Course progression map for 2024 commencing students

This progression map provides advice on the suitable sequencing of units and guidance on how to plan unit enrolment for each semester of study. It should be used in conjunction with the requirements of the course as specified in the Handbook. Please note that the map and unit listings are subject to updates. Update version: 6 September 2023

E6014 Master of Engineering
Specialisation – Engineering management

| YEAR 1 | Semester 1 | ENG5100 Professional engineering in organisation and society | ENG5200 Engineering project risk management | Specialist core unit | Specialist core unit |
| YEAR 1 | Semester 2 | ENG5410 Research practice in engineering | Enhancement unit | Specialist core unit | Specialist core unit |

Part A. Common core units
Part B. Specialist core units
Part C. Enhancement unit

Engineering management enhancement units

- CHE5888 Sustainability and innovation
- CIV5302 Traffic engineering and management
- CIV5305 Travel demand modelling
- CIV5884 Water sensitive stormwater design
- CIV5899 Infrastructure information management
- ENG5008 Work integrated learning *
- MEC5885 Energy efficiency and sustainability
- MTE5883 Environmental durability and protection of metals and engineering materials
- MTE5884 Advanced photovoltaics and energy storage

Engineering management specialist core units

- You must complete four units (24 points). Below are suggested units to guide you in focusing in a field of engineering management. You may also choose freely from the units listed below.

Contemporary management
- MGF5020 Business ethics in a global environment
- MGF5130 Managing diversity and inclusion
- MGF5600 Managing innovation
- MGF5928 Strategic leadership

Entrepreneurship
- BEX5114 Value creation and start-up capital optimisation for founders
- BEX5120 Startup fundamentals: From setting up to securing investment
- BEX5411 Creativity and entrepreneurship
- BEX5413 Technology and innovation for start-ups

Project management
- OPM5901 Managing the project context (Semester 1)
- OPM5000 Organising the project function (Semester 1, Corequisite: OPM5901)
- OPM5903 Delivering projects (Semester 2)
- OPM5001 Project as a social system (Semester 2, Corequisite: OPM5903)

* ENG5008 is work-integrated learning that will give you valuable exposure to work-related activities. Please note that enrolment in the unit is subject to available placements. If you commenced the course in the July semester intake: If you plan to enrol in ENG5008, you may do so in place of ENG5100 in your second semester of study as an enhancement unit.

E6014 Master of Engineering
Specialisation - Civil engineering

| YEAR 1 | ENG5100 Professional engineering in organisation and society | ENG5200 Engineering project risk management | Specialist core unit | Specialist core unit |
| YEAR 1 | Semester 1 | ENG5410 Research practice in engineering | | |
| | Semester 2 | ENG5100 Professional engineering in organisation and society | ENG5200 Engineering project risk management | Specialist core unit | Specialist core unit |

- **Civil engineering enhancement units**
  - CIV5136 Structural analysis
  - CIV5177 Advanced road engineering
  - CIV5301 Advanced traffic engineering
  - CIV5314 Planning urban mobility futures
  - CIV5882 Flood hydraulics and hydrology
  - CIV5883 Surface water hydrology
  - CIV5887 Infrastructure rehabilitation and monitoring
  - CIV5888 Advanced computational methods
  - ECE5146 Multimedia technologies
  - ECE5179 Neural networks and deep learning
  - ENG5002 Engineering entrepreneurship
  - ENG5008 Work integrated learning *
  - MEC5882 Instrumentation, sensing and monitoring
  - MEC5888 Renewable energy systems
  - MGF5020 Business ethics in a global environment
  - MGF5600 Managing innovation
  - MTE5197 Engineering with nanomaterials
  - MTE5883 Environmental durability and protection of metals and engineering materials

- **Civil engineering specialist core units**
  - You must complete four units (24 points). Below are suggested units to guide you in focusing in a field of civil engineering suited to your previous study. You may also choose freely from the civil units listed below.
  - **Structural engineering**
    - CIV5885 Infrastructure dynamics
    - CIV5887 Infrastructure rehabilitation and monitoring or CIV5136 Structural analysis
    - CIV5888 Advanced computational methods
  - **Geotechnical engineering**
    - CIV5886 Infrastructure geomechanics
    - CIV5887 Infrastructure rehabilitation and monitoring or CIV5148 Ground hazards engineering
    - CIV5888 Advanced computational methods
    - CIV5899 Infrastructure information management
  - **Transport engineering**
    - CIV5302 Traffic engineering and management
    - CIV5305 Travel demand modelling
    - CIV5314 Planning urban mobility futures
    - CIV5899 Infrastructure information management
  - **Water engineering**
    - CIV5882 Flood hydraulics and hydrology
    - CIV5883 Surface water hydrology
    - CIV5884 Water sensitive stormwater design
    - CIV5899 Infrastructure information management

* ENG5008 is work-integrated learning that will give you valuable exposure to work-related activities. Please note that enrolment in the unit is subject to available placements. If you commenced the course in the July semester intake: If you plan to enrol in ENG5008, you may do so in place of ENG5100 in your second semester of study as an enhancement unit.
