for risk analysis

“The Master of Banking and Finance is challenging, comprehensive and provides transferable skills that can be used across the banking and finance sectors. I continue to develop and build on the skills I gained in this course – analysing market research, critical and strategic thinking, and effective communication and presenting techniques.”

KRISTA DEMIRIS
Master of Banking and Finance
