

2024 MIPS Seminar Program

 08 May 2024  12:00 pm to 1:00 pm  LT3

HOW DOES THE CENTRAL NERVOUS SYSTEM CONTRIBUTE TO MULTIPLE SCLEROSIS PATHOPHYSIOLOGY?

Professor Kaylene Young, University of Tasmania

Prof. Kaylene Young is a Multiple Sclerosis Australia Senior Research Fellow; Theme Leader for Brain Health and Disease Research at the Menzies Institute for Medical Research, and Head of Preclinical Research for the University of Tasmania's MS Research Flagship. Kaylene's research program spans basic neuroscience, preclinical in vivo and in vitro studies of demyelinating disease, and clinical MS research, with the goal of improving the lives of people with MS.
