Course progression map for 2021 commencing students

This progression map provides advice on the suitable sequencing of units and guidance on how to plan unit enrolment for each semester of study. It does not substitute for the list of required units as described in the course 'Requirements' section of the Handbook. Please note that the map and unit listings are subject to updates.

- **Part A. Common core units**
- **Part B. Specialist core units**
- **Part C. Enhancement units**

**Biological engineering enhancement units**

- CHE5883 Nanostructured membranes for separation and energy production
- CHE5889 Food engineering and processing
- ENG5008 Work integrated learning *

* ENG5008 is work-integrated learning that will give you valuable exposure to work-related activities. Please note that enrolment in the unit is subject to available placements. If you commenced the course in the July semester intake: If you plan to enrol in ENG5008, you may do so in place of ENG5100 in your second semester of study as an enhancement unit.

Part A. Common core units

<table>
<thead>
<tr>
<th>Part B. Specialist core units</th>
</tr>
</thead>
</table>

Part C. Enhancement units

Civil engineering enhancement units

- CIV5135 Advanced structural design
- CIV5177 Road engineering
- CIV5301 Advanced traffic engineering
- CIV5314 Planning urban mobility futures
- CIV5882 Flood hydraulics and hydrology
- CIV5883 Surface water hydrology
- CIV5887 Infrastructure rehabilitation and monitoring
- CIV5888 Advanced computational methods
- ECE5146 Multimedia technologies
- ECE5179 Neural networks and deep learning
- ENG5008 Work integrated learning *
- ENG5002 Engineering entrepreneurship
- MEC5882 Instrumentation, sensing and monitoring
- MEC5888 Renewable energy systems
- MTE5197 Engineering with nanomaterials
- MTE5883 Environmental durability and protection of metals and engineering materials

Civil engineering specialist core units

Below are suggested units to guide you in focusing in a field of civil engineering suited to your previous study. You may also choose freely from the civil units listed below.

Structural engineering

- CIV5885 Infrastructure dynamics
- CIV5887 Infrastructure rehabilitation and monitoring
- CIV5888 Advanced computational methods
- CIV5899 Infrastructure information management

Geotechnical engineering

- CIV5886 Infrastructure geomechanics
- CIV5888 Advanced computational methods
- CIV5899 Infrastructure information management
- CIV5887 Infrastructure rehabilitation and monitoring or CIV5148 Ground hazards engineering

Transport engineering

- CIV5301 Advanced traffic engineering
- CIV5302 Traffic engineering and management
- CIV5304 Intelligent transport systems
- CIV5314 Planning urban mobility futures

Water engineering

- CIV5881 Ground water hydraulics
- CIV5882 Flood hydraulics and hydrology
- CIV5883 Surface water hydrology
- CIV5884 Water sensitive stormwater design

* ENG5008 is work-integrated learning that will give you valuable exposure to work-related activities. Please note that enrolment in the unit is subject to available placements. If you commenced the course in the July semester intake: If you plan to enrol in ENG5008, you may do so in place of ENG5100 in your second semester of study as an enhancement unit.
