

GROWING OLD
IS OPTIONAL!!

STAREE Clinical Trial

*Prof Sophia Zoungas, Dr Ingrid Hopper,
Dr Andrea Curtis*

STAREE is a clinical research trial investigating whether statins can prolong good health and maintain independence amongst older people.

A placement with STAREE offers the opportunity to contribute to this exciting, ground breaking study and join our team of clinicians, study managers, field officers, data officers, post doctoral researchers and PhD students.

You will take part in a variety of research tasks such as observing participant visits, conducting study phone calls with participants, collecting information on clinical endpoints and adverse events, data entry, data analysis and interpretation.

To join STAREE on your SIP placement email andrea.curtis@monash.edu
