OFFICE BATTERY RECYCLING

Accepted

Small chargeable and non-rechargeable batteries generally found in remote controls, power tools, laptops or mobile phones

eg. Alkaline, zinc carbon, lithium ion (AAA, AA, C, D, 9v)

Nickel hydride/cadmium batteries should be sent separately

For disposal send via internal mail to Buildings and Property Division at Clayton Campus

Note your address for bucket to be returned

Not Accepted

Contact your faculty chemical store or the university hazardous waste contractor directly to arrange disposal of

- lead acid batteries used in vehicles
- back up power supply for computers or medical equipment
- large quantities of batteries
