1. **Manual/Automatic Key**  
The key turns the system between automatic and manual.

2. **All Alert Button**  
When in manual, the All Alert button sounds the alert tone, which is the “beep beep” siren. Pressing the All Alert button again cancels the siren.

3. **All Evacuate Button**  
When in manual, the All Evacuate button sounds the evacuate tone, which is the “whoop whoop” siren. Pressing the All Evacuate button again cancels the siren.

4. **PA System Button**  
When in manual, the All PA button activates the PA system.

5. **PA Microphone**  
Use the PA microphone to make announcements to the building.

6. **Call Warden Button**  
Press this button to call a specific floor warden.

7. **Call Security Button**  
This button allows you to call security using the red phone.

8. **Red Phone**  
The red phone is used to communicate with floor wardens or security.

9. **Warden Present Light**  
When wardens flick their toggle into the on position, these lights will come on.

10. **Zone Manned Button**  
Activate this button to indicate that the floor warden is clearing their area.

11. **Zone Cleared Button**  
Activate this button to indicate that the floor warden has cleared the area.
