

# DO YOU HAVE MAJOR DEPRESSIVE DISORDER (MDD)?

Now recruiting for the EMBRACE trial

The EMBRACE trial is exploring an investigational drug, in combination with psychological support, to find out how effective it is at reducing symptoms of MDD

## WHO CAN TAKE PART?

We are enrolling people **located in Victoria** aged 18 to 85 who:

Have been diagnosed with MDD and don't feel their current medication is treating their depression well enough

Have been taking a single antidepressant drug at a consistent dose for at least 4 weeks

Do not have any psychotic disorder, such as schizophrenia or bipolar disorder

There are **other requirements** to join this study
