Allergies and Anaphylaxis - the facts and your questions answered

Professor Robyn O'Hehir
Central Clinical School (CCS) and Alfred Health

Allergic diseases are among the most common of chronic disorders, affecting nearly one third of adults in developed countries, and the problem is increasing.

Professor **Robyn O'Hehir** is Head of the Department of Allergy, Immunology and Respiratory Medicine (AIRMed) in the CCS and Alfred Health, and an internationally renowned expert in the field. She will present on a potpourri of common allergic diseases including asthma, hayfever, food allergy and venom allergy. She will describe the exciting research leading to

prospective new treatments which is being conducted here and internationally. Join Professor O'Hehir for drinks and nibbles afterwards.

MC for the evening is **Tony Charlton**, a long time Olympics sports commentator and philanthropist who is a Life Governor of the Alfred Hospital and Board Member of the Alfred Foundation.
