Beyond 50

Health & social outcomes in
Frankston and the Mornington Peninsula

We are delighted to announce that we have now met our recruitment target for the Beyond 50 study, with over 1000 people now involved in the study!

A message from the Principal Investigator

"Thank you for your involvement in the study so far, it's great to have such a positive response from the community! We look forward to the study results being able to inform community needs and health service provision into the future."

Prof Suzanne Nielsen

What's next?

We are in the process of finalising the second round of surveys. If you joined the study in September 2023, you will start receiving your survey links soon, so keep an eye on your inboxes.

Everyone will receive their follow up survey links 12 months after completing your first survey. If you can't remember when your first survey was completed and would like to make a record of it, please email beyond50@monash.edu or send an enquiry through the website, www.beyond50.study. If your contact details have changed, or you will be unavailable for a period of time, please feel free to let us know how to best stay in touch with you over the coming year using the website or email above too.

What have we found?

Now that we have completed recruitment, we will start analysing data. Findings will be available to you via the [www.beyond50 study website](http://www.beyond50.study), or send us an email and we can send you the results as well. We will update you on new publications in future newsletters. For now, the Beyond 50 research team are all working very hard behind the scenes!

First year in review

It has been one year since the Beyond 50 study started recruitment. Here's what's happened in that time:

Meet the newest member of the team

Fred joined us from South Australia as a research officer in March earlier this year, after completing his studies in Advanced Health and Medical Science.

Many of you would have spoken to Fred after completing your initial survey and he will be one of your main contacts for any enquiries and follow ups for the duration of the study.

Have your say

As a part of the Beyond 50 Study, you will have access to study findings and publications. What information would you like to receive? Please send your comments and feedback to us at beyond50@monash.edu
