

GRADUATE CERTIFICATE OF PRESCRIBING FOR MIDWIVES

Elevate your midwifery practice, strengthen your autonomy and lead meaningful change in maternity care.

Our new Graduate Certificate of Prescribing for Midwives is officially accredited by the Nursing and Midwifery Board of Australia, a powerful step forward for midwives who want the confidence, capability, and endorsement to prescribe scheduled medicines. This is a program built for real life: flexible, supportive, and designed to fit around the demands of midwifery work and the demands of your life.

WHY STUDY THIS COURSE?

- Commonwealth Supported Places (CSP) funding*
- Scheduled classes you can join on campus or online, with every session recorded so you never miss a thing
- The option to study fully online, from anywhere, at any time
- Supported self-directed learning that gives you control without leaving you on your own
- Active learning experiences that push your critical thinking and help you apply knowledge with confidence
- Interdisciplinary learning opportunities that broaden your perspective and strengthen your practice

WHAT YOU'LL STUDY

You'll build a strong, practical foundation in how to understand, interpret, and apply diagnostic and screening processes across pregnancy, labour, birth, and the postnatal period. Every part of the curriculum is aligned with national prescribing standards and professional frameworks, ensuring you graduate ready to make safe, evidence-based, woman-centred clinical decisions. This is about elevating your practice, expanding your scope, and giving you the skills to step into prescribing with clarity and confidence.
