

Candidate Statement – Atulya Anil Kumar

Hello!! My name is Atulya, and I am doing my Masters of Advanced Engineering. I am running for the position of a Coursework Graduate Student Member. As an international student, I have overcome the shortcomings in adjusting to the Australian education system and can relate to the challenges faced by the Graduates.

With the ongoing pandemic, Monash is adapting itself to the ever-changing circumstances. I want to play an active role in making sure that the graduate students are getting the best out of it. Monash is trying its best, to provide us with the world-class education, even during these hard times. But there are some changes that I think could be made to the academics to enhance the graduate student's journey.

I am honoured to be the Director of Monash Engineering Students' Society, Postgrad division, where I get to work for the betterment of Postgrads. Being a part of Monash Solar Decathlon Team, IEEE and Engineers Without Borders, I interact with a lot of Graduate students and am aware of their needs.

If I were to be elected, I would make sure to voice your concerns and would strive to bring progressive changes for a better student experience.
