Course progression map for 2021 commencing students

This progression map provides advice on the suitable sequencing of units and guidance on how to plan unit enrolment for each semester of study. It should be used in conjunction with the requirements of the course as specified in the Handbook. The map is subject to updates. Update version: 13 October 2022

**E6014 Master of Engineering**

**Specialisation - Biological engineering**

<table>
<thead>
<tr>
<th>YEAR 1</th>
<th>Semester 1</th>
<th>ENG5100 Professional engineering in organisation and society</th>
<th>ENG5001 Advanced engineering data analysis</th>
<th>CHE5886 Advanced biopolymers</th>
<th>CHE5321 Advanced bioprocess technology</th>
</tr>
</thead>
<tbody>

<td>CHE5322 Advanced biochemical engineering</td>
</tr>
</tbody>
</table>

- Part A. Common core units
- Part B. Specialist core units
- Part C. Enhancement units

**Biological engineering enhancement units**

- CHE5883 Nanostructured membranes for separation and energy production
- CHE5889 Food engineering and processing
- ENG5008 Work integrated learning *

* ENG5008 is work-integrated learning that will give you valuable exposure to work-related activities. Please note that enrolment in the unit is subject to available placements. **If you commenced the course in the July semester intake:** If you plan to enrol in ENG5008, you may do so in place of ENG5100 in your second semester of study as an enhancement unit.

Part A. Common core units
- ENG5008 Work integrated learning *
- ENG5100 Professional engineering in organisation and society
- ENG5001 Advanced engineering data analysis
- MEC5882 Instrumentation, sensing and monitoring
- MEC5888 Renewable energy systems
- MEC5107 Engineering with nanomaterials
- MTE5883 Environmental durability and protection of metals and engineering materials
- ECE5146 Multimedia technologies
- ECE5179 Neural networks and deep learning
- ENG5009 Work integrated learning *
- ENG5002 Engineering entrepreneurship

Part B. Specialist core units
- CIV5135 Advanced structural design
- CIV5177 Road engineering
- CIV5301 Advanced traffic engineering
- CIV5314 Planning urban mobility futures
- CIV5882 Flood hydraulics and hydrology
- CIV5883 Surface water hydrology
- CIV5887 Infrastructure rehabilitation and monitoring
- CIV5888 Advanced computational methods
- CIV5889 Infrastructure information management
- ECE5146 Multimedia technologies
- ECE5179 Neural networks and deep learning
- ENG5008 Work integrated learning *
- ENG5002 Engineering entrepreneurship
- MEC5882 Instrumentation, sensing and monitoring
- MEC5888 Renewable energy systems
- MTE5197 Engineering with nanomaterials
- MTE5883 Environmental durability and protection of metals and engineering materials

Part C. Enhancement units

Civil engineering enhancement units
- ENG5008 Work integrated learning *
- ENG5002 Engineering entrepreneurship
- MEC5882 Instrumentation, sensing and monitoring
- MEC5888 Renewable energy systems
- MTE5197 Engineering with nanomaterials
- MTE5883 Environmental durability and protection of metals and engineering materials

Civil engineering specialist core units
- CIV5135 Advanced structural design
- CIV5177 Road engineering
- CIV5301 Advanced traffic engineering
- CIV5314 Planning urban mobility futures
- CIV5882 Flood hydraulics and hydrology
- CIV5883 Surface water hydrology
- CIV5887 Infrastructure rehabilitation and monitoring
- CIV5888 Advanced computational methods
- CIV5889 Infrastructure information management
- ENG5008 Work integrated learning *
- ENG5100 Professional engineering in organisation and society
- ENG5001 Advanced engineering data analysis
- MEC5882 Instrumentation, sensing and monitoring
- MEC5888 Renewable energy systems
- MTE5197 Engineering with nanomaterials
- MTE5883 Environmental durability and protection of metals and engineering materials

 Below are suggested units to guide you in focusing in a field of civil engineering suited to your previous study. You may also choose freely from the civil units listed below.

Structural engineering
- CIV5885 Infrastructure dynamics
- CIV5887 Infrastructure rehabilitation and monitoring
- CIV5888 Advanced computational methods
- CIV5889 Infrastructure information management

Geotechnical engineering
- CIV5885 Infrastructure geomechanics
- CIV5886 Advanced computational methods
- CIV5899 Infrastructure information management
- CIV5887 Infrastructure rehabilitation and monitoring
- CIV5146 Ground hazards engineering

Transport engineering
- CIV5301 Intelligent transport systems
- CIV5302 Traffic engineering and management
- CIV5304 Traffic engineering and management
- CIV5314 Planning urban mobility futures

Water engineering
- CIV5881 Ground water hydraulics
- CIV5882 Flood hydraulics and hydrology
- CIV5883 Surface water hydrology
- CIV5884 Water sensitive stormwater design

* ENG5008 is work-integrated learning that will give you valuable exposure to work-related activities. Please note that enrolment in the unit is subject to available placements. If you commenced the course in the July semester intake: If you plan to enrol in ENG5008, you may do so in place of ENG5100 in your second semester of study as an enhancement unit.

Part A. Common core units  
Part B. Specialist core units  
Part C. Enhancement units

#### Materials engineering enhancement units

- CHE5883 Nanostructured membranes for separation and energy production
- ENG5008 Work integrated learning *
- MTE5881 Applied crystallography in advanced materials characterisation
- MTE5883 Environmental durability and protection of metals and engineering materials
- MTE5886 Additive manufacturing of metallic materials
- MTE5194 Engineering alloy design, processing and selection
- MTE5197 Engineering with nanomaterials

#### Materials engineering specialist core units

- MTE5190 Advanced materials modelling
- MTE5193 Materials and sustainability
- MTE5194 Engineering alloy design, processing and selection
- MTE5197 Engineering with nanomaterials
- MTE5881 Applied crystallography in advanced materials characterisation
- MTE5882 Advanced polymeric materials
- MTE5883 Environmental durability and protection of metals and engineering materials
- MTE5884 Advanced photovoltaics and energy storage
- MTE5885 Biomaterials and biomechanics
- MTE5886 Additive manufacturing of metallic materials
- MTE5887 Additive manufacturing of polymeric and functional materials
