

IT EDUCATION REIMAGINED

BACHELOR OF AI

3 years
(full-time)

Two streams:

Applied AI:

Use existing AI tools to build systems.

AI Algorithms and Models:

Evolve AI itself and drive the next wave of innovation.

BACHELOR OF AI ADVANCED (HONOURS)

4 years
(full-time)

Specialises in **AI Algorithms and Models** + honours year researching an AI area or related computational research.

BACHELOR OF CYBERSECURITY

3 years
(full-time)

Teaches students how to secure our digital world by covering expertise in areas such as digital forensics, cloud security and AI security.

BACHELOR OF CYBERAI (INDUSTRY CO-LAB)

3 years
(full-time)

Covers the foundations in programming, systems, cybersecurity and AI then students learn in industry throughout second and third year.

BACHELOR OF AGENTIC SOFTWARE ENGINEERING

3 years
(full-time)

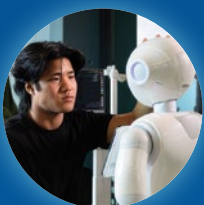

Focuses on the design, development and evaluation of software systems that incorporate AI, agentic workflows and human-AI collaboration.

BACHELOR OF AGENTIC SOFTWARE ENGINEERING (HONOURS)

4 years
(full-time)

Combines all the learning outcomes of the 3-year degree + a honours research project on a related topic.

NEW COURSES, NEW PROGRAMS
AND A BETTER WAY OF LEARNING

A LEARNING EXPERIENCE BUILT FOR YOU...

GUARANTEED EXPERIENCE

Industry experience is built into our degrees as professional practice units with companies, placement opportunities and other credit points of work-integrated learning.

MORE TAILORED ASSESSMENTS*

Prove your mastery of specified learning outcomes through tasks that will accumulate into a portfolio. At a High Distinction level, you can choose what you build to showcase your skills.

*Only in select units

HUMAN-CENTRED, AI-ENABLED EDUCATION

We embed AI across learning, teaching and assessment, equipping students to use it critically, creatively and ethically the way modern workplaces are.

This UNESCO Award-nominated model has already supported more than 200,000 students across Australia, Malaysia, India and Indonesia.
