- Electronic annual outcome data collection:
All surgeon's rooms will receive posters by email and post soon. If not received, contact us.

Introducing BSR Data Services Manager Sherin Pallickal Renchi

Sherin is the new Data Services Manager at the Bariatric Surgery Registry. She holds a Master's degree in Data Science and brings over three years of experience as a software developer, specialising in data integration for major insurance clients such as ANZ, Ansvr, and AJG. Her work has focused on resolving system and application issues, integrating complex platforms, and ensuring smooth data flow across systems. She has a strong interest in how effective database management can enhance data quality, accessibility, and long-term value, and she is looking forward to further developing this expertise in her role at the Registry. Outside of work, Sherin enjoys music, cooking, dancing, and exploring new opportunities for personal and professional growth.

The Leading and Valued Contributors are the driving force behind the Bariatric Surgery Registry. They actively advocate for the Registry across their states, hospitals, and teams, setting a strong example for surgical trainees and reinforcing the importance of participation post-accreditation. On behalf of the Steering Committee, Registry Management, and all stakeholders, we extend our sincere thanks for their unwavering commitment to this vital clinical quality initiative.
