

GRADUATE CERTIFICATE OF ROAD SAFETY

WHAT THE COURSE IS ABOUT

There is a death on Australian roads every day. More than ever, we need passionate and innovative road safety leaders to create real change on our roads. The impact that road fatalities and serious injuries has on families and communities can last a lifetime – we need to make change to create injury free communities and we need the critical thinkers that can make this a reality.

The new Graduate Certificate of Road Safety at Monash University is designed to help motivated professionals develop the knowledge, networks, leadership, as well as the innovative and critical thinking needed to make positive change and tangible results to improve our safety. The course will expose students to the world-leading road safety and injury prevention researchers that Monash has to offer, combined with the convenience of online, flexible study.

Students will leave with knowledge of tools and frameworks to implement practical and innovative responses to road safety challenges. Network with like-minded, aspiring practitioners and learn not only world-leading practices but also how you can overcome challenges within your organisation.

6 WEEK PERIOD COURSE STRUCTURE WITH 4 INTENSIVE UNITS

1

Road safety fundamentals

2

Using data for evidence-based decision-making in road safety

3

Applying behavioural science to road safety

4

Communicating for influence in road safety

You will develop a greater understanding of the Safe System approach and how it is applied to road safety policy, locally and internationally. Develop your understanding of the complexities in road safety and solutions to make change, as well as using data to inform your evaluation of road safety problems, and how to become a leader and agent of change within your work setting to rally stakeholders.

DID YOU KNOW?

You will sit alongside road safety professionals from agencies around Australia, and senior faculty members of the Monash University Accident Research Centre. Through ongoing relationships with course mentors and fellow participants, you will join an informed network with a shared vision towards a Safe System approach and improved road safety results.

CERTIFICATE OF
ROAD SAFETY FROM
MONASH UNIVERSITY.**

WHAT WE OFFER

- ✓ The knowledge, tools and frameworks to implement innovative responses to road safety challenges.
- ✓ Evidence-based approaches to road safety.
- ✓ Create a network of like-minded, aspirational leaders.
- ✓ Access to the expansive knowledge and real-world experience of an internationally-renowned teaching team.
- ✓ A formal qualification in a convenient format, designed to suit a busy lifestyle.

WHAT ARE THE BENEFITS

- With the knowledge and skills gained through this course, graduates will be able to implement real-world solutions for road safety challenges.
- Graduates will be equipped with the knowledge, tools and frameworks to develop innovative responses to road safety challenges.
- The course provides a holistic approach to road safety, with four units encompassing Safe System, behavioural science, data, and communication.
- MUARC has developed its academic expertise for more than three decades and earned a reputation for being one of the most respected injury prevention institutes of its kind in the world, and the course is a unique opportunity to access this expertise and knowledge.
- Students will be connected with other working professionals in their field, and develop relationships outside of their own organisation through the team-based work.
- Studies will conveniently fit in with varied work commitments, and will be offered online, with completion in one year.

WHO SHOULD ATTEND THIS COURSE

- Road safety practitioners, or those embarking on a career in transport-related fields, from a wide range of government and non-government organisations such as road safety agencies, local councils, and traffic management companies.
- Those who are passionate about making changes that can produce tangible, real-world results in eliminating road fatalities and serious injury.
- Those eager to broaden their knowledge of road safety interventions through a greater understanding of the Safe System approach and applying this within the context of current national and international road safety policies.
- Team players wanting to work collaboratively with other students to design, test and evaluate ways in which we can improve the safe mobility of all road users.
- Critical thinkers who are interested in using a data-driven approach to monitoring and evaluating road safety problems.
- Aspirational leaders and agents of change, with a deep desire to develop themselves with the attributes needed to influence stakeholders across large, complex organisations.
