Geography studies the complex relationships between physical environments and human societies. We grapple with some of the most complex global challenges that face society today including climate change, food and water security, deepening poverty, uneven global development, rising socio-economic inequality, rapid urbanisation, international migration, declining natural resources, and environmental degradation and rehabilitation.

You can study Geography in both the Bachelor of Arts through the Human Geography major and the Bachelor of Science through the Geographical Science major.
UNITS

Units which you may take in Geography in either the Bachelor of Arts or the Bachelor of Science include:

- Catchment hydrology
- Cities and sustainability
- Earth, atmosphere and environment
- Environmental assessment and decision-making
- Environmental earth science
- Environmental policy and management
- Environmental problem solving and visualisation
- Extreme earth! Natural hazards and human vulnerability
- Field studies in sustainable development
- Future climates: projections, impacts and adaptation
- Geographical information systems and remote sensing
- Introduction to climate
- Oceans and coasts
- Power and poverty: international development in a globalised world
- Resource evaluation and management
- Soils and land management
- The Geography of Global Challenges

COURSE OVERVIEW

You will develop skills in critical thinking, grounded experience and field-based learning to develop applied research capabilities necessary for professional careers in weather and climate prediction, urban and regional development, emergency services, risk management, science communication and education, community and international development, and environmental science, policy and management.

OVERSEA OPPORTUNITIES AND FIELD SCHOOLS

You will have the opportunity to visit the red plains of Broken Hill, the hills of Tuscany in Italy, the spectacular mountains of New Zealand, the hustle and bustle of Mumbai in India, or you might even get the chance to travel to Antarctica in your studies. With campuses in Italy, Malaysia, India, China and Indonesia, you will have the opportunity to explore the world while studying for your degree.
