

Overview

In Moodle we currently use a tool called FontAwesome to insert code that shows up as an icon. To use one of below icons, simply copy-paste the content with brackets into your Moodle text container. E.g. copy-paste [fa-university] to use an icon to denote an official element.

When incorporating an icon into your content, adhere to the suggested meanings listed above. If you wish to convey multiple meanings with the same icon, consider using a variant for the additional interpretation if possible.

Emojis and clipart

For learning and teaching purposes, and to prevent potential misinterpretation, please use icons judiciously, as an excessive amount can be overwhelming. We advise against using emojis or clipart. However, this exclusion applies when communicating with students through informal methods, such as forum responses.
