

BACHELOR OF NURSING (HONOURS)

Influence clinical practice through critical-thinking and decision-making skills that enable you to respond to emerging evidence and generate healthcare insights that benefit individual consumers and the wider community.

You'll engage with a range of research methodologies and apply them in an independent project within your specialist field, supported every step of the way by expert supervisors who provide personalised guidance and academic mentorship.

Through a combination of coursework and hands-on inquiry, you'll deepen your understanding of evidence-based practice, strengthen your critical thinking, refine your research and academic writing skills. You'll also build the practical capability to design, plan, and deliver a meaningful research project, equipping you with the confidence to take your career to the next level.

In the Bachelor of Nursing (Honours) you will:

- Develop critical-thinking and decision-making skills.
- Explore a range of research methodologies techniques.
- Work closely with expert supervisors who provide personalised guidance, academic mentoring, and support.
- Strengthen your understanding of evidence-based practice while developing advanced research and academic writing skills.
- Elevate your career prospects with the confidence and capability to contribute meaningfully to clinical research and practice.
