

# SPAHC EXCELLENCE AND INNOVATION IN EDUCATION SYMPOSIUM

## Education Excellence: Building Thriving Communities

*'Universities have a role to play in understanding and providing ideas and solutions to shape and respond to the challenges they, their partners and communities experience' (Monash Impact 2030).*

The 2023 symposium celebrates how as a School we are engaging and collaborating to build thriving communities, through innovative and responsive curricula. Robyn Newitt (Lecturer Social Work and SPAHC) will discuss how we can prepare our students to deliver culturally safe health care and Professor Wayne Hodgson will provide an overview of the new Sub-Faculty of Health Sciences. We will hear about how our educators are contributing to building thriving learning communities and about the impact of our courses on communities outside Monash.

### Wednesday 12<sup>th</sup> July The Seahorse, Building U, Peninsula Campus
