SETU Purpose Statement

SETU is primarily a survey of student satisfaction with their units and teaching staff and also acts as an initial, broad indicator of teaching quality – directing subsequent investigation (using the University's 'traffic light' system) and providing valuable information to inform unit enhancement and the student learning journey.

The data may be used by Faculty and other University staff within contexts such as (but not limited to) unit enhancement, strategic planning, course and unit review and staff development. In particular, it should be used by faculties as a basis for annual reports of improvements made to their units in response to student feedback and by Learning and Teaching support areas to identify priorities for targeted strategies to support teaching staff.

A secondary purpose of SETU is to provide data that may be used by academic staff for the purposes of research.

Completion of this survey implies consent for your de-identified responses to be used in accordance with the statement of purpose.
