A ten module online course on education research in health professions and sciences. This course will help you to plan and conduct your own education research projects.

This course is designed to introduce participants to health education research methods. Through a mixture of webinars, online activities and discussions, and self-directed learning participants will develop foundational knowledge and skills to support their education research. The course covers the full research process including: identifying a topic of inquiry, formulating research questions, selecting and implementing appropriate methodologies and methods, and disseminating findings. The role of theory in designing and implementing education research, along with maintaining ethical standards and rigour in the research process will also be covered.

We have two online courses commencing in 2020:
1. 4 May – 10 July 2020
2. 3 August – 9 October 2020

A$1500

Optional mentoring fees available on request.

Testimonials from recent learners include:

Highly recommend the online course for anyone pursuing research in HPE.

Prof Alan Batt, Paramedic, Fanshawe College, Canada

Excellent course, vigorous discussions enhanced learning value.

Assoc. Prof Paul Fullerton, Paediatrician, Monash University, Malaysia
