

SUPERVISION MASTERCLASS

Supervision of neuropsychology trainees: Incorporating reflective practice

This masterclass is approved by the Psychology Board of Australia for maintaining board-approved supervisor status.

While many supervisor competencies will be common across specialities of psychology there is a recognition that areas of speciality such as neuropsychology require specific training for supervisors to support the greater focus on assessment, report writing, differential diagnosis, assessment feedback and brief interventions. This workshop aims to provide specialist knowledge and skills to supervisors of neuropsychology trainees and will focus on a range of supervisor competencies with relevance to the neuropsychology setting. The workshop will have an emphasis on reflective practice and how this can benefit your supervisory approach. There will be regular opportunities for group discussion and practical tasks. Focus is given to the supervision of neuropsychologist trainees, however, the training may also be relevant to the supervision of qualified neuropsychologists or psychologists in other disciplines that have an emphasis on assessment.

PROGRAM DETAILS:

Date: 12 September 2024
Time: 9am - 4pm
Location: Seminar room 1, Building 88, Holman Hall, 27 Sports Walk, Clayton Campus

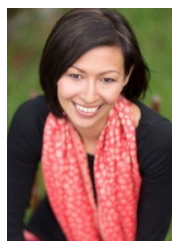

PRESENTERS:

■ Dr Adam McKay

Dr Adam McKay is a Senior Lecturer at Monash University and Head of Psychology at Epworth HealthCare. He is a Board approved supervisor and has been supervising trainees and employees for 15 years in neuropsychological assessment and intervention. He is passionate about supporting both supervisors and students to ensure clinical training is effective, supportive and rewarding.

■ Linda Williamson

Linda Williamson is a Senior Lecturer and Clinical Neuropsychologist at Monash University. She is a Board-approved supervisor and leads the Adult Neuropsychology Clinic at the Turner Clinics, where postgraduate students provide neuropsychological assessments to the community. She is also the placement coordinator for the Monash neuropsychology program and supervises neuropsychologists in the application of Acceptance and Commitment Therapy across diverse clinical settings.

COST

Cost is \$350 for the workshop.

REGISTRATION

To register for the program, please click on the following [link](#).

Register early as places are strictly limited! Preference will be given to Monash University placement supervisors who require completion of a masterclass to renew their supervisor approval with PBA.
