### Part 3 - Declaration

1. I understand that Hepatitis B immunisation will, in most cases, result in immunity to the Hepatitis B virus. I understand that the risk of adverse reactions is very low. Soreness at the injection site, more rarely aches and fever and very rarely hypersensitivity may occur.
2. I understand that the effects of the vaccine on pregnancy are unknown and therefore becoming pregnant during the course of injections is inadvisable.
3. I understand that if I have had previous Hepatitis B immunisation, a blood test may be required to determine antibody status.
4. I understand that Part 4 of this form will be completed by the clinic which performs the immunisation. Once the course of injections and the blood tests have been completed, this form will be automatically forwarded by the immunising clinic to OHS.
5. I understand that my Manager/Supervisor may be notified regarding my immunisation status.
6. I believe the answers to the above are correct and I give my consent to be immunised with Hepatitis B and to have a blood sample taken for antibody assay one month after the last injection.

**Signed**
