

MONASH BIOMEDICAL IMAGING 2019 SEMINAR SERIES

DATE: THURSDAY, 12 DECEMBER 2019

TIME: 12:30 – 1:30PM. A LIGHT LUNCH WILL BE PROVIDED.

VENUE: MBI AUDITORIUM, 770 BLACKBURN ROAD, CLAYTON

2019: The year in retrospect and looking ahead to 2020

Monash Biomedical Imaging (MBI) has continued to grow in terms of scientific output and contributions to biomedical imaging technology advancement.

In this presentation, Professor Gary Egan, Director of MBI, will present an overview of the achievements at MBI during 2019, and outline the exciting opportunities for biomedical imaging research programs and partnerships at MBI in 2020. His presentation will include an overview of:

- MBI operational and research achievements during 2019
- biomedical imaging technology developments and research outcomes during 2019
- update on the linked laboratories and research teams at MBI
- progress on VBIC and NIF funding for the development of a cyclotron and precision radiopharmaceutical facility at Clayton
- emerging research opportunities at the MonashHeart Hospital in cardiovascular disease and cardiac devices.

Professor Gary Egan is Director of Monash Biomedical Imaging, Director of the ARC Centre of Excellence for Integrative Brain Function and a Distinguished Professor at the Turner Institute for Brain and Mental Health, Monash University. He is also lead investigator of the Victorian Biomedical Imaging Capability, Deputy Director of the Australian National Imaging Facility and Co-Director of the Australian Brain Alliance.

His substantive body of published work has made a significant impact on the neuroimaging and neuroscience fields. He has sustained success in obtaining significant grants to support his own research and the development of facilities to advance biomedical imaging.
