Woodside Monash Energy Partnership

Monash Energy Conference
Rachelle Doyle
19 September 2019
Disclaimer and important notice

This presentation contains forward looking statements that are subject to risk factors associated with oil and gas businesses. It is believed that the expectations reflected in these statements are reasonable but they may be affected by a variety of variables and changes in underlying assumptions which could cause actual results or trends to differ materially, including but not limited to: price fluctuations, actual demand, currency fluctuations, drilling and production results, reserve estimates, loss of market, industry competition, environmental risks, physical risks, legislative, fiscal and regulatory developments, economic and financial market conditions in various countries and regions, political risks, project delay or advancement, approvals and cost estimates.

All references to dollars, cents or $ in this presentation are to US currency, unless otherwise stated.

References to “Woodside” may be references to Woodside Petroleum Ltd. or its applicable subsidiaries.
Our global business
About Woodside

Our facilities are among the world’s best, renowned for their safety, reliability and efficiency
The world needs more energy delivered in cleaner ways

By 2030, Woodside expects to see hydrogen production at-scale around the world.

As the largest Australian natural gas producer, Woodside is looking at hydrogen as a complementary business to its existing portfolio.

Woodside is excited about delivering a lower-carbon energy future.
