SHARED AMBITIONS. GLOBAL CONNECTIONS. BIG OUTCOMES.
Over five decades Monash University has emerged as the largest university in Australia and among the highest ranked universities in the world.

Today, Monash is a critical part of the Victorian economy, generating almost $4 billion in economic activity every year, driving growth in jobs and export income and fostering innovation. The University now stands as a compelling testament of the wider Victorian story: enterprising, open, international and committed to the highest standards of excellence.

That success has not come about by chance, but our future success is by no means guaranteed.

In recent years Monash has set out on an unprecedented era of activity. Combined, these advances will enhance the scale and impact of our engagement with our local and global community even further.

We look forward to working with you to ensure that vision unfolds.

Professor Margaret Gardner AO
President and Vice-Chancellor
Monash directly accounts for $3.9 billion worth of economic activity annually for Victoria.

Our operating revenue is more than $2 billion and our total assets are valued at $3.75 billion.

Monash generates $5.10 for every dollar of government funding.

Our direct contribution to Gross State Product is $1.1 billion:
> 29 times greater than the Formula One Grand Prix
> 16 times the economic contribution of the Australian Open Tennis tournament.

If Monash were an ASX-listed company, it would rank in the top 100.
International education generates $5.6 billion to Victoria every year.

Monash contributes 25% of this amount – $1.5 billion annually.

More than 16,000 international students came to our Australian campuses in 2015.

They do not come to Monash by chance.

Students come to Monash despite fierce competition from other universities in Australia and beyond.

Over decades Monash has built an international reputation for its excellence in research and education.
We directly employ almost **14,000 staff.**

Last year we procured **$638 million** in external works, from food trucks to construction firms.

The **$333 million** we invested in capital expenditure created **2,800 jobs.**

And more than **$1 billion** in capital expenditure is planned for the next five years, **97%** of which is self-funded.

Combined, these make Monash **one of the biggest drivers of new jobs** outside Melbourne’s CBD.

Monash is one of Victoria’s biggest employers.
A global university is defined by more than its international students.

Monash has the highest international competitive research income of any Australian university, totalling nearly $35 million last year.

Our presence spans four continents, with locations in China, India, Italy, Malaysia, South Africa and the United Kingdom.

And the Monash Warwick Alliance is a world-first in collaboration, securing nearly $30 million in revenue since 2012.
The Monash University Museum of Art (MUMA) in Caulfield attracts 25,000 visitors every year.

Monash campuses host events and open venues for community groups, sports clubs and schools all year round. Our Clayton campus draws more than 600,000 visitors each year.

With the completion of the $56 million Cultural precinct upgrade, visitors will grow to more than 1 million.

GROWING COMMUNITIES
The great challenges of our age are social and environmental ones. Monash is committed to solving them — not only in our research, but in the shape of our campuses.

All new buildings at Monash are designed to the highest environmental standards.

We spent more than $22 million on sustainability projects in the last five years alone.

And increased our solar energy generation by 877%.

Monash produced enough solar power in 2015 to light the MCG for 1.8 years.
