# Food & Nutrition Network Symposium

Food and Dairy Graduate Research Industry Partnerships (GRIP)

21 July 2021, 2.00-3.30pm

[Register here:](#)

## Program:

### **The Future Food Systems Cooperative Research Centre (CRC)**

Prof Cordelia Selomulya will outline some of the current research activities of the CRC and future opportunities for collaboration. The Centre aims to deliver industry-driven research outcomes in high-tech indoor cropping and value-added food products and to help plan food industry clusters across Australia.

### **From student brewing team to commercial start up**

The founders of this start up discuss key aspects of their development into a Monash-affiliated company and provide an overview of their current and future projects in beer production, analysis, and education.

### **Innovations seeking advantages in technological, health and sensory properties of food**

Prof Louise Bennett will speak on her research investigating biochemical and health-functional properties, process and product development of food.

### **Bridging academia and industry gaps to take bigger risks and create greater impact**

Dr Yoni Sharon, Industry Portfolio Manager

### **Industry pathway for nutritional research**

Associate Professor Ricardo Da Costa will present the research pathway used by the team, in collaboration with industry, to support development and assess efficacy - performance and clinical significance of sports nutrition products in diverse athlete populations.
