Environmental  
Sampling Services

# OUR CAPABILITIES

We offer expertise in water quality sampling from environmental, potable, stormwater and wastewater sources. We are adept in soil and animal faecal collection for research. We can provide quick turn around times and fulfil short or long term sampling requirements. Our staff are trained in using correct techniques and can implement the latest technology to assist your sampling needs.

*“Water is the mirror of nature”* - Francis of Assisi

Water mirrors the well-being of its surrounding environment. When the ecosystem thrives, the water that flows through it flourishes as well.

## SAMPLING SERVICES

### DATA COLLECTION

Our water quality sampling services are the first critical step in data collection. Our staff have the knowledge and expertise when collecting samples for analysis.

### DESIGN

We can help you design and carry out your environmental sampling protocols. We have the equipment and the know how for short or long term sample collection.

### TRAINING

We are able to train your staff to undertake water sampling on their own. We run full day workshops which includes risk management, safety in the field, useful equipment, sample collection techniques and sample preservation.
